S. A. Shaw of the 7th Ward is a new man. Comrade Mills has recieved his application for membership. He is an old war horse and comes from a family of fighters. His ancestors were among the Huguenots who were driven to Scotland, but being too advanced for the canny Scots came to America in 1834. In ante slavery days they were forced to fly from Kentucks because of their championship of the rights of the black man. Shaw was one of the first men in the Populist party in Chicago, and also one of the first to resist Democrailc control of the party and was the leader of the opposition to fusion with that party. Comrade Mills was in the fight for fusion and he and Shaw crossed swords in that encounter and Shaw did not vote for Bryan. Since 1836 he has been a man in the woods, and says he never read a socialist book, nor attended a socialist meeting, but that for three years he had been accused by his friends of being a socialist, and falling in with some of the South Chicago comrades, found out that he was. Count him a new worker for the South Side. He is a subscriber to the Worker's Call, a contributor to the party funds, an applicant for membership in the 7th Ward Brauch, and a daughter in the family is a student in the Night School of Social Economy.

"Crushing Operations,"

Those who fight the battles of capitalism often resp their reward in anun-expected manner. The Uitlanders whose "grievances" formed the pretext for the opportunity to understand what those who pull the chestnuts out of the fire for the big capitalists, may expect. Most of these Utilanders were white cago Federation of Labor reported that miners employed on the Rand, and now it had been unable to adjust the differ- when work is to be resumed they find that their wages are to be reduced from Team Drivers International Union and 30 shillings (\$7.50) to 5 shillings (\$1.25) per day. The following order from the 'hamber of Mines as quoted by London Justice" will explain:

The Commander in Chief has grantcompanies, to be gradually increased to seven, to restart-crushing. One of Brewers Association. Treasurer Lenard the conditions of resuming operations reported that \$600 had been received is that the men working on the mines shall receive as wages no higher pay than that given to Colonial Corps, viz 5 shillings per day and rations; and a second condition is that all British subjects employed on the mines must be come members of the Rand Rilles."

As the war is not yet over the necesssity of compelling the miners to act as volunteers is of course apparent. But still bigger disappointment is eviimagine that the old rate of \$7.50 will again return when peace is dectared. They will find that the resumption of "crushing operations" by the companies applies to their wages quite as such as to the ore raised by their

INTERNATIONAL SOCIALIST REVIEW

Several months ago we tried the experiment of offering the INTERNA-TIONAL SOCIALIST REVIEW three months to eight new names for a dollar. We kept the offer open but a short time, for the amount of labor involved in handling the short-time subscriptions is so great that it meant a certain loss to us if we did not keep a large portion at the subscribers. We have justifu-ished checking up our list and we are pleased and encouraged to find that over

three-fourths of these trial subscribers have renewed for a year. We therefore make this new offer, the most liberal offer yet made on any high-class socialist magazine: For one dollar we will send the International Socialist Review three months to different addresses in the United States or Canada, but outside the city of Chicago, and to additional names sent at the same time for ten cents each. Observe that the offer applies to New Subscribers only, and that each copy must go to different names; our price for ten copies three months to one address is not \$1.00 but \$2.10. Six cents must be added for postage on every Chicago address. If you cannot send so many as ten trial subscriptions, we will accept smaller number at fifteen cents each, but with a very little trouble you will find ten people who will thank you for the chance of getting thirty cents worth of the best reading matter for ten cents. We do

not send sample copies free, but will send you two sample copies postpaid for Fill out the blank below and return it with \$1.00 to

This command was given in a society where the inhorer could apply his labor, using his own tools, to his own materials, and dispose of the product as he pleased. It was then a very simple proposition to the laborers mind that no one had a right to steal what he had produced. Modern developments however have made the problem so complex that we find most of the isherers voting to allow seeking to continue. This

Now, as between these two mental attitudes there is not much choice. As a matter of fact the prohibition of sculpture and of image worship was a political necessity if the national life of the laraelites was to be maintained. As "State Socialism" is the dreaded object against which Mr. Creeionly fair to admit that he has made out a tolerably good case against it, and as to all socialists, State made out a tolerably good case against it, and as to all socialists, State Socialism and State Capitalism are synonomous terms, Mr. Creelman's query as to how Rockefeller or Morgan would be prevented from dominating when "government ownership" of industries was established, is a question which "state socialists" alone are undirectly in the control of the control o which "state socialists" alone are under obligation to answer—if they can. However to those who see the necessity of a working class resolution as an essential preliminary to the establishment of socialism, the question is not pertinent. State socialism and the trust system according to Mr. Creelman are both "hatched out of the same false philosophy". They are "stens backphilosophy". They are "steps back-ward, not forward—dampable heresies pregnant with endless misery etc. etc." Both declare that "competition is wasteful" and Mr. Creelman says it isn't, and goes on to state that if develops individual character and that men's greatest efforts have been inspired with the hope of greater wealth or power than that possessed by their fellow men. IN MEMORIAM

Loses an Able Advocate Death of Comrade Laura Willard Taft.

It is with regret that we announce it these columns the death of Comrade Laura Willard Taft, who died unexnaba Ave, on the morning of Sunday May 12th. The funeral took place on Tuesday, and was attended by many of the comrades of the Socialist party the remains being interred in Gracand cemetery. It is needless to say tha the expressions of sorrow and sym-pathy upon the part of the members who knew the departed comrade, are deep and earnest. The Executive ttee of the party at its regular meeting on Monday passed the followng resolution: "Whereas, this body fallst movement in the death of our late Comrade Laura Willard

That we, in the name of the Socialist party of Chicago do hereby ex press our sorrow and regret over the death of our Comrade Laura Willard Tatt, and tender our deepest sympathy husband, our owards her bereaved Comrade Marcus H. Taft."

The following sketch of the deceases contributed by a comrade who was in-timately acquainted with her, is here

in the death of Mrs. Laura Willard of Chicago, but of the whole country uffers a great loss. Comrade Mrs. Taft was a graduate of Carleton col-lege, and later received a Master's degree from Chicago University for work done in the department of economics and sociology of that institution. She was married in June 1898 to Comrade husband have always been among the the West. She was a frequent con-tributor to the columns of the party ress, particularly to The Worker's Call, where her interesting and practical suggestions had come to be al-most a regular feature. Owing almost entirely to her efforts, a strong and active section was organized among Works, and her labors were untiring to arouse these much oppressed slaves to a sense of their condition and the mode of securing freedom. At one time of a large portion of the neighborhood in which she lived, visiting and talk-ing with the laborers, distributing so-cialist literature and seeking to arouse the interest of the workers. She was her locally and her death cannot but South Chicago. Her voice was always heard for socialist unity and in oppo-sition to all fraternal strife, and here as elsewhere she did not confine her but took an active part in all efforts to heal the fratricidal strife that is proving so fatal to the cause of human

ocialist movement of Chicago, who

It should be true of the socialist movement esago endured the privations of politi-cal expe and social ostracism in order that they might champion the truths of the socialist philosophy, which at that stage of economical development found little favor either with proletory of the socialist movement is written will be the period when Marx, Engels from the continent of Europe were ex-iles in England, carrying on from there rn with pen and press which by and by, with the mrach of economic forces, brought them back in triumph to their native countries, Shortly before his death Liebknecht,

urged by many friends, published a delightful volume of his personal recol-lections of Marx, dealing mainly with the period just mentioned. No matter what the reader may think of the doche cannot but be intensely interested and it is safe to say that its literary harm will attract many who would never glance at a work on economics. To the socialist reader the charm will be manyfold greater, for he will be constantly conscious of new light on his philosophy and new facts concern-ing the origin of socialist doctrines and beginning of the socialist move

This book has been recently trans-lated from the German, by Prof. E. Unterman, and will appear on May 25th from the press of Charles H. Kerr & Co. It is a neat little volume of 260 pages, with a portrait of Marx as a frontispiece. The Worker's Call has made arrangements to obtain a limited number of the first edition which it will offer as premiums to its subscrip-tion hustlers. One copy of the bife of Marx will be given with \$1.58 worth of subscriptions or postals; that is, with three yearlies or six half yearlies.

of General Chaffee, in which he is re-ported to have declared that come what might the United States and Great Britain would never fight each other, the will be no necessity for fighting, as the erything worth having in Great Britain. This is but a round-a-bout way of confessing that all wars are but th result of attempts upon the part of one national group of capitalists to divest the capitalists of another nation of "everything worth having." When this has been accomplished, the "Spectator" admits that the necessity for war will no longer exist.

"Socialism would reduce all the unity of society to a dead level," says the "Kansas City Times," in an editorial Judging the opponents of socialism b their utterances, one would naturally suppose that capitalism had alread they so much fear. The man who b satisfied with an assertion that has been mouthed over millions of time by others, as an argument agains something which he cannot compre head, is about as mentally flat a creature as it possible to conceive of. Suc people generally imagine that they are are in reality ciphers, and their dread of becoming something less than they are at present is perhaps the most lu dicrous part of their indictment against socialism.

Its an ill wind that blows nobod good. Real estate dealers are incline to look upon the Wall street "panic" as the beginning of a boom in their particular business. They figure that the small fry have had a wholesome scare and will in the future be more inclined to invest their petty capital is real estate than imperil it in stock speculations. It looks that the near future will be devoted to many laudabiattempts to part the small exploiter from his capital. No sooner does he es for him, and his devourers will in turn meet a similar fate at the hands of their bigger brethren. We have evi-dently reached the stage spoken of by Marx in which the principal feature is the expropriation of many capitalists when this process has run its course the transformation of the entire system is close at hand.

The trial of "Mother Lyons" wh is charged and procuring and detaining a 17-year old girl for immoral purposes, brings out the fact that th with offices in the Rookery building who is reputed to be worth \$106,000. As he has disappeared from the city it is not likely that extraordinary rest. In the interests of present so clety it is not good policy to pusie matters to extremes in such hereby the channels by which youn women drift into prostitution migh be unwisely exposed. That there i less of a traffic by which the daughter of the working class are provided to satisfy the lusts of members of the possessing classes, is a fact that capitalist interests prudently conceal, bu ally, as in the present case. But upor such matters the press and puipit usu ally confine their comments to vague hints and generalizations, having long ago learned how to deal with subject distasteful to their owners.

Another Englewood clergyman ha followed the example of Mr. Bruner, by resigning his pulpit because of insurficient salary. A meeting of the mem bers which was called as a result of th esignation was productive of some re markable disclosures as to the reasons for the decadent state of the church The superintendent of the Sunday school blamed the apathy of the church members generally and stated that he found it impossible to secure teachers for the Sunday school. This is h session concluded according to the

At the close of the meeting Mr. Watt declared in a loud voice that some of the officers of the church were "a pack of confidence men." He challenged any one to point out for him what they had done for they institution, charging that they were "hypocrites who often stand away from services months at atime."
"The officers I refer to." he exclaimed, "are no better than so many harrel-house bums on West Madison street."

Looks as if there was a chance her for the Englewood Socialists to obtain a desirable headquarters in the near future, and thus elevate the moral atnosphere in that neighborhood.

It is true, of course, that this was accomplished of course, that this was accompished through a species of benevolent despot-ism centralized in the reigning mon-arch, differing entirely from the preva-lent ideas of government today, yet this fact only makes the truth clearer, that when the enormous advance in productive power is taken into account he awful poverty and misery to which the workers are subjected under pres-ent conditions, can find no justification whatever for its existence. The reader who studies this work carefully cannot fall to have his faith in capitalistic institutions shaken considerably, when it stitutions shaken considerably, when it becomes evident that in conserving the hanjiness of the human race even a despotism of past ages may succeed better than the socalled democracies of the present, although as the author points out, the industrial conditions un-der the Incas bear little or no resemblance to the Socialist commonwealth of the future.

Why We Are Not Anarchists.

Translated from the Polish.

The individual is to be his own legis lator; no one and nothing ought to have any right to dictate laws to him. will of the individual ought to be the only director of his life. But it is Hy true, that man's actions are dictated solely by his own will? As a man yields to the necessity of satisforced to obey the laws which evolve from the social life of men. If every one of us were so all powerful, as to our needs with a single move of our hand, then certainly one of us would be dependent upon the other. But a move of our hand does only not suffice to satisfy our wants, but even the most strenuous labor, if done separately, and not in coration with others, cannot insurour welfare.. If every one of its were own husbandman, shoemaker, tailor, architect, physician, scientist ald we be able to satisfy all cur wants? Never! Although it is true that this was to a large extent the case in former days, but then, there were no such wants; then labor could hot be freed, for it was little produc tive. Just with the increase of wealth, growth of the productiveness of lator and the evolution of the machine, the rocialist thought ripened. To wish to step backward to the primitive eans to wish to retard the emancipation of labor. What makes the social revolution possible? This mainly—that the wealth of society has grown so abundant that everybody can be assured of having all his needs supplied, that labor becomes so productive that many of the workers search in tiveness of labor is the direct result of the evolution of machinery, collective and centralization of industry In what way then, can a man be inde pendent from his fellowmen, when at very step collective work is required? At present our life is so intricate, so isny chains bind men one to another that there can be no thought of the indence of a single individual, as that there can be no thought of the inndence of any of our limbs from th others, or from the whole of our body. Our ideals of the social structure are

however not responsible for the interdependence which exists in society; that dependence is the result of developed social life, and that state of production which leads us to better social arrangements.

Now, when we once acknowledge that the man is dependent, then what signifficence har that autonomy of the in dividual, spoken of by the anarchists? single individual will submit to the will of society-not because society has appropriated the right to direct the individual, but because his interests tre dependent upon the interests of so-The community n, is the cause of the dependence of the individual on society. Now, there is the question, who is to decide in that reciprocal dependence? Is the individual to rule over society or is he or she to submit to society? There is no third way out of the dilemna, because the individual, who is his or her own lawinaker in things in which his or her interests are tied to the interests of ciety, rules over it, because he or she hinders it from undertaking such actions, as are, according to the opinio lety necessary to be done But it will be well to remind our read that in the present society, the will of the individual rules. The present so structure is based upon the principie of submission of the will of so-ciety to the will of the individual. Although according to the anarchists, there shall be no individuals por the means of production, nevertheles the rule of the individual still remains sides the anarchistic theory does

not agree with the principle of the so cial ownership of the means of pro-duction. How will that property be aged, when every individual, every labor organization, every society or community will separately dic laws for themselves. Now there ther question, who will determine fer instance the quantity of the necesmary coal, or any other product? To-day, that quantity is determined by speculation; therefore, the scope of production is regulated according to the enterprise of the capitalists, who of industry. The results of this order of things are overproduction and crises, or in other words to-day labor in ill organized. Who then is to organize in the future, when the individuals or alliances are to be independen from society? We see therefore that organization of labor does not quite agree with the unrestrained will of the individual. The unlimited liberty of individual could exist only, if the individual were perfectly independent. Labor with centralized 'production however, makes such an independence however, makes such an independence impossible. We repeat what we have said above, that if everybody were shie to satisfy his wants' by his own efforts, and to make everything by himself, then he would not be dependent upon the labor of others. Production of today, however, is centralized, and uses such means of labor as require the collective work of the whole of so-ciety. No single man can dwn factories the collective work of the whole of so-clety. No single man can dwn factories solely for himself, his work and his wents; on the cavirary, one machine demands the services of hundreds and thousands of hands, and one factory often has many such machines. Work, therefore, must be collective, and the ladividual must necessarily be de-pendent upon, society as a whole. The anarchists demand that an end be put to the present conjustication.

Whence came the present centraliza-tion of production? It is the result of the tendency, to produce the greatest quantity of goods at the least possible expenditure of energy. Therefore, today, one workingman produces more things than formerly a number were able to do. True, the machines and labor saving devices have caused nuch suffering to the working class because they deprive them of work; these evil results however are caused by the saving of labor, but by lepriving the working class of benefits, which are appropriated by the capitalists. Were the working people the masters of the tools of labor and consequently of the whole produc of their labor, then every new inven-tion would benefit the whole of human-Now, this evermore developing application of technical science, which saves labor and increases its productiveness; is possible only ith the centralization of industry. The welfare of humanity depends therefore upon our ability to apply our social order to the developing system of production. Socialism says: We submit to the laws of production, but we wish to replace the few exploiting ususpers, by the whole of society. Then all the advantages which accrue from the application of technical science will benefit all men and not, as it is the case to-

day, single individuals only. The anarchists demand decentralization of industry. If, however, the centralization of production has removed all the deficiencies and imperfections of old systems of production, then it is evident that with the return of the old nfethods of wealth producing, society will have to give a greater quantity of labor for a lesser quantity of products. The goal of social evolution however, is not the increase of hardship with lessening consumption,

The anarchists promise, that in the future the individual will be perfectly free and independent from others. True: but that anarchistic future will be paid for by slavery. The man, not combining his efforts with his fellownen, would become the slave of nature and hardships. Anarchy, therefore, although it would remove exploitation, would not increase the welfare of man-

Now the socialists say, that we ought to take advantage of the evolution of production made hitherts, and all we need is to transform the private property in the means of production into collective property of the workers

But let us fancy ourselves in the midst of the future society. According to the anarchists, every alliance, com perfectly independent from each other on administration of things Therefore, at the exchange of produc nmunity will proceed separately and independently, from each other. From this must result either despotism of a small minority over whole mass of the people or com petition. To-day competition has yet it weakens the capitalists to the adture social structure however, in which there will be no place for private prop erty, what significance is competition to have? No other but a constant was between the independent communities, alliances, or individuals. But we all know well, that the lesser the war between men, the greater the social welfare, because, instead of the vain and hurtful loss of energy in strifes and quarrels, there will be a combined effort of all to subdue the forces of nature and to generally increase th wealth. But such combined action of all the members of society, can take place only when the labor of the individual will form a part of whole socia labor or, to say the same thing in sed. An organization of labor how

"SIMPLY ABSURD."

How the "Patriotism" of the Britisi Shipowners is Judged by the Amer-ican Capitalist Press.

The fraudulent nature of capitalis appeals to "patriotism" has been ex-posed time and again in the socialis press, and although perhaps the effect of such exposures has on the whole been small, owing to popular miscon-ceptions of socialism and all connected therewith, nevertheless some weight may be added to the charge from the may be added to the charge from the confessions of the press correspondents for capitalist papers. Writing upon the effect produced upon British exploiters by the incursions of J.Pierpont Morgan into the marine transportation industry the London correspondent of the Trib-une holds forth as follows:

"Some of the talk on this subject is SIMPLY ABSURD. The Express prints opinions today full of BURLESQUE MAUDLIN PATRIOTISM, containing ish lines have trached an understanding not to yield to any temptations

There you have it all. From their ouths they can be judged. When the British capitalist talks of patriotism and the flag, the American capital ist at once exposes the absurdity. Noth ing in it, he says, except a shrewmove to make profit by appealing to the patriotism of his countrymen to patronize home industries. The ide "will act fron patriotic instead of pecuniary motives a scouted as absolute nonsense. When Mark Hanna and the gang associated with him wished to secure ship subsidies, they stated that the main object was the patriotic one of having the Stars and Stripes displayed on must heads in every port on the globe. That was "patriotism" here, but the British capitalist would doubtless designate it as "nonsense which means nothing, except perhaps a shrewd inducement, etc Every charge brought against capitalism by socialists may be deduced from the utterances of the capitalists

A meeting composed of machinists of all lodges in Chicago met on last Saturday in the Y M. C. A. Hall, La Salle street, to discuss the proposed strike for increased wages and shorter hours. Comrade John Collins got an opportunity to address his fellow craftsumen, and took full advantage of it, by pointing out, as he has, often done before the antagonism between the capitalists and the working class, and how the The Machinery and Allied Metal and the working class, and how the fact and has declared its intention of going on strike if their demands for a ning hour workday and a horizontal increase of 12½ per cent in wages is not acceled to be May 29. If this strike in the technique is the strike materializes. Comrade Collins will probably get lots of material for further illustrations of the same nature.

It is now stated that the Standard Oil Co, has acquired control of the Mex-ican Central Railway, and that a Standard Oil man will be elected pre-Standard Oil man will be elected president. Only recently a son of Hetty Green 'returned from a visit to that conutry and reported that he discovered a strong desire for annexation to the United States on the part of the "better class" of Mexicans and already our enterprissing capitalists are taking measures for its realization in the future by the modern methods of acquiring "interests" that will ultimately demand a suitable administration of political affairs to accord with them. Business Theology.

In giving advice to British iron and teel manufacturers recently at a banquoted as follows in the press dis-

Mr. Carnegle said the Bible taught Seek re first the kingdom of heaven and all things will be added unto you." He Mr. Carnegic, would say to them: Seek ye first the United Kingdom and the markets of the world will be added unto you." The you." The way to get hold of gn markets, he said, was to conner the home markets.
"All things" evidently don't loclude

the "markets of the world" in Carne-

gle's opinion, or he would have con-tented himself with urging his hearers tto "seek first the kingdom of heaven." But Andy evidently knew that he could not fool his capitalist hearers, by givin quick ling advice which is meant-now-a-days for the propertyless classes alone. He was well aware that they themselves were pastmasters in the art of preach ng this creed to their wage slaves, and that unless he could put his advice in he form of a cold materialistic "business proposition" it would fall on deaf The British conquest markets of the world" was greatly failitated in the past, by encouraging the working classes to "seek first the kingdom of heaven." the earnest seeker being usually too much engaged in the business of "seeking another world," to liscover the fact that he was being obbed in this one.

However while "conquering the home narket" may be sound advice from the apitalist point of view, it is a rather doubtful solace to the British exploiter, or the reason that the task seems im possible. The ungrateful laxy, stupid, British workman can not be induced to help his masters to achieve this conquest. He is so foolish that he actually efuses to cram two or three days work into one, and doesn't seem to care a er not. And worse still as regards the kingdom of heaven," mistakable signs of giving up the search. All this is well known to both Carnerie and the British capitalists and the latter understand parfectly that the seeming advice given them by an American labor-skinner is in reality merely an ill-concealed chuckle their inability to intensify the inbor of their unwilling wage slaves

"BUSINESS MORALITY."

Swindlers Exposed on one Page Chicago Daily and Advertised on the Other.

It is a notorious fact that fraud and humbug have so permeated the entire structure of present society that it is in exceedingly difficult task even for those who attempt to expose phase of it, to avoid unconsciously dealing in the same article. Some of these attempts are certainly indicrous in this respect, from the fact that the lemands of "business" have so blinded the writers that they are unable to ing one particular form of fraud and ignoring its connection with scores of others which spring from the same

For instance, the Chicago Tribune of last Sunday prints a front page article exposing the practices of clairvoyants, fortune tellers, card readers, etc., who in the city of Chicago alone annually fleece the "guilible public", to the is devoted to demonstrating that these people are ignorant pretenders whos claims to the possession of occult powers are merely impudent and shallow impositions upon the credulity and superstition of their patrons. Such ber" so that in case of hostilities ing the case it might be supposed that the Tribune would, "in the interests of the public." refrain from becoming a party to the schemes of these impostors such a conclusion would in reality prove just as credulous as the dupes of the clairvoyants exposed on the front page of the Tribune. By merely turning to the advertising columns of the same paper he would find that almost half a page of advertising space is devoted to the prospectuses of those rogues, for the usual rates. Although the only logical conclusion to be drawn from this is that the Tribune in advertising these fakirs is equally guilty with the in robbing the ignorant and credulous, yet such a charge can be instantly disposed of by pleading "business necessi-ty." a plea which can be used with equal force by any of the impostor who advertise in its columns.

If the Tribune professed a belief in the powers claimed by these adven-turers, if it even held that such powers were of doubtful value, some excuse might be put forward, but when it states positively that these fakirs an-nually obtain a large sum of money by swindling, and then becomes a party play their batt in its columns, it is difficult for any one of average intelli-gence to draw much of a distinction between them, in the matter of ras-

Yet the entire business world is madup very largely of contradictions of this sort, with the trifling difference that custom has labeled some of them as legal and respectable while others are regarded as illegal and disreputable.

Capitalist Private Properly and its Relation to the "Levee."

of police it was pretended by many and | dictum of capitalism. expected by some, that the malodorous district known as the "levee" would undergo a severe purging under the new regime. Several "raids" were made in the district, a few scores of the most notorious habitues were given a ride to headquarters in the patrol wagons, several professional beggars were also aught in the net, and half a dozen "joints" where robberies had been compitted were closed by order of the new chief, a few gambling outfits have been eized and confiscated, and the inhabitants of the levee were represented in the daily press as terror stricken by the vigor displayed in suppressing nefarious practices. The new broom had to all appearances been prepared for the proverbial "clean sweep." also speedily became apparent that a halt was to be called upon the sweeping process. The levee politicians got to work, with the result that one notorious dive was "suppressed" reopened for "business" three or four ed up in such a matter. They left it to times within forty-eight hours. The the saloonkeeper and "Hinky Dink," times within forty-eight hours. The press at once began "deploring" the who appears next day in a cartoon as influence of the barrel house politicians | the "power behind the throne." and caricaturing "Hinky Dink" and other statesman of the same type, as prevented Kipley's successor from car-rying out the "levee" cleaning scheme

with which his official career was to be so auspiciously starred. The folly of "vice crusades" has been frequently pointed out in the columns of this paper, and the "reformer" had at least one retort to full back on, viz. that the police were not doing their duty. It was also charged that the leves was a source of income to the police officials, which they might naturally be supposed to conserve so long as it was profitable. Now, however, cannot be denied that the new chief i really making the attempt, and yet it is already plain that his efforts will be rendered abortive. The police, be they ever so willing and earnest cannot abolish the levee, nor even can the police and the Mayor acting in harnony accomplish that task and if their efforts were seconded by all the reformrs, Y. M. C. A's and W. C.T. U's in the city the result would still be the same Nor can all the "Hinky Dinks" and "Bathhouses" in the district, with all heelers, saloonkeepers, grafters, bur-glars, bunco steerers and confidence ien, preserve it, if once its abolition is agreed upon by these who really possess the power, the owners of prop-erty in and around the district, and various property interests cor ed therewith. The "level" is a product mayors, police chiefs, reformers, terms rance fanatics politicians, divekeep ers, ward beelers and the "saloon ele ment" are equally helpless. The level depends for its existence upon a multitude of prominent, respectable, God fearing, church going, labor skinning, profit mongering, interest drawing, rent ing and land jobbing citizens, all of living from the labor of others, and

A banker in La Salle street, a man with large "business" connections, holds a mortgage for say \$25,000 upon the property, upon which the owner must pay the interest as promptly as he makes the renants pay the rent. Everybody is of course entitled to a fair pro-

Next morning it is opened by order of the Mayor. has happened? The public are informed that the saloonkeeper had a "pull" big enough to secure the powerful intervention of say "Hinky Dink," who has a still bigger pull. They get to work on the Mayor and the result is that the combined pull of the saloonkeeper and "Dink" and various other denizens of the levee is too strong for the chief, and the house is opened next morning. But the owner of the property and the mortgage banker in La Salle, street with large "business" connections, they of course didn't do a thing. They were and altogether too "respectable" to be mix.

> The banker wanted his interest on the mortgage, which depended upon the owner receiving his rent, which depended in turn upon the premises being open for business." The brewing ourperation, which supplied the saloon with liquor and probably owned the fixtures, makes no protest in public, al-though its shareholders want dividends quite as much as the banks wants his interest and the owner his reat. The other property owners also remained silent though they know that vacant houses reduce rents generally, and the bolders of their merigages also said nothing. These people all skulk behind the supposedly evil influence or 'Hinky Dink" and the "public hoodwinked into believing that the lat-ter individual and his type are all powerful in preserving the "leves" as a hot bed of vice and crime.

> Enough has been said to show that an endiess chain of property owning interests is responsible for afthough carefully concealed from the public gaze. And the links of this chain are welded more closely together than is generally supposed. Very often the brewery director is also a director. the mortgage holder may be a shareholder in the brewery, and even the levee property owner may hold mortgages on other property, stock in the brewery trust, etc. And the entire group may, and indeed often do, form part of a fushionable congregation whose paster pushes the "vice crusade" with periodical vigor when the ap-propriate time for that manifestation

of rapitalist morality occurs.

And it is in these men and the
nection with the business worl nection with the business world, that the "pull" resides; and not in the shalwho runs a gis mill in some part of the pest hole, and who is looked upon as "shrewd" by the still more ignorant rabble who congregate in his "place of business." These men who pretend in speer at the "Hinky Dinks" and the Eathhouse Johns," and deplore their influence" in politics, are of all people the most responsible for them, through using them, for the conservation of are the modern pretotypes of those sepulchres filled with rottenness and dead men's bones." Outwardly respect able, they support vice and cr turning it into profit, and meanly sk behind some petty and vulgar politician whom they affect to despise. Often posing as "reformers" themselves they destroy even the small possibilities of reforms that perhaps might be under capitatism. And in this they have the tacit support of every up-holder of expitalist property through-out the country. They understand thoroughly that the imm tion of the "levee" by an indiscri closing of the dens of vice and crime from which they extract tribute in the shape of rent, interest and profit, is omes more profitable to possible while business interests main supreme, and that con every attempt to de so must prove

> Private property in the means of pre-Private property in the means, of pro-duction or in other words, capitalist property, is at once the creator and preserver of the "levee" with all its nameless aboninations. "Moral waves, vice crusacies," good intentions, or a zealous police administration cannot seriously interfere with it while capitalism remains. The best that can accomplished is the shifting of its cupants to another district, and it itself is inevitable at the proper ti when the demands of business dec its removal. But its complete about involves the disappearance of capitalist property, a task that is reserved for

A Successful Plan.

About four months, ago there wa noted in these columns a plan for ining the circulation of the Workers' Call proposed and put into execu-ion by the Tenty-fifth Ward Branch, alist party. The plan in brief was follows: Members of the branch started a pledge list and circulated if nong the comrades living in the ward, the money thus raised being applied to the payment of three months subscriptions to the Werkers' Call for names selected at random from the lists of registered voters in that ward. The intention was as soon as the threeonths subscription expired to have members of the branch to solicit for rewals and get as many as possible to become regular readers. The, work pushed with energy, the resul being that within a few weeks several hundred such names were added to our mating list from Lake View. Two weeks ago the first lot of three month scriptions expired and the members of the branch statted out to secure renewals. The result was very satisfact ry. About 40 per cent of those whose ary. Apout so per cent of those wases subscriptions expired bought Workers' Call postals and will continue to have the paper a weekly visitor.

The Twenty-fifth Ward Branch are

still bringing in three-month subscrip tions and will continue each week to sell an unnusually large number of cards in consequence. Their plan has been tried and has proved an excellent mode of propaganda. It might be well for other branches to discuss this scheme, and see if it is not possible to put in operation in other wards. The several organization districts might also find it of value in building up pow erful organizations.

alists must Equip Themselves Make Propaganda from Current Events,

One of the greatest needs of Amercan Socialists has long been a book that should, at once, give a thorough, scientific explanation of socialism in all its phases so as to make a reliable text-book for socialists, and still be so simple in its language and elementary in its treatment of the subject that it could be put into the hands of new inquirers.

A book recently published by Protes sor Emile Vandervelde, of Belgium, entitled "Collectivism and Industria Evolution" seems to fill this long felt want. Already it has been translated into the German, Russian and Italian languages. The first part of the book is very pertinent to present conditions in America, dealing with the subject of capitalist concentration and the dis-appearance of the "peasant proprietors," "artisans" and "small retailers. This is discussed with a wealth of illustration and argument nowhere else to be found. "The Progress of Capitalist Property" is then traced through the successive stages of corporations, mo-nopolies and trusts. The attempts of capitalist writers to explain this proess of evolution are then taken up and

thoroughly maswered.

The second part of the work deals with "The Socialization of the Means of Production and Exchange" and is by far the most exhaustive study of the transition from capitalism to secialism that has yet appeared. The final chapter discusses the objections to socialism in a thoroughly satisfac-tory manner. Of the book as a whole, it is not too much to say that it is der tined to become the standard text-book of International Socialism and the

SPECIAL OFFER

INTERNATIONAL SOCIALIST REVIEW

Several months ago we tried the experiment of offering the INTERNA TIONAL SOCIALIST REVIEW three months to eight new names for a dollar, We kept the offer open but a short time, for the amount of labor involved in handling the short-time subscriptions is so great that it meant a certain loss to us if we did not keep a large portion of the subscribers. We have justinished checking up our list and we are pleased and encouraged to find that over three-fourths of these trial subscribers have renewed for a year.

We therefore make this new offer, the most liberal offer yet made on any high-class socialist magazine: For one dollar we will send the International-Socialist Review three months to different addresses in the United States or

Canada, but outside the city of Chicago, and to additional names sent at the same time for ten cents each. Observe that the offer applies to New Subscribers only, and that each copy must go to different names; our price for ten copies three months to one address is not \$1.00 but \$2.10. Six cents must be added for postage on every Chicago address. If you cannot send so many as ten trial subscriptions, we will accept smaller number at fifteen cents each, but with a very little trouble you will find ten people who will thank you for the chance of getting thirty cents worth of the best reading matter for ten cents. We do not send sample copies free, but will send you two sample copies postpaid for

SYMPTOM OF DECAY

Alexander Dowie.

FUNGUS GROWTH ON SOCIETY

ns and Political Imposto Thrive Upon the Decadent Middle Class.

It might be well to call the attention of those individuals who suppose that the religious imposter John Alexander Dowie is at last on the run, to the old overb which advises all and sundry o refrain from "hollering" until they are out of the wood. While it may be very true that all falsehood is meretemporary, it is none the less exnbug is in its very nature exceedingly elastic and not at all liable to disappear under the frown of "publi opinion" as suddenly as those engaged in the same business would like. In igning Dowle and his followers to ediate extinction, because his theory of healing has failed in several well advertised instances to produce the re-sults claimed for is, these parties are fairly open to the suspicion that "the wish is father to the thought."

Were Dowie the only humbug in modern society, and as such, an abormal quantity, out of harmony with nditions as they exist today, the satisfaction expressed over the anticipat ed disappearance of his particular cult, might be said to have reasonable nds for its justification. But such is most assuredly not the case. Dowie is merely a representative of one particular form of deception, in an entire world of mental and religious shams reared on the structure of a worn-out mic system.

This particular imposter is merely a fungus growth which denotes the rottenness and decay of present society, and his kind may be expected to in-crease instead of diminish in the years to come. Throughout all history the appearance of multifarious quacks and charlatans has ever been the herald of coming social revolution. Even if it were possible to obliterate Dowie and all his works in an instant, "society" would immediately produce a similar brood to take his place, and a compe-titive struggle between them extending over a few years would determine which was fittest to survive according to the law of natural selection. It is only in a soil mentally and morally rotten and putrid, that such growths can thrive, and those best adapted to the particu-lar surroundings and environment will always outgrow and overshadow their rivals, just as in the mercantile comrivals, just as in the mercantile competitive world. Any one who has observed the growth of the crop of Messials. Elijahs, incarnations, healers, pheis and miracle workers, which sprung up on all sides during the last ten years, some to wither away in a year or two, others to attain a partial and still others a marked success, will appreciate the fruth of this state-

Now, what was the particular soil in which Dowleism took root and flourish-ed? Was it amongst the great capital-ist class, the captains of industry, the nen who reckon their fortunes in mil-ions of dollars? Undeniably not. John der Dowie with all his shrewdthese is not clever enough to exploit the great exploiters. Any of the large res-sectably orthodox churches will supply heir "religious" needs abundantly. Neither did Dowleism make a speci-

atty of getting the disinherited, proper-tiless, wage working class into its ranks. In a double sense there was nothing to be got by recruiting in that field. The "workingman" whose chief hing particularly attractive in the Dowie creed, more than in any other. Besides, if he did come, he came empty-nanded, and therefore was able to contribute little to Dowie's "greatness," which he is credited with owning and

It was mainly amongst the socalled title middle classes, that the "over-cet" grew and flourished like a green say tree. It was there that he found, mechanically begotten of an unstable commic position in the modern social consciously begotten of an unstable nomic position in the modern social acture, the necessary credulity that it to make him great—and a sufficiamount of property to make him in his present adherents were also without exception drawn from er congregations throughout the ennity exhibited towards him by regular shepherds, and perhaps is a responsible for the resignation of the of them on the plea of insufficient ary, their poverty being reflected to be extent in the amount of wealth trolled by the "healer" are element that he attracted looked a "religion" as a reality which had a more or less distorted by false beings. Though they were unable comprehend its scenomic basis as ding and shaping its different above the control of the seconomic basis as

distinguish many of the glaring contra-dictions and disgusting hypocrisies inseparable from it in present society; and their dissatisfaction took the shape The Economic Significance of John of the usual "reform," which is always peculiar in the middle class. Dowie appears as desirable centre around which to form the nucleus of the new faith. A man of most venerable appearance. a master of pulpit eloquence who de-nounces in unmeasured terms the hollowness of the existing churches (which his hearers had partially seen or suspected before), a preacher who pro-fesses to draw his conclusions from the literal "Word," and who unites the talent of a powerful exhorter with the practical ability of a successful organizer, it is not wonderful that under such Lianagement a new cult emerges and prospers. . The "followers" of John Alexander Dowie merely exchanged a numbug which they partially understood, for one which they will yet discover to be quite as fraudulent-and pay for the knowledge with part of their fast diminishing property.

This class is bound to remain the recruiting ground for religious humbugs of the Dowie type, just as it furnishes the favorite field of operations for the big capitalist appropriators who are fast destroying it as middle class," by absorbing its wealth. And for the same reason. Its religious vagaries which mark it as the prey of theological chariatans, correspond to its futile efforts in the economic field to preserve its existence as a class, efforts which are prolific of political quacks and "reformers" without number. In this respect William Jennings Bryan and John Alexander Dowie may be said to be the complements of each other, the sincerity of either being a matter of no importance, as both in the last resort are but natural products of he present economic system.

Until that system passes away, Dowle-ism, or other expressions of the same thing, is here to stay. The faith which centres either in religious or political quacks is essentially the same thing, and the crop of both within the last ter years has been equally numerous. The pretensions of Dowie are not one whit more absurd that the claims of those who propose "remedies" for existing evils, while ignoring the economic evolution that has brought society to the stage it now occupies. Between the faith healer and the trust smasher there is little to choose. Economic and religious confusion are inseparable, and always appear most distinctly during periods preceding a great and farreaching change in the social structure, and only when the nature of such change es apparent to the majority will they tend to disappear.

John Alexander Dowle needs no apo

ogy for his entrance into society, any sore than any other modern quack with a patent remedy for all its evils, and the manner of his exit is equally outside the dictation of his critics, being able to grasp his significance as a symptom of social change they will probably continue to fulminate over his blasphemous" pretensions, deplore the credulity of his dupes and moralize philosophically upon the eternal guili-bility of the human race. In the mean-time the object of their dislike, thanks o the laws of capitalist private property, can improve the opportunity to secure more firmly in his possession the proceeds of ten years strengous exploi-tation in the field of religious humbus. And when all these things are accom-plished, the manner of its accumulation will be conveniently forgotten by every-body, with the possible exception of those of his dupes who have realised the fact that they have been "worked" good and plenty.

The Night School.

Comrade Kleindienst suggested a speakers' practice club, and comrade Mills offered to give the tuition in the Thursday Night School to any of the south side comrades who would join in speaking and take regular work for the summer in the south side campaign, the practice in speaking being now a leading feature of the night school work the one dollar each for the printed lessons being the only charge to such omrades.

Some Good Points.

Among the good points which were made in the conference, here are a few from the many worth remembering: Comrade Richter of the 7th Ward "No other work can be so imanid: portant at this time as enlarging our organization and extending the circul ation of the Workers' Call, and what ever is done should be planned with regard to these two things."

Comrade Anderson of the 22nd Ward

said: "What is wanted as not some-thing to take the place of the Ward organizations-nothing can take their place. The plan should be to help the ward organization to do its work, not undertake to do this work for it."

Comrade Dreisvogt of the 4th Ward said: "There are Comrades who cannot attend these meetings but they are day, but somebody will have to pay for willing to furnish the money to pay the bills if we send for it."

The Way to Do It.

Attention was called to the process was discussed at some length and the following was the general sentiment of the meeting and it was so agreed:--If tions on the back of the application blanks should be read by the Chairman and answered by the applicant who should also sign in the place provided on the back of the blank. But it is frequently the case that applications are signed outside the ward meetings and in such a case the worker who takes the application should be very careful to read it and explain the force of the printed pledge to each applicant. The application with at least one month's dues will be reported by the work-er to the Ward organizer, who will give the name and dues to the financial se cretary of the ward and return the application to the Division committee and the financial secretary of the ward will at once make out a membership card, affix the dues stamp for the months paid and mail to the new memb-er. The application will be turned over by the Division Committee to the Gen-eral Committee at its next session, but it is understood that all applications accepted, and members who apply and pay dues at at once become members of the party, unless notified to the contrary by the secretary of the General Committee immediately after its to do it, it only remains to do it times enough and the Socialist party will

Bursting of the Texas "Oil Boom" Brings Usual Results.

RUINS THE SMALL INVESTOR

The 'Oil of Joy is Turned to Mours and the Little Speculator Has'nt the "Ghost of a Show."

The oil "boom" in Ecaumont, Texas, as collapsed, and the "crazy" speculators reterred to in a recent issue of this paper are now undergoing the proess of having their reason restored. This is how it is done, according to press reports:

Beaumont, Tex., May 13,-(Special.)-

Now that the gambling stage bas passed, investors in oil stocks and oil lands in the Beaumont field are looking into outlook, from the point of view of the majority, is anything but promising. Speculators have made fortunes in a it, and the small investor is awakening to a regitation of the true condition of affairs, and is fast learning that it is his money that has gone to make up by which new members are secured. It these fortunes and that his chances for getting it back are not so bright as he thought they were two weeks ago. The small investor has purchased oil stock. application for membership is made at Classed as small investors are thous-the regular ward meetings, the ques-ands and thousands of widows, seamstresses, clerks, children, and even domestics, who have poured their savings into the treasury of some one or more of the oil companies here, they will get is best told in the words of one of the most prominent promoters on the ground, who has made a fortune:

"I have just left my old friend Brown," said he, "and I tell you he's a sorrowful sight. He bought Beau-mont oil land last week and is already out just \$45,600 on the deal. He spe his time now asking every one who comes to see him if that well they are oring two miles from his land 'come in.' Of course it hasn't, and he knows it, but he asks just the same, and when he gets "no" for an answer he pours some more cold water ever his head and sits down to wait for the next visitor.

"I certainly feel sorry for old Brown, but his case is not half so pitiful as that of the widows and orphans have been robbed out here. Robb Yes, that's the word, for they never had the ghost of a show to win out.
"It's a swindle, and that's all there

first meeting succeeding the report to is to it. The oil is here and money is it of the application. If this is the way to be made, but the small investor is not being given a ghost of a show. This is no doubt an exceedingly doleful state of affairs for the small in-

vestor, but no more than might have been expected. It seems as if fate has decreed that the small investor will re-tain his faith in "business methods" until his petty capital has been swallowed up beyond hope of return. Whether it is boom or panic, the result for him is ever the same. It may be an extremely painful method of im-pressing the necessity of socialism upon him, but the socialist cannot be held accountable for the results. That he accountable for the results. That as is doomed to be crushed out of the cap-italist ranks into those of the wage earners is a matter for which the sys-tem alone is responsible. It is the busi-ness of those who wish to appropriate his petty capital to assure him of the out the hope to the working class eminvest their "savings" in the business they can become wealthy in time. But to quote the language of the oil field speculator, "It's a swindle, and that's all there's to it."

A "Startling" Report.

A Washington chemist employed by the Government to investigate the use of food preservatives has made what is described as 'a startling report' which will appear in the forthcoming yearbook of the Department of Agriculture, From the newspaper account of the matter it appears to be merely the old story of poisonous acids being used as preservatives with some special fea-tures for which recent discount of preservatives with some special tures for which recent discoveries chemical science are responsible, would imagine from the manner which "society" is being prepared hear "startling reports" that is episodes as the "embalmed beef" as dail of three years ago had never in dal of three years ago had never take place before. It looks as if "society stood in need of periodical "startly reports" and "thrills of horror" stated times, just as a sick man need a tonic, but it is safe to predict the when the report in question appears, "startling" effect will not be quite apparent as the molders of "public opinion" pretend to believe. "Society is getting too well used to its capitalis medicine to regard it in any other light than a matter of course.

Reflected "Prosperity."

Taking its cue from Correspo Curtis' glowing account of "prosperity" in the Southern States the Record-He ald publishes a cartoon representing a ranged negre laborer with a ponde-rous bag of dollars, which the latter recieves with a delighted grin. Undereath is the following rather inappro priate legend, quoted from the optimis tic Curtis:

"The present prosperity of the South is unparalleled. You see it on the face of the landscape, on the plantations, as well as in the towns. The fences show it; the new machinery and implements; the wagons, with their bright colored paint, that you see along the highways, as well as the GARMENTS of the people and other outward manifestations. Even the little brooks and the birds are singing songs of presperity and lo-cent cotton."

As the negro doesn't own the land-cape, the plantations, or the new mascape, the plantations, or the new machinery, it is rather difficult to see just
where he comes in, If the colored
gentleman in the cartoon who is depicted in a pair of patched pants and
a rather dilapidated cotton shirt, reflects
in his "garments" the "prosperity of
the South", there is certainly little to
distinguish it from the brand that we
are acqualited with in the North. Mr.
Curtis is apparently taking some liberties with the language in describing
Southern prosperity as "unparalleled."

It is rather strange that the repeated decisions given against workingmen parein reasons for such decisions, outside of the flimsy pretext of "rights," harge of a freight train belonging to appeal to the law to decide their dif- duction is being gradually weakened at ferences, Last week in a Chicago court, the much talked of "blacklist" received the ordinance which provides that legal sanction, the judge declaring that that if it is to be preserved, the armed or more than five minutes by a rail- "right" to agree together to refuse em-"right" there was no reason why a der the muzzles of rifles may possibly combination of corporations should not last three years.

THE ALBANY STRIKE

After twelve days marked by riot and bloodshed, costing the lives of several people, and the maiming of many others, the great street car strike at Albany, N. Y., has at length been settled, and as the capitalist press says. "If the agreement is kept," peace is assured for at least three years. The union men have obtained the greater part of their demands and have in turn made some "concessions" to the company. The three thousand troops were sent to the city to maintain law and order and incidentally protect "scahs," have been returned to the places from whence they came. The dead have been buried, the wounded are progressing towards recovery in the hospitals, and the harmony between capital and labor has been restored for

similar nature that have taken place. except perhaps the alacrity with which the capitalists resorted to armed force for the protection of their "sacred" property, which from first to last has been created and operated by the labor through the courts, should have failed of the working class alone. The speed to convince them of the plain and ap- with which the strong arm of the law was put in action in this case shows conclusively that the capitalists are bewhich is always put forward when ginning to recognize that the status of brother capital and brother labor private property in the means of proits foundation by the socialist thought that is now permeating the country and hand must be resorted to without delay. No time is wasted in socalled arbitration on either side, though it is pre-

It would be useless and misleading Since the great railroad strike of 1891 to enter into a discussion of the relative merits of either side of the case. While the cause of the inherent antagonism between capitalist and working class remains unknown to the latter, their attempts to destroy property are the natural expression of their economic igporance, while the efforts of the capitalists to protect their property by

every means in their power are equally natural. It is beyond the power o either in present conditio constitute an impartial tribunal for the as the capitalist class have recognize this fact to the full, their determination to settle such matters by the shortest possible method is easily under standable.

These inevitable collisions between

intagonistic classes clear the road for ocialism in many ways, and while the socialist can neither prevent or advocate them, he nevertheless is well aware of their import to the movement in which he is interested. No body of workingmen emerge from a strike of this sort in the exact mental condition in which they entered it. After the defeated in their attempts to have it battle is over a few men will always b found who have been forced to recogalze to some extent the underlying causes of those outbreaks, and such about the matter. The discussion of men must of necessity approach the the question of "blacklist" in connection socialist view of the structure of modern society.

The prompt resort of the capitalist class to armed force, cannot but attract the attention of some of the more intelligent of the strikers to the fact that the possession of the power of the state in its totality, Legislative, Judicial and started upon lines which would logical- Executive, is the source from whence ly lead to socialism, evidently carries capitalism derives its strength. This conclusion once arrived at, it is comparatively easy to see that this posession is in turn derived from the votes of the workers, and when once this fact is grashed the necessity of socialism, the organized united power of the working class exercised for the material interests of that class become casily apparent.

In another and different manner these collisions prepare conditions for the establishment of socialism. The cost of the suppression of this strike, amounting to some \$49,900, will fall upon owners of small properties and petty capitals. None of these men need be told of the difficulty, nay the imposwho see and understand their connec- sibility of compelling large corporations tion, and manifest it through working to contribute what is called their "just share of the burdens of taxation," and garded as genuine combatants for the as for the working class, which is even now almost propertiless, it is evident that it is still more impossible to look for any relief from that source. A class which receives in wages the bare cost of its production and maintenance as a class, cannot be levied upon, for the very good reason that it possesses nothing. Quarrels between the great capitalist corporations and their employes, in which a display of armed force plays a part, therefore tend to eliminate the small capitalist and property owner. who is forced to bear the greater part of the expense incurred in the protection of the private property of the great corporations and the re-establishment of the status quo.

For these results it is folly to hold ndividuals or spen classes responsible. The society of the future is being evolved through the clash of antagonistis material interests which will ultimately find their solution in the collective ownership of productive property, and such incidents as the Albany strike are at the same time factors in this evolution, and indications that the class struggle has reached a stare where its manifestation tends ever more to assume the form of physical force.

Harmony, Sweet Harmony. For the benefit of those well meaning

ninnies who drivel out their stale pla-titudes regarding the possibility of permanent harmony between capitalist There is nothing about this strike to injunction issued by a Kentucky judge distinguish it from many others of a against striking coal miners in that that state is hereby reprinted from the daily cleaning of the individual, resid

The substance of this admirable do-cument in short forbids union men from asking others to strike, forbids the collection of union dues and the districollection of union dues and the distri-bution of food to the strikers. It is neither "infamous" nor "outrageous." It is nothing but the logical and confi-dent expression of class-conrious ca-pitalism using its instrument, the law, to uphold its interests.

That "handwriting on the wall", with which Dowie is supposed to be con-fronted translated into English, runs this way: "Thou art weighed in the balance and the law is found wanting."

Ten thousand copies of the "Acts seems have been lying in Hong Kong for a dozen years se Apostles" in the Tagalog dislect, it dozen years, waiting for entrance into the Philippine Islands, from which they were excluded by the Spanish government. As these books were the pro-perty of the British and Foreign Bible Society, there is good reason for believ-ing that our Angio-Saxon kinsmen on the other side were preparing for any eventualities in the way of nt assimilation" which might possibly occur. John Bull is not quite so slo as some folks imagine, even if he did get left in this case.

But Dewey's guns opened the way, nd the job lot at Hong Kong has at ast reached its destination, the acts of he modern apostles of capitalism having preceded those of the ancient apos es of Christianity. Now watch out for the rapid evangelization of the better classes" in our new possessions just as soon as they come to realize that conversion to the new-faith is bet ter adopted to the new industrial conditions of exploitation which will be introduced. Ten to one we will see its first manifestation in an attempt to derease the number of religious holidays, on which no work is done, which so well suited the indolent nature of the Spaniards in tropical countries.

According to British law, the King of England cannot take legal proceding for libel against his subjects, and for this reason it is stated, the newspaper edited by Wm. O'Brien was suppressed. Even if the law were different, it is not very likely that the old debauchee would care to avail himself of the privilege. "The fierce light that beats around a throne" may be a fitting sublect for a lickspittle poet to prate sbout, but would hardly bear exhibit ing in a public court.

The small oil speculators who have been wiped out in the deals at Beaumont, Texas, will not be the only parties whose occupation will vanish with the find. The manager of a steamship declares that such an inexhaustible supply convenient to tide water will supplant coal to such an extent as fuel for marine propulsion, that the stoker will be almost entirely eleminated in consequence. Three barrels of oil, he says, will do the work of one ton of coal, weighs 40 per cent less, and can be delivered on board at 25c per barrel.

Some evil disposed persons have ininuated that the officials of the First National Bank in ordering the employes to have their photographs taken for s bank album", are in reality attempting to protect the bank against the results of possible dishonesty on the part of the clerks. That this view of the natter is incorrect, is amply proven by the fact that the photographer himself states that he doesn't anticipate that the employes will show the slightest reluctance to comply with the order. Of course if they did, it is apparent to all that the project would be abandone bank officials would never be guilty of hurting the feelings of their employes by insisting upon having it carried out.

"We suspect", says the London Spec tator", that before the century is old, efforts will be made to prevent these grand stock exchange tournaments and impede the possession of systems of communications by single individuals." That the suspicions of the "Spectator" will be confirmed there is little doubt. The spectre that haunts Europe, the spectre of socialism, is the appari-tion which brought forth this remark from the conservative "Spectator". It will appear to others also in due time, and when they become more familian with its outlines, they will "suspect" that it means something more than an effort to regulate stock exchange transactions and impede possessions etc 'Spectators" who really possess the the stage of "suspecting" as regards the stage these matters.

Over in Ireland it seems that the institution of "trial by jury" is some what out of gear. The Nationalist complain of "jury packing" which ex-cludes their followers from acting in the capacity of jurors, while the other side declares that if the jurors are not 'selected" (which is a much more re spectable term than "packed") it would be impossible to get a proper verdict, which is practic lly a confession of the fact that "might make right" and that under present conditions, the law is simply the will of the ruling class made binding upon all.

CORRESPONDENCE.

From Comrade M. H. Taft.

To the Chicago Comrades in the Socialist cause:

It is with sincerity and gratitude that I thank you for the kind words of sympathy that came to me from so many comrades at the time of my great sorrow in the death of my wife.

Many of you know something of the close and perfect companionship that existed between my wife and myself, of our Joy in working together for the cause, as well as of her rare and sweet spirit. The tender and sincere sympathy of you, who thus know in part the greatness of my loss, has been to me a real help and makes my sorrow less unbearable. Praternally yours.

Wrote Him Down An Ass.

One of the most certain signs of the growth of socialism is the increas umber of pulpit attacks upon it which are invariably reported, or perhaps misreported, in the public ess. For instance Dr. Lyman Abbo of Plymouth Church in New York is declared to have thus expressed him-self in his sermon last Sunday;

"Socialism argues, that so long, as "Socialism argues, that so long all private property exists, so long will there be ambilion and striving for wealth on the part of the individuals. When we destroy this, says the socialist, and make everything into one state—in other words, when we have aboltshed Mr. Carnegie and established Mr. Creker—all will be well."

From what we know of Dr. Lyman Abbot, it is rather diffic Abbot, it is rather difficult to accept this imberile statement as an expression of his views on socialism. It is altogether more probable that the reporter instead of Dr. Abbot is the liar in this case, but so much has been lately published regarding pulpit demunications of socialism, that it is not until the probable of socialism, that it is not until the probable of these uttrances. are specially manufactured for the oc-casion in the hope that they will pass unpercleved amidst a torrent of similar robbish. Making and Breaking.

Those credulous mortals who insist upon legislation against the trusts, would do well to ponder the following statement from Prof. Geo, T. Ladd, professor of philosophy in Yale Unirersity:

"Twenty years ago the great cor-porations of this country we've per-sistent lawbreakers, but in these days they do not need to break them, as THEY MAKE THEM THEMSELVES." As an illustration of this the pro-

"Some years ago while in Chicago I found that if I cheated the Illinois Central raliroad gut of five cents I would have to serve a long imprisonment and have to serve a long imprisonment and have to serve a long imprisonment and pay a heavy fine. If an ordinary highwayman should, however, have rost me on the street, knocked me down, and stolen all my money, and even killed me for that matter, he would have escaped with a much lighter sentence than I who had cheated a big corporation out of a paltry nickel."

The professor has merely stated in other words the truth that socialists have always chunciated, that the law is the servant and creature of capitalist interests for all general purposes.

Why We Are Not Anarchists.

Translated from the Polish.

We have explained why the socialists ognize the centralization of producand have shown that they base their aspirations in regard to the future social structure upon the phenomena of the present social life investigated socialists draw their picture of the future social organization from what the reality teaches us, the anarchists spin their social ideal from their imagnation, not taking into consideration that which now exists. The same objection-many an anarchist may saywhich you put to me, the capitalists put to you. Don't the capitalists say, that socialism is a phantasm, a reverie a disregard of the reality?

True-we will answer-the capitalists put to us the same objection. But is s our fault that the same words may be true on one occasion and untrue on the other? If a perjurer when pronouncing the oath-formula, lies, it does not follow that everyone who uses the same formula lies also. We have shown why we reproach the anarchists with disregard of restity, and that by demanding the perfect independence of the individual, they forget, that the constant development of humanity in creases even that dependence which already exists. But now we must look somewhat closer at the capitalist objections against socialism.

The capitalists attack socialism, be

cause it does not consider the present order of society just and eternal. On the other hand, the capitalists cannot deny the gruthfulness of the socialist reasoning-they cannot deny the prevalling misery, they cannot deny the pitiful condition of the working classthey cannot hide the industrial crises nor can they conceal the fact that labor is producing more and more wealth which is appropriated by the proper-They must also conc that capital is constantly concentrat ing, the number of propertied men con stantly decreasing, and that the present social order is leading mankind to an utter confusion. All these negative sides of capitalism socialism investgated, and from these investigations has drawn the conclusion that a social revolution is inevitable and that revolution only will free humanity from the And what do the capitalists answer to that? They cannot deny that the capitalistic economy carries with it pernicious results for the mass of the people, they cannot remove, or make invisible the sufferings, but they would like to retain all the privileges they now possess. And that is why they re irgumentations. But are the industrial crises, misery, oppression, ignorance, prostitution, and destitution of the working people, etc., also phantastic things?....Is the fact that the big capital devours not only the earnings of orkingman, but even of the small manufacturer, also an imaginary phenomenon? Is the oppression, of not only the workpeople but also the so-called middle-class or the constantly growing destitution of the laborers as well as the middle-class, also imagnary? Who dares deny this, who dares deny the socialist investigations? Who is able to conceal the sufferings felt by an overhelming majority of society?

capitalists boast, that the big try saves labor, makes things aply, that it is able to produce large quantities, and is therefore better abl to satisfy the wants of mankind, than all industry; the capitalists boast, that the big industry encourages in ventions, etc. Now, we socialists readily acknowledge all these merits of the big industry, but we demand that the advantages which accrue from the machines, inventions, and centralized in-duustry, shall not be appropriated by erable life, when working, and forced idleness caused by industrial crises. We socialists demand that the ofits, derived from the big industry, shall be turned to the benefit of the workers and the people at large. We do not want that in an age of labor-saving machinery, people shall degenerate from overwork; that at times when there is an overabundant The present order cannot conable; it will restore to society all the ans of production appropriated by capitalists; and will thus create affare and happiness for all the peo-

They are so very-uch taken up with the desire to make en free and independent, that they efer to return to the old methods of aduction, rather than march forward a perfe; welfare combined with a tase and necessary reciprocal depend-ice of free men. Another reproach the anarchists set rth against socialism reads as fol-ws: When there is to be a centralized dustry, there must be a centralized

dustry, there must be a central man-ement, and it is well known that mover possesses power misuses it; us we will have a socialist state sich will be as oppossive as the pre-

his whip, possesses that power not be-cause he holds the wrip in his hands, out because he is the representative of a certain social institution, viz.: slav-ery. Even if you take away the whip revertheless the slavedriver remains

The present state is a whip of its The capitalists rule by means o the state, by reason of their ownership of the means of production; they are the ruling class. The difference between our example (the whip) and the state is that the whip is only an unimportant tool, why the state is all-important to our oppressors who cannot do withou it. It is the pillar which supports th structure of oppression based upon the ownership of the means of production.

In the future social society, when th

seans of production will become socia

property, a state like the present is out question, for there will be no rule of one blass over another. Thereclass-rule; a rule of men over men, will cease to exist. Then there will be a management of things, a managemen of wealth and goods, then there will be a rule of the whole people over com modities serving to satisfy human things and the commodity creating organization of labor, while the present state is a government over and of men. Today, the capitalists are the arbitrary disposers of labor and wealth; through the state, however ,they rule men. In the future there will be no government over men, only a general management of things. That management may commit some mistakes-but cannot becom a government and oppress, because it will have no power over men. The individual will, of course, be dependent upon society, but only because he of she will use things belonging to society That the individual must use things produced collectively, was made sufficiently clear before. If we would enter into details, as for instance into the arrangements of railroads, the postoffice, schools, theaters, if we were to consider such needs as the education of children, caring for the sick in hos pitals, etc., then the mistake committed by the anarchists, consisting of their demand for an entire independence for the individual, would be more evident yet. We will, however, not enter into

motives of our not being anarchists. In short, the difference in principle lies in that, that the anarchists demand first of all, liberty and independence while we socialists want the well-being of all men, and that because it alon will insure happiness to the individual also. We see that the individual cannot live separate from all others, that to satisfy his wants, the individua must live in society, must work collectively, endeavor to subdue and utilizthe forces of nature, and therefore he must expect all the good from the so cial welfare, and see the guaranty for his own and his fellowmen's develop ment and happiness in the good arran

We have now explained the main diference between socialists and anarchists. Now it is proper to return to that, with which we started, namely to the factics of action. We have said that it is wrong to ascribe to socialists peaceable means of action only, and to the anarchist the desire to use vio ones, and we have shown how faulty that reasoning is. We fear however, that the leader may be led to the conclusion, that in this respec there is no difference between the socialists and the anarchists. In order to avoid such a misunderstanding, we must add a few words relating to th tactics of the socialists on the one side

We know that for the anarchists, the individual is the starting point of their reasoning. The anarchists demand the liberty of the individual not only from the future, but they demand it for to day, that is, for the time during which ing on. For this rea of organization, and instead of a united gle of each individual on his own as ount, and solitary revolts.

Now, we socialists understand well such solitary revolts and the struggles of individuals, when they involuntarily explode. We understand when an of-fended and wronged workman seeks satisfaction on his master, or when in some places workingmen, driven to ex-asperation, revolt, and revenge the indicted wrongs. We understand this well, because we know that there is a raging class struggle, which manifests itself at every step. In the war between the working class and the cap alists there is no truce. As a cons uence of the competition between hemselves, the capitalists are even ore endeavoring to oppress the work ig people, who on their part are force o answer with solltary explosions

the workingmen for the wasting of their strength in such minute revolts their strength in such minute revolts, because they see in them tokens of the raging class-war. The socialist cannot, however, consider these solitary revolts as a part of their tactics, which the workingmen ought io follow systematically. And they cannot do this, because the emancipation of the working class can only be accomplished by a common and united action of the whole city a fact which recommon them.

ialists put organization and soliditary ust end with emancipation and victory. But even after the final blow ck, the working class shall n and will not disorganize, but it shall ake the powers into its hand and introduce that social structure, which will insure to labor all the products it created.

Nor can the socialist agree with the anarchists upon the question of the struggle between the individual workingman with the individual capitalist The socialists do not see in such a struggle the solution of the social que tion, but personal vengeance only. That is why the socialists reject the tactics of the anarchists, which the struggle of the individual on his

Indeed, the oppression of the capitalists has grown so widespread; that every one of us struggles all his life for a bare living merely. But this struggle of solltary individuals does not at all improve the condition of the working The victory of the working class can be attained only then, when we will occeed in putting an end to the ru of the capitalist class, or in other words feated by the working class. Now, our reader will understand why the socialists of all countries constantly repeat that the only way leading to emancipation is the complete organization of the working class, is a united action of all the workers as a class demanding its right. In short, already during the struggle, socialism demands collective action, and demands it in the name of the interests of society, while the anarchists put even here the individual and his or her interests in the first place.

We are convinced, that every one of our readers, who has himself expernced the oppressive hand of the cap italists, will concede, that the only way out of the present confusion and ex ploitation is a social revolution; he will also acknowledge that only through organization can we reach a victorious solution of the struggle that is raging between labor and capital

PATRIOTISM NEW AND OLD

Modern and Ancient Meanings of the Word have Utterly Different Significance.

We all know what patriotism means nowadays. A gaing of thieves by fraud or otherwise lay hold of the powers of the state, and with that power in their hands proceed to start a quarrel with another people, barbaric or civilized, black or white, whom they consider sufficiently weak and defenceless to be i safe quarry, in order to enrich them selves and the class they represent by the plunder and enslavement of this people. But the commonplace citizen who has to pay the piper for the tune the governing ring have set, HE must on no account condemn their action or he shows himself lacking in "patriotism." On the contrary, like a true "patriot." he must cheer them on with "Old England for Ever," or with "Deutschiand uber alles," or "Vive la France et la Gloire," as the case may be. He must further rejoice in the suc cess of "his" country's arms and be duly desolated over their reverses, even though those "arms" are being used to perpetrate a crime against which his conscience revolts, and by which he not new painting machine arranted to do only derives no personal benefit, but stands positively to lose. He, should; if possible, accept loyally the assurance of the venal apologists for the governmental brigands that their policy is "necessary" to "his" country's interests, or if he be very wayward the utmost latitude that is allowed him is a formal protest, after having delivered which he must regard himself as identified with the said policy, once his beloved country has entered upon it, and rejoice and weep accordingly. This is patriotism as expounded in musichalls, churches and places where they sing, no less than in Fleet street and the haunts where they print largest circulations. To the reasonable, unpreludiced man it is, therefore, not difficult to see that to call a man a patriot now adays is a polite way of suggesting that he is either a knave or a fool. And, since the word has now definitely acquired this meaning, we cordially hand it over to the knaves and the fools who gull and are gulled with it. But it should also be pointed out that, like other words, the term patriot did Up to quite recently to be a patriot meant to be opposed to the monarch and governing classes of your country in the interests of the people of your country. The nearest approach to its current meaning was that of being zealous of defending the soil of your country against a foreign invader, just as the Boers are doing now. But the idea of its being the duty of the patriot to back the governing classes in squan dering the blood and money of the country in foreign raids for their own purposes under cover of the public weal s enough to make the "patriet" of the

> in his grave. The patriot of that time would have been on the side of the weak people defending themselves against the arms of what the modern "patriot" would call "his country" e., the hired or conscripted hordes of the governing classes of the state to which he belongs. The patriot (old style) was not the man to be humbugged by HIS governing classes into identifying patriotism with their self-interested crimes just because they happened to be using 'his country's blood and treasure to effect them. To show the complete change that has come over the conception of "patriotism" we have only to refer to English writers of the eighteenth century. For example, Gibbon, in writing to his field, under date February 21,

eighteenth or aineteenth century turn

says, "Charies Fox is commenced pat-riot, and is already attempting to pronounce the words country, liberty, cor ruption, etc.; with what of success tim will discover." It is a far cry from this patriotism, at its mildest, so jealously critical of the governing classes, to the again, when the old Tory anti-demo patriotism" as the "last resource of scoundrels" he most assuredly did not allude to "patriotism" in its presentallude to "patriotism" in its present-day sense, the patriotism which con-sists in shouting for one's government, good or bad, right or wrong. This sort of patriotism would have rejoiced his anti-democratic soul and made him think the good times had come when the "lower orders" had really begun to know their proper place as the boot-blacks of their "betters." Yet again, the "patriot" of the French Revolution thing but enthusiasm the extension Louis XVI. For him "patriotism" con sisted in opposing the powers that wer against the interests of the French peo-ple, and in so far as it took a militar; pie, and in so far as it took a military form at all, in the safeguarding of the republic, the bulwark of the democracy against the royalist invader seeking to re-establish the national dynasty of France. If he looked with pride on his foreign conquests it was only the pride of being the means of freeing other peoples from THEIR despots as he had freed himself from his. The mere success or failure of "his country"s arma," no matter in what cause, even in the cause of despots or of "accessored"

will probably start on full time patriotic emotions. In a word, his conthe 1st of June. In the mean time he ception of patriotism was democratic is engaged for half time.

The new "patriotism," otherwise called "jingoism," the patriotism that teer workers and canvassers for the and parasitic classes wish to plunder, Workers' Call and the location of fac- dates in its full fruition from the period of the struggle of the capitalist classes of the different European states over the division of the world market. It

had begun, of course, before, but this struggle of which modern imperialism is the political expression marks its zenith. "Patriotism" is the catchword by which imperialist brigandage seeks to buildoze the empty-headed and unthinking among the classes which have no personal or material interest in the owardly infamies perpetrated by it.

And now, in conclusion, a word of protest against any attempt to fevive the word "patriotism," or to refurbish learned. it for democratic purposes. Let us, as before said, leave it to the designing THE TYRANT IN OVERALLS rogues and begulled fools now in pos sion of it. In its old sense the word has had its day, It is a bad word, at A Study of Successful Trades Unionbest, of necessity carrying with it the suggestion of race exclusiveness, even though this may be kept in the background, while at its worst it implies a glorification of national infamy. Social-Democrats want no "true patriotism." whatever that may mean. They want to do away with patriotism altogether and substitute in its place the "Internationalism" proletariat .- E. Annual Crep of Intellectuals to Com-plets Their Education in the World of Competition.

Twelve hundred and twenty-nine cung people will graduate from the ourteen high schools of the city during the third week in the coming month, ocording to the daily papers. A small percentage will enter the colleges to plete their education, as it is called, while the majority will get out into the world to get acquainted with the beau-ties of competition for the bare necessaries of life. These young people who have been educated at the expense or ociety, will find that their education like the skill of the mechanic and the nuscles of the laborer, is a commodity to be disposed of in the market, regu-lated by the cost of its production, and that if no buyer appears their lot will be the same as that of the uneducated laborer who is out of a job. The paper which gives the account of their prospective graduation also contains an-other article the perusal of which should impress them with a proper sense of the sort of world into which they will derly man in search of employment, and contains the following character-

The June crop of graduates will be ised in a similar manner when the business-man" gets through with them, as worn-out machines fit only for the scrap pile, and it may be remarked also that the condition described as "too old" doesn't imply a very lengthy period of time in these days of rushing business. A "man's best work," thanks to the intensification of labor, can be and is "expended" at a very rapid rate, and every succeeding batch of graduates tends to push its predeces speedily into the category of "too old." When these young people grasp this condition of affairs and understand its import for them, they will start in to omplete their course of study and finally graduate into the Socialist movement, where their education will help them to show others what they have

ism from a Capitalist Point of View.

The following article, reprinted from the American Contractor, is inserted for several reasons. In the first place it will show the real feelings of the capitalist class towards organized labor when the latter has by long and arduous struggles partially succeeded in limiting the intensity of exploitation. The insincerity of the professions of narmony between exploited and exploiter is also brought out distinctly. although at the same time the pretence that the capitalist is a capitalist prinipally for the benefit of the working class is religiously observed throughout the entire lament. Our readers will also notice several other remarkable admissions in the lines which we have capitalized, in one of which the capi-talist fear and hatred of majority rule is made particularly conspicuous, and two others which show that the average capitalist invariably claims the results of the labor of others as properly belonging to him. The entire article is well worthy of space from the fact that it is a complete confession that prosperity for the capitalist class is condiloned upon the possession of a multifude of stupid, wage slaves, who will, without serious resistance permit the exploitation of their labor-power to the utmost limit of physical endurance:

By the tyranny of her labor legislation and by the trade unions. Great Britain is under the bobnailed heet of the working man, who is relentlessly, fatuously crushing the life out of her. It is the legacy we have inherited from Mr. Gladstone, the man who betrayed his country to his ambition and his country that Great Britain is a classidden nation; that men with coronets on their brows stell around with horsewhips in their hands competing the people as the southern gentlemen were made to do in "Uncle Tom's Cabin."

As a matter of fact, the modern ty-

Cabin."
As a matter of fact, the modern tyran of Britain, possessed of more power than was ever feudal lord, wears overalls and moleskins/is grimy to the touch and utterly indifferent to the interests of HIS country and TO THE PROSPECTS OF HIS CHILDREN, AND HIS CHILDREN'S CHILDREN'S CHILDREN'S CHILDREN'S Creat Evitain is the paradise of dema-Great Britain is the paradise of dema-gogy, and under its baneful grasp is suffocating to death. No man today denies that the cause of Britain's de-cline is the workingman and the cow-ardly legislation that gave him the power to destroy his country and him-self.

Democratic as the United States the-

hedged another progress.

Seven years ago, a president of a conservative association. I entered a hall to hear Lord Selfsbury announce his policy for the coming election. Has stated his adhesion to a Socialist progress to that measure which has since gram, to that measure which has sinc become law, whereby, if an easthquak shatter a coal mine, the employer i liable for compensation to every in lured miner and to the relatives of a the killed—the man who had endure the greatest loss held responsible for a act of God! I left flish hall a man with out a party. As Biemarck had said the leader of the conservatives was bu "a lath painted to look like iron." The lath had bent and there was no one is stay the swift onrush of false economy of chaotic liberty, of ignorant mornie.

The old idea-of liberty—THE RIGHT
OF THE INDIVIDUAL TO THE
FULL PROCEEDS OF HIS INTELLIGENCE AND HIS SKILL—has yielded
GENCE AND HIS SKILL—has yielded

GENCE AND HIS SKILL—has yielde to a group of false shipboleths—'Ma jority is right." The greatest good is the greatest number, 'Count of heads and a 'Compulsory eight-hour day.'

Mr. Carnegie, whether he realize i or not, fied from Geeat Britain, not to excape a grasping and a grinding aris tokracy, but to avoid a jeehous tradutionism that FORBADE HIM THI FRUITS OF HIS OWN LABOR, that beaud him down to the average of hiless intelligent and less energetic fellows, that denied him his God-borrights as a man and accounted him hu one head among millions. For him hengiand there was no fortune accumulating, no Skibo Castle building, be cause his union had decreed that he must accept its hours of labor, its opportunities of savancement, its rate of pay."

homes and in their works. Those who have had experience of labor conditions on both sides of the Atlantic, without execution, ear they have known to GOOD TO COME TO WORKINGMEN FROM UNION BULLE. Friendly societies, building associations, savings banks and insurance quide shey understood and appreciate, but trade unicension as we understand it is Brittain, they dress and abnor. The inhibitory power of trade unionism on the emancipation of the workingman is even greater on the expansion of the employer. It explains the whole fatal capacity of initian admenty to meet the work's demands for materials.

for materials.

Some time age Sir Feward Vincent the ignorance of the middle ages, he age to the middle ages, he ages to the middle ages,

the Creat Eastern should go where good materials and prompt delivery were assured.

It was no lick of enterprise on the part of British manufacturess that made them loss those contracts, but the suicidal policy of the trade unions and the restrictive legislation for which they are reponsible. In the United States factories are developed to the extreme limit of demant. Mr. Carnetie began with a horrowed welve hundred sodiars. Today the business that has developed out of that small beginning is capitalized at \$1,00,000,000.

In his works, I am assured by the practical foremen, THERE IS NOT ONE POSITION TO FILL FOR WHICH THERE IS NOT ANOTHER MAN READY TRAINED. Their scope is capable of indefinite and immediate extension. In Great Britain such expansion is impossible. Trade union policy has decreed that only a limited number of apprentices shall be permitted to learn certain forms of skilled abor. At Hemestead, everywhere around Pittsburg, rough ishorers are encouraged to familiarize themselves in their own time with the skilled work of the inskilled laborer to the position of the skilled aparative for which they have qualified. Both employer and emplays are benedited union of the skilled aparative for which they have qualified. Both employer and emplays are benedited union of the skilled aparative for which they have qualified. Both employer and emplays are benedited union of the skilled aparative for which they have qualified. Both employer and emplays are benedited union of the skilled aparative for which they have qualified. Both employer and emplays are benedited union of the skilled mensure of the position of the skilled aparative for which they have qualified. Both employer and emplayed by the firm, to be trained in the art of throwing on the potter's wheel. The union ordered a general strike and for three months the works were idle, contracts were broken, and the mon were earning nothing—all to prevent the EMPLOYER ASSISTING THE MEN TO IMPROYE THEIR CONDITION and to prohibit his maintaining the factory abre

Comment upon the above Jeremiad is hardly necessary, although the attion of the American trades unionist y with propriety le called to the mer in which the British capitalists play their diagust and chagrin over limited measure of success attainer their British fellow workmen. As the condition of the latter is as a whole better than that of the workers here, when everything is taken into in themind of every intelligent trades unruanizations under the capitalist mod: of production, by demonstrating, as it does the truth that while the success
of these organizations may finite fits of the ruling class, it can hardly be said to do more than secure a bare existence for the workers.

ny during the recent atreet car strike:

The Twenty-third Regiment has a long and uneavory record. It is largely composed of the sons of the aristocrats of Brooklyn and New York, and is always eager for service which involves little or no danger-especially against atribers.

In 1811 the reciment did good service to the capitalists at Hornelayille.

In 1821 it fixed on the striking switchmen at Bottalo.

SPECIAL OFFER

INTERNATIONAL SOCIALIST REVIEW

Several months ago we tried the experiment of offering the INTERNAS TIONAL SOCIALIST REVIEW three months to eight new names for a dollar. We kept the offer open Lut a short time, for the amount of labor involved in handling the short-time subscriptions is so great that it meant a certain loss to us if we did not keep a large portion of the subscribers. We have justinished checking up our list and we are pleased and encouraged to find that over

three-fourths of these trial subscribers have renewed for a year. We therefore make this new offer, the most liberal offer yet made on any high-class socialist magazine: For one dollar we will send the International Socialist Review three months to different addresses in the United States of Canada, but outside the city of Chicago, and to additional names sent at the same time for ten cents each. Observe that the offer applies to New Subscribers only, and that each copy must go to different names; our price for ten copies three months to one address is not \$1.00 but \$2.10. Six cents must be added for postage on every Chicago address. If you cannot send so many as ten trial subscriptions, we will accept smaller number at fifteen cents each, but with a very little trouble you will find ten people who will thank you for the chance

of getting thirty cents worth of the best reading matter for ten cents. We do

not send sample copies free, but will send you two sample copies postpaid for ten cents. Fill out the blank below and return it with \$1.00 to

So I went back and and which inevitably brings on con waited half an hour, then when I started, I walked along with some of the girls who work there, and questioned em, after they questioned me first. They asked my name and if I was going to work in the factory. I asked them how much they got. They said "14 cents a cut." I asked how long it took to make a "cut," and they said roar and dust behind me, and walked "sometimes it takes more'n a day." I back to my hotel and breathed the, went in with them to the weaving fresh air full of perfumes of wild flow-room, two-thirds of which was taken ers. and noticed the clouds over the up with machines arranged in rooms green hills, and the hazy blue of the 18x20. The factory is new, everything distant mountains, I felt as/if I had into the great windows which had curtains of the white cloth woven in the The machinery had not yet started up and the girls quietly took their places at the machines, laughing and chatting as they passed each other. Each girl cares for four machines. The foreman comes around to take the names of new applicants for work, and while he was doing it the machinery started up and the place that had been a bright and output and the place that had been as height and output and the place that had been as height and output and the place that had been as height and output and the place that had been as height and output and the place that had been as height and output and the place that had been as height and output and the place that had been as height and output and the place that had been and the place that had been as the place that had been as the place that the place that had been as the place that the place that the place that had been as the place that the place that had been as the place that the place that the place that had been as the place that the place that had been as the place that the place that the place that had been as the place that t so bright and quiet and cheerful turned into a pandemonium. The noise was deafening. In order to make anybody hear you had to put your mouth close to his ear and shout at the top of your lungs. The foreman came and asked if I wanted work. I said no, I wanted to go through the factory, and asked him where the process began. He said up stairs. So I went up and began at the eginning. The big bales of cotton are first pulled open and the cotton put into the shredder which separates the waste from the good cotton and twines the latter out on huge spools in the form call cotton batting. Two men were at work here, one for each shredder, talked with them, and aske questions freely. People tan and ask factory and go where they like and ask

stions of the hands if they want to. I next went to the machines where tapse big spools are inserted and the cotten is spun off into big soft ropes; these are spun again and again at dif-ferent machines until the fine thread used for the cloth is made. Young mer and boys work at the machines where the smaller spindles are used, and finalspindles are used, and finally children from eight to twelve work at the smallest spindles. That law shows that some of us know for that purpose.

Do you believe that Mr. Pish is telling us the truth when he says that "the legal logical result" (of that law), "WAS FIRST FOR THE LARGER LINES TO GRADUALLY BUY UP THE SMALL LINES." Remember that he says "the law made it impossible for the small lines to be a line of the small lines to be a line of the small lines to be a line of the small lines. lines to live." Buying them up "gradually" means waiting, until their owners were begging to be bought out and were willing to take what they could get. Do you believe Mr. Fish is telling us

Who had that law passed?

We believe Mr. Fish. What he has told us deserves the most careful study. On motion of comrade Smith the Division to seven agitation weigh well his statement that "the big shipper is constantly trying to induce the railroads to break the law" and that "with territorial combination it will be possible to maintain the rates absolutely." (Another way of saying Third District, 8th, 19th and 19th Wards, and that that the railroads under those condithat the railroads, under those condi- Fourth District, 11th, 12th and that tions, would not break the law.)

What has all of this to do with storeeping. If combination is the foundation principle of our National Govern-ment, and it is. If the principle is being applied logically and scientifically to many of our problems of production, is it not absolutely certain that sooner or later the principle must become universailly operative and so include all of our industrial and social relations.

the press at once explains as "snob-bishness." But there is no hint given that this opposition is merely the echo of a historical class struggle, the antagonism between faudal aristocracy and modern capitalism.

In the United States the capitalist is naturally looked upon as the center from which all blessings flow. He is the philanthropist, the endower of colleges and universities, the endower of colleges and universities, the founder of libraries, hospitals, technical schools, churches and "charities," etc., for the very good reason that under present conditions he alone is able to pose as such; and when he discorges several (Continued on pass 4)

The new mode of production s out of harmony with the political ideas generated by an older method and its advocates must as a matter of ocessity seek the attainment of the powers of State, which yet remain in the control of the upholders of the traditional policies of the past. The struggle therefore takes a political form, the advocates of modern capitalist exploitation declaring their object to be the "Reorganization of the Demo cratic Party," while their opponents accuse them of being merely Repub Heans. The victory of the "reorganizars" will

There is little doubt but that the in thought if it was to survive at all, bur terests represented by McLaurin will ultimately triumph. This struggle is of much interest to Socialists, not for the sake of the two political puppets, who are pictured as the most prominent figures in it, but for the reason that it illustrates a truth which Socialists have long recognized. viz: that economic and political supremacy are inseparable.

THE CONTROL OF THE PACIFIC.

To the average "man in the street the recent clash of railroad interest in Wall Street seemed a conflict of giants, but to the great capitalists actually engaged it was nothing more than precedes the real struggle, a fact which Mr. James J. Hill of the Great Northern clearly perceives. The question of traf fic control is not limited by the action of any section city of single railroad it is rather a world-wide struggle for the diversion of the trade of Asiatic countries from Europe to the American continent. In order that this object road transportation of this country is a prime necessity.

It is not to be supposed, however, that the accomplishment of this task will be an easy matter, yet Mr. Hill is logical enough, to perceive that the attempt must be made. Basing his estimates upon the growth of the population since the Civil war, he foresees a possible 150,000,000 in thirty years hence, which must be provided for. Not one-third of the number can be used in manufactures, railroading, trade and the professions. The other 100,000,000 must go back to the land and raise the staples of traffic, food, fuel and shelter, the surplus of which must be exchanged with the inhabitants of Asia, It is necessary to divert the entire traffic of the Pacific from the Suez Canal and Cape Horn direct to the United States, but hull'. Sir Thomas might with if this program is to be carried out and the 100,000,000 agriculturists duly pro-

vided for. This is what James J. Hill sees in the future. But what he does not see is that the same necessity is imposed equally upon every great capitalist community in Europe, which has a surplupopulation to provide for. The markets of Asia are equally indispensable to their existence while the capitalist mode of production still persists. If it were markets, by such control of traffic as

apitalism in Europe ble. If on the other hand it is not pos this to do so the end of capitalis enduction is at once visible to the Un ted States. And in either case Social sm stands out distinctly as the ultim ate goal on each continent.

But the attempt must nevertheless h nade, even if the outcome everthrow civilization in its struggle for the work market to prepare the forces for its any one competitor in this industria warfare can only be obtained at the expense of the others, and in the latte case where it is clearly demonstrated that the capitalist mode of productio cannot provide the masses, with the necessaries of physical life, the alter native at once becomes plain.

With true capitalist instinct Mr. Hill points out the task which confronts the upholders of the present economic sys tem, of production, the task of feeding the millions of propertiless human be ings, which constitutes the obverse side of capitalist concentration of wealth Forbidden now to produce unless a market can be found for the disposal of their labor product, he foresees the necessity of preserving and extending this market, if the robber system is to continue. Falling this the end become apparent. The struggle for the control of the world market will resolve itself into a struggle for the ownership of the means of production, upon the part of the millions of wage slaves whom the capitalist class can no longer profitably exploit, and the system of private own. erahin of the means of production debars from using their labor power to satisfy their physical necessities.

The Chicago School of Social Econmy now has branch classes in Ogden. Cleveland, O., New Castle, Pa., Pitts-burg, Pa., Port Chester, N. Y., and many other places are taking steps toward an early beginning.

The answer is that all factory laws all courts for the collection of debts the enforcing of contracts and the punishment of crimes against property, are industry alone. In fact the very organi gation of society itself is a refusal to let alone the things which concern the whole body of the people. Society does interfere. It ought not to do so in behalf of those who by force, have monopolized the resources and forces of nature and plead a let-alone policy those who have been dispossessed. If it is to interfere in behalf of all, then

The political economist assumes that here is no possible provision for workingmen beyond the smallest wages for which the workers will consent to work in numbers large enough to do the work

The answer is that this is true under expitation, but under socialism there will be no such iron law of wages. Under socialism the total of the largest oduct which the workers produce will be the smallest reward for the orkers themselves, for under socialm, those who are workers will no nger be compelled "to divide up" with those who are idlers.

The argument for the origin of capital, establishes beyond question the false-ness and absurdity of the claim that it was the result of thrift and saving.

Mr. E. Foman's Work.

In discussing the topic of Woman's work with Women for Socialism, Mrs. Forberg said that women were more conservative than men, they stuck to old ideas longer than men and in presenting Socialism to them it is nec attacking the old ideas, but instead by presenting new ones. She spoke particularly of two classes of those who are self supporting women and were personally feeling the sam pressure of economic conditions as were the men. She insisted that the self supporting woman should be approachworking men, but that women were than are men, and that the interest of a house wife would be more easily secured by an appeal to the general good than by any personal economic consideration. She said that women wer more moved by their feelings and the through interest in their own children of the time and attention of their own security married women may feel for hemselves they are never able to throw off their anxiety for the future of their children, nor get away from their longlarger share in their home life. She ould present to women in these parti-ulars would be making the very best eginning with the average woman.

The Stocking Argument.

In the general discussion comrade Kerwin asked for a specific statement of just what socialism would accomplish that a company of young women said ism had no advantages for women, that they would be left at home to darn the stockings just the same. And he replied "That is not so. Now you stay at home to darn the stockings, you make a pos life of it and you have poor stockings Under socialism you will feed the old stocking into a machine and in a few rood one too. You will be saved from women's life." And the girls said: "I never thought it", and with a laugh

leclared they were socialists. School Teachers and Socialism Comrade Lowrie said the more help less and dependent the workingman is, the more difficult it is to make him a Now the very manner of woman's life in the family makes he from an economic standpoint exceed-ingly helpless and altogether dependis not true that self supporting are at all behind in their interest in this question. For instance, the school teachers in Chicago probably have a larger number of women among then who believe in socialism than any like

Take Turns with your Wife. Comrade Taft urged that socialist ould take turns with their wives in attending the public meetings and in eally socialists the fullest opportunity m. Comrade Fellner suggested that ward clubs arrange that in case married people were both members the rate of dues be figured at one-half rate

Mrs. Forberg, in closing the discus ion, objected to the suggestion of comrade Feliner on the ground that instead of helping matters his auggestion simply emphasized women's dependence that it was only another way of saying we would make things say for a wom-an if she would be what her husband was, instead 'of appealing directly to herself as a complete individual.

Dowle as a "Business" Man

Some of the suggestions for ex inguishing John Alexander Dowle are to say the least, rather curious. Here i one from a correspondent of the Chicage American, which goes to show above everything else the extreme simplicity of the writer. We quote in part: Would it not be beneficial to the exvictions and would-be followers of the "doctor" to reasonably impress the fact upon their minds that Mr. Dowie is a SHREWD BUSINESS-MAN? His ambition is to spread ignorance, for without such his success is impossible, He calls the stupid belief in his "power" faith. He thinks hard dollars and cents; writes false pretense; aspires to the accumulation of vast wealth and power. His commercial instinct does not stop where misery and death appear. He is a man with the center of acquisitiveness highly developed. age American, which goes to show

It is not very likel; that the pres adopting such a suggestion as this for a starting point. The artiess and unconscious manner in which the methods of the "shrewd business-man" are consected with hypocrisy, cunning and general scoundrelism is not likely to find favor with the gentlemen of the capitalist press, who though anxious enough to down the "general overseer" will hardly press such a charge as this against him. While in a general way any stick is good enough to beat a do ods of John Alexander are those of the such to expect that the capitalist pres nature of business "ethics," though he fails to see the inference that logically follows. Socialists have persistently pointed out the same thing for years, though few have seemed to grasp the idea they tried to convey. Dowie is a "shrewd business-man," and his type will continue as long as capitalism exdisappearance.

First Vote in Asheville, N. C.

—Ashville, N. C., May N. 1901.

Editor Workers' Call:—
Dear Comrade:—I have at last time to report the Socialist vote in Asheville.

N. C., which took place on the 6th of May. On the 17th of February we formed a Socialist club here, and began a propaganda to election day. For six weeks I edited a part of a labor union paper, and in various ways we kept socialism before the people. The result was that we got an average of 32 votes. To one who knows the deep ignorance and conservatism of these people this vote can not but be gratifying. This is the first time that a Socialism teket was ever put in the field in this state, and our people had only heard of socialism as some terrible bugaltoot be avoided at all hazards. Another goed thing about the election was the fact that ever 500 voters staid away from the polis.

Socialism and the Professions.

By G. S.

Those engaged in professional pur-uits may boast of their distinctions of culture and refinement along social, educational and various aesthetical lines; may flout these superior acquire-ments in the faces of their less fortuthe hand workers. They may consider themselves on a higher plane eral from that of the "common rabble," and if ever disdaining to look at all upon those "beneath" them, it may be with a mien of great condescension, and us a mark of great favor to those receiving such "unearned," "distinguished" attention.

They may ape the veneerings of the "social lights" of the metropolis, and even vainly flatter themselves with the delusion that they wield a controlling influence over the "upper" (moneyed) classes—an influence which will enable them to enter as co-partners, into the ranks of the aforesaid "upper" classes 1, e., exploiters of labor-with financial well as social standing, (when in fact they are jooked upon only as value els for retaining and furthering capitalistic interests); se they offer in support of their "amhitious" designs, (us yet unattained) is their so-called superior qualifications over those of the hand worker class; as though might of intellect justified their lofty aspirations for power.

They may even believe themselve ed with the inalienable rights of life, liberty and the pursuit of happi-

These and many other delusions may they foster, but the fact remains the same in spite of their fund and exalted notions—they are as much slaves to the present economic conditions as their brothers, the hand workers, are,

And their position is to be even more the hand laborers, for they are bound to their conditions, not only by the ins of present society organization. (the inheritance of which is no fault of those born to it), but they are bound by the more deprecable fetters of a blindness to their true position, much more wilful than that of their fellow worke & the hand-tollers; more wilful, beconsequent entarged shillties for inquiring more intelligently into cause and effect-a blindness, therefore, seemingly due largely to an indomitable pride—the pride of a selfassumed superior position of brain work over hand work.

While those bound merely by the ties of our present social order (or disorder, rather), are not responsible, as was said, for the conditions under which they begin life's struggle, (it being but the influence of environment which all are affected by, and above which, few can rise), there is little if any exonera-tion for those who are bound by any additional chains of their own forging

And aithough the majority of hand workers also, it seems, are bound largely by blindness, to existing conditions, their blindness is more the result of limited opportunities for study and investigation, (due to their environment), than it is debtor to pride of poon-for God knows they haven't ciety's present arrangement; but in the superior opportunities for intelliment inquiry), no such excuse as ignorshould be acceptable, for have all in the realms of science back ite conclusions, if they will but apply their knowledge. Yet it seems that this very pride of position—one form of wil-ful blindness—among the professional workers, holds them bound to their conditions by keeping them ignorant of the great fundamental truths by which might, if they would, allow them-

ugh ignorance may, as we have ride which in its turn is closely allied to, if not actually one of the forms in which prejudice exhibits itself, not all of ignorance by any means, can be so nted for, and is therefore not due sarily to wilful blindness; but ignorance as is displayed by those inexcusable, is never the result of any thing but the wilful blindness of pride

so while man's blindness to his condiwante man a bilindness to his condi-se may be due principally either to rance, the result of the misfortune infavorable environment, or to ig-ince, the result of prejudice in some form, we seem forced to the conclusion that the blindness of the intellectuals a due more to the latter mentioned susse, than to the first.

And just as long as they of intellectuals at later mentioned susse, they are the first.

And just as long as they of intellectual attainments refuse, through any cause, to acknowledge that the problem of the manual laborer is their problem also, so long will the movement of socialism be retarded in proportion to the degree of influence which they as individuals and as a class may be able to exert. In other words, their non-acceptance of these facts of relation to the hand working body: i.e. their lack ceptance of these facts of relation to the hand working body: I. e., their jack of class-consciousness, is one of the greatest obstructions which the cause that would most benefit them, (if they

The reason why the converse theorem cannot be carried out to a logical "Quod erat demonstrandum," lies in the fact that the "dues" are always and at all times, the product and rightful claim therefore the original proposition and its converse do not bear reciprocal relationts. So in order to reach a condusion that does admit of proof, and at the same time illustrate the point at when workingmen fall out capitalists get all their (the workingmen's) dues."

of but one class, (the workers), and ssue, we will be forced to state the nearest approach to a converse, thus: We notice, that in either case, the capitalist is not a loser, for he has nothing of his own (own production) to lose, and the only difference to the workers in the force of these two profositions, lies in the degree of their loss (for they HAVE produced something to

The capitalist, however, is not satis-

fied with "losing" even a part of the producers' dues to the benefit of the worker, but thirsts to gather it all to examples, any more, in proof of the statement, "when capitalists fall out. workingmen get a part of their (own) dues," for said capitalists have long since discovered the folly of "falling among themselves, as witnessed by the widespread movement of gigantic combinations of capital, or it they do seem to wrangle now and then, sign. In his place was appointed the it is only to keep up appearances on the divine right of competition and its value as the life of trade. But they now turn their increased wisdom on such matters, much further to their own account, by stimulating "falling's out" among the workers. In so doing, they men than do the "just" people in the old saying, who haven't "business ability" enough to try stirring up dissentions among the "robbers," in order to recover their own; but stand supinely by, and patiently wait until the aford "robbers" HAPPEN to fall out. The "just" people, would at least be justified in stirring up rebellion among the "robbers," in order to secure 2. "readjustment," but what vindication attends the efforts of those producing strifes that will enable them to rake in an increased amount of thet which is not theirs (by production) in any, sense. Truly our capitalist brethren are gifted with an interminable amount of gall and secret cunning. (call it "bus-iness ability." if you will, but refrain

from any stronger, though probably more truthful appellation). So much for class-consciousness and its inestimable value. May we study the lessons compiled for us by our capitalist fleecers, and apply them to our own advantage. Nothing so despicable but serves us as a school for future actions, if we will heed its teachings.

We might well further inquire the various motives and influences that serve to hinder the progress of reform, especially as applying to the subject

There may be wide differences of opinion in the minds of men as to the auses of such resistance, and it would undoubtedly be presumptuous for anyne to assume to know all the causes of society, for such will be developed only as time goes on and man profits by his knowledge and experience; but we may promulgate what we believe— with our present stock of knowledge he help of what we are thus able to deduce, others will be enabled (with the weight of added resources), to make further deductions which will ditimate. y lead to a consciousness of the whole

We have already mentioned two facors, (ignorance, the result of limited opportunities, and ignorance the result of some form of prejudice), that seem to operate the most actively in keeping men from seeing the truth, and it now remains to examine whether a mere to allow its unrestricted development— that is, if to blindness (either wilful or unintentional), can be ascribed all the woes of mankind. It is certainly m woes of mankind. It is certainly most essential as a prerequisite to any form of progress, that the truth regarding old forms and methods be known, so that application of the principles govruths, removes all the barriers to pro-

ON FREEDOM

Remarkable Essay by a Pupil of the Englewood High School.

[As an illustration of the manner in which socialism is being grasped by the younger generation, we reprint the following address delivered by Miss Gerttude Cohn, in the Auditorium of the Y. M. C. A., on Wednesday, 22nd May, where Miss Cohn represented Englewood in the oratorical contest between

At the beginning of man's history, the for his physical wants. Moreover, at that time, fear influenced the conduct of men-fear of each other, fear of the wild beasts in the forests wherein they dwelt, fear of nature in her tempests and whirlwinds, fear of the mysterious and unknown, fear of the issues of tonorrow. Therefore it was impossible for man at the beginning to be free, for as long as fear exists the highest in man can not develop, Fear of whatever kind is always opposed to freedom. And then ignorance was a barrier, too, for man had not mastered the forces of nature, and until the physical material world became subservient to the wants of man, there could not be freedom for

the pursuit of the highest. But as the wheel of time rolled on the absolute dependence upon nature became less with the gradual enlight-enment of the ages. Almost all obsta-cles to material advancement have been overcome, till, at present, we can do well nigh everything but ny. sea is no longer a barrier, nor mount ains, nor deserts, nor forests. Now let me go back again to the ankind. As men grew ess dependent upon nature, they be came more dependent upon each other. Items and followers toward a decayed when they lived in vast jungles, like wild animals, each dug a cave for himself, and each depended on his individual labor for all that he gained. At that time it do not know what socialism will be a and co-operation commenced. Life began on a broader scale and man united with man to meet common foes, resist common evils, and supply more easily and more satisfactorily common wants. Great machines were ingeniously constructed to manufacture a large amount of one article. So, instead of

of each man is bound up with the lives of his fellow men.

We all recognize the importance of labor, for what could be accomplished without it? But in order to work we must have material and toda. Raw material is furnished us by nature, and

the earth. Now the tools today, as for example, factories, stock-yard plants, railroads, and so forth, belong to private monopolies; and also natural resources-as for instance, mines, wells, land, and so on-belong to a few individuals. Therefore, since man cannot own for himself these means of producing the necessities of life, he must apply to their owners and accept whatever conditions these owners offer him. Hence our system of wages.

This is clearly a system of dependence on the part of all wage workers. For you must see the difference be tween the time when each man owned his few simple tools and enjoyed for eldest son with a house carrying a \$25,000 himself the entire product of his labor mortgage. To lift this mortgage will and the present time, when the workers be the first task by which the young do not own the tools they operate and man will prove his "business ability". do not receive all that they produce. gian friend. CHURCHES' VS. SOCIALISM

Capitalism and Modern Religion Bot Stand in Hostile Attitude Towards Scientific Socialism.

The church as an organized body is hostile towards socialism because it is a strong competitor, and the church will harbor no rival with a social repair

There are some very clever Christian the beautiful, the noble, and the true, and their leaders condemn the new and yet how many have ever wondered grandly improved brand of righteousness. It is easier to change the sysethical system, moral codes and cus-toms. Hence the attitude of Socialis was possible for men to live quite inde-thousand years hence. We do know this pendently of one another; but later, as much that the early Christians suffered man multiplied, individual life ceased great annoyances at the hands of the upper classes even as we suffer. In spite of the most agonizing persecution they carried their message to the poorer lasses without purse or price. Refined. have ye but ye see not beyond the light of your own social circle. Ears have ye amount of one article. So, instead of each man at the present day making his own clothes, digging his own coat, raising his own vegetables, and so forth—each person engages in but one kind of labor, while he receives the benefits of a hundred or more different kinds, Now it is clearly impossible for anyone today to do the various kinds of work necessary to supply the wants of even a very simple life. Hence the life of each man is bound up with the lives of his fellow men.

Not a mother's son of them receives a salary, but if they were in trusty manager Schwab's shoes they could not be more diligent. Christ's last words to his disciples were to feed the sheep, and we are doing it though not necessarily his disciples. Perhaps the false disciples are snugly ensconced churchmen and the genuine are Socialists who despise pomp and ceremony while a life is snuffed out at every syllable uttered in the Bay State pulpits. Knowing these things how can any laboring man or Socialist attend with patience to the divine services of scious point of view not a word is to be heard indicating a desire to improve upon the conditions which induce poverty among the masses. LOCAL NEWS AND NOTES.

The regular meeting of the 17th Ward branch was on Friday. May 24th, at Aurora Hall. The number of members in attendance was not large, but the enthusiasm manifested made up for the absent ones. Comrader Albert J. Fox, and Dr. Gluck were accepted as members. After the regular business of the branch was transacted Comrade Ballard mades a short but interesting address, relating his experience in the southern states from which he has just returned, and where he made active propaganda for socialism. Comrade Dr. Gluck then teok the floor and gave an address upon socialism. Comrade Dr. Gluck then teok the floor and gave an address upon socialism which was listened to very attentively. The branch considers that the new comrade will be able to do good work for the Socialism movement in the district.

A Socialist comrade who has been to read to make as much money as possible out very active in the cause sends us two fournals printed in English at Manila, Philippine islands, where he at present holds a government position. They are called the "Manila Times" and the "New Anerican," respectively, and both give evidence of the "strenuous life" which has invaded the islands in conjunction with American capitalism. One of them gives an account of the shooting of four Filipino boys by an American negro teamster, who is to be tried for murder. The boys were all between 8 and 12 years of age. One was killed instantly and the other three severely wounded. The accused will plead "self-defence."

any other supposition than "snobbish-ness," which is an explanation that an't explain. Let us see if the mat-can be slucidated from the stand-mt of scientific speialism.

In the first place it will be observed at these three individuals (who are only used as representing a class which ities, and if their Greco'd" is inves-igated it will be found that these titles were in existence before the discovery c. America, and futher inquiry will show that these titles in every case were the distinguishing marks of a great landed proprietor. At one time iders of these titles (and lands) led a similar position in Scottish society that Carnegie and Rockefeller apy today in the United States. They ere looked upon as "God's stewards" re in their time the centres from which all the philanthropy and charity of those times emanated. It was mostly to the bounty of their class that the civersities, churches, schools, simsthat day owed their existence and generosity in these directions of the same praise at that time at the Carnegie and Rockefeller class now receive for similar "services" in the United States, An "Ironmonger" in those days was a rather insignific ant person, who lived under the protec-tion of these landed proprietors and was properly respectful in all his rivial dealings with them. The idea that an ironmonger could ever pretend ert equalify with them never entered their minds-or the ironmongers either for that matter. They owned the predominant means of production in those days, i. e., the land, while the monger owned merely the few paltry tools of his craft, and an insigant stock of crude commodities in But times have changed and the iron-

enger of the middle ages developed into the great trust magnate of today. The rude tools of iron handicraft have evolved into the great rollingmills, blast furnaces, machine shops, and foundries of today where scores of thousands of men are employed in turning out millions of tons of iron and steel products. And the economic desiant of the despised ironmonger of the middle ages owns it all, and has utterly displaced in economic and pol-litical importance the linear descendant of the titled land proprietor who in palmiest days never controlled the twentieth part of the wealth which

Taking these things into account it can be readily seen that the opposition to the acceptance of Carnegie's gift arises not from "anoblishness" or a reluctance to acquire somthing at the expense of others, but from the fact that these people look upon Carnegle as a usurper of functions which they ill think properly belong to them. H ents a class that has supplanted class that has relegated theirs into a dary position, by displacing them as ruling class, and their objections are merely an echo of the old antagism between landed proprietor and odern capitalist, one of the historical of class struggles which have en the main factors in economic

Let the "heir" of the Duke of Hamilton for instance (supposing him to be unmar-ried) cross the Atlantic in search of a wealthy bride, and he would find no lack of capitalists quite willing to seek a family alliance with "anobs" like self. The rising capitalist manufac-er was always considered as an upstart, a parvenu, a snob, by the titled cristocracy of Europe, who for over a ndred years have indulged in well bred sneers at the vulgarity, insolence and pride of the commercial exploiters. the were displacing them as ruling class, and judging from the efforts made by the latter to conceal their vulgar st by imitating to the best of their ibility the feudal aristocracy, it is not lifficult to see that the capitalist class of the sense of social inferiority with

It is needless to say that . Carnegie's gift is not likely to be rejected, those who would do so on the above grounds not having sufficient power to determine that question, as capitalism prepond-crates also in Scotland at the present day. WITHE SILVER CROSS The Carpenter of Nazareth

The piain but thrilling story told in a masterly manner by the great French anthor, gets held of the reader as soon as he starts to read it. Stripped of the Church gard, Jesus appears before us the type of the carriest, honest radical leader of the people, a figure which interey has reproduced with slight variations in every crucial period in the progress of much indee when the old order of things had reached its climar and was about to give say to these was aside from being a story of most absorbing interest, with dramatic incidently second to none, the book, gives that noble character to the teachings of the carpenter of Nazardan which most of our generation—whether Christians, Jesus or freetinkers—have failed to perceive through the mass of Church stepen which attaches to the story of Jesus.

As a picture of society and the social choses of that spech with the class struggle raging within it, this atory will throw a strong light outour own conditions of to-day.

TO APPLY WHIP AND SPUR From the present appearance of things it seems probable that the British canitalist manufacturers will shortly attempt to intensify as far as possible the labor of their wage slaves, who are now held responsible for the loss of ommercial supremacy formerly enloved by their exploiters. Before that labor organizations of Great Britain were thoroughly "respectable" and were in consequence not only tolerated but "patronized" principally by aristocratic, official, and cierical parasites who indirectly prospered upon their labor Now, however, when the wage slaves of other countries have beech a cheaper and more productive, the labor organizations of England have lost their recpectability and are denounced by their former "patrons" as being "unecrupulous, tyrannical and dishonest,

It would seem that the so-called "torch of civilization" may yet terial progress of certain peoples. The following description of an event which happened last week in Florida would seem to justify this statement:

To Expedite Committee Work. Editor Workers' Call :-

Editor Workers' Call:—

Many years ago Dickens wrote his cutting satire on governmental departments and pointed out that their main business was to find out "how not to do it." He never had had the opportunity of watching the machinery of the Socialist party of Chicago or he would have found miles of red tape and superfluous' machinery to an extent that would make government departments look like lightoning artists. At the last meeting of the General Committee over three quarters of an hour was spent in listening to the reports of the "Executive Committee". As there were about sixty delegates present, to say nothing of some party members who really had some business to transact and did not care to attend a dry vaudeville show, it is therefore evident that the reading of these minutes took up time equivalent to a weeks work of one person. Under these conditions I would suggest that it would be very much cheaper to hire a stenographer and typewriter for one day each week and send each delegate a verbatim copy of every detail of the interesting proceedings of the aforesald committee. Indeed it could be embassed in colors at less expense than the passent method entails.

Another thing that absorbed hearly fifteen minutes of time was the reading of the list of new members. Now this is an exceedingly gratifying circumstance and yet such reading did not do one half the good as a matter of propagands as would the publication of the totals in the Call while so far as conveying any information to the General Committee was concerned, they

propagands as would the publication of the totals in the Call while so far as conveying any information to the General Committee was concerned, they might as well have been so many names taken at random from the city directory. All such applications for membership should be acted upon by the Executive Committee who will have time to read each name individually and to discuss any question that may arise. There on the approviso that in case objection was raised to any name that this name be submitted to the General Committee but to dump a whole batch of such names without comment, compets the delegates to the General Committee to act in absolute ignorance of the subjects on which they are voting.

There are always enough subjects of importance to be discussed at the General Committee meeting to take up all the time at its disposal, but as things now are, all the time is taken in unwinding red tape and the really important matters are rushed through at the end without discussion. These-facts are of more importance than might be thought at first glance. Our whole machinery of action is being paralyzed, our propaganda will be ultimately inspired and the cause of socialism suffer if his ridiculous farce is not stopped. It can easily be stopped of the suggestions here given are followed and I believe that if the commades once realize now necessary such action is it with be taken without delay.

Editor Workers' Call:-

After having had an experience of thirty-six years in the Republican and Democratic parties, my eyes have at last been opened to the only real thing which will help workingmen politically

I know a let of sickly wives and little children that have been compelled to aleep in the open air many a night in the South West on account of having no law-to protect them, and some of thein have been even forbidden to procure water from the wells these tyrants have sunk with the money produced by the same Union miners, and yet most of us vote that this sort of thing shall continue by putting the old parties in power year after year, to debar us from obtaining the common necessities of life.

Let us wake up and put on our fighting clothes. Let us get out in the campaign and epread the gospel of Socialism everywhere so that the wage slaves may be fifted to a higher plane, by putting the workingmen in possession of the government and thereby securing to them all that their labor produces man can call himself a patriot that votes against Socialism and freedom.

As long as classes exist among the workers, it is a sign that prejuudice; in some form is exerting its baneful influence, and raising aspirations of pride which tend to deceive those who foster such pernicious ideas, as to their true position in the existing social order. Once overcome prejudice and we are toady for the next step, which is an exposition of the false way; to be followed by the presentation of the bet-

Ignorance, pure and simple, I. e., not the result of prejudice, is believed by some to exert an all-powerful influence

in retarding progress.

When considered in a certain light, it WOULD appear that ignorance is the sole cause of a restricted progress; for if ignorance were fully done away with, and perfect enlightenment were to take its place, it seems almost impossible uppese that man would cling to useless and antiquated methods, when knowing those methods which would most benefit himself as well as human ity as a unit, (for that which truly benefits the individual must at the same time act with equal force upon a ciety of individuals; nor is this philosophy exclusively modern, for we can go back to the second century for a imilar expression in the words of the Romen emperor, Marcus Aurelius: "that which is not for the interest of the whole swarm, is not for the interest of the single bee,"—which, by rhetorical transposition, becomes, (with-out altering its significance), "that which is not for the interest-true interest-of the individual, is not for the interest of the body of 'individuals. Both statements are plain axioms.)

Yet it seems that true interest is too frequently sacrificed to apparent interest, for reasons hard to understand at first sight, but which we may endeavor to fathem further on.

So while ignorance (due to whatever cause it may be), is, with prejudice, a most vital first factor concerned in staying progress of any kind, yet it cannot be made the scapegoat to carry off all the criticism due to resistance. A simple illustration as further proof will suffice: A person may know that the use of intoxicants is harmful to the body. He may have it proven to him precept, by example, and even by experience, and yet indulge in their use as a beverage. In such a case, who can say that ignorance alone is the sole bstruction to a pursuance of the proper course. Undoubtedly there are other active agents at work. Let us

ions has had something to do with it, and he imbibes, that he may not be of the odd number, thus giving way to the wishes of his comrades, even at e sacrifice of his own judgment and onscience. Or it may be that he lives munity where social, political or financial standing seems to call for ship." although to follow such a course may be (as we have seen), in opposi tion to any independent or self-assertive qualities which he may possess, He therefore overcomes the dictates of judgment and his conscientious les in order to pursue a cours that seems to promise a more immedi benefit-present comfort of body for one thing-a manifestation of selfish self-interest, if you will; and so the advancement of the individual, and, resultantly of society, is delayed.

To prejudice and ignorance, (which operate to keep one from seeing and gnizing the truth), as caus resistance, we must therefore add the more despicable cause—lack of courage of conviction, once the truth becomes

More to be contemned and deplored than either ignorance or prejudice, is this form of cowardice which holds ones tongue and acts bound by the fears which infest the weak and cignoble soul, and which manifests in many ways, according to the various "interests" concerned

We are all dargely creatures of habit which, we cannot, to a great extent govern or rise above; but courage to et upon what we believe proper es to be pursued in the attainment r planes of life, ought to be one of the individual qualities which we old keep unstrined from any vicious outside influences; that is, ignorance than is the lack of courage of convic-

As stated before, the plea of ignor-ance ought not to be an acceptable excuse of the intellectuals so much as of the hand workers, for do not they intellectuals) claim superior wiedge? they may possess its outward form) than those less favored educationally. They train themselves for work which calls for intellectual rather than hand exertion, but their training is too often ust as strictly confined to their particular vocation, as is the apprentice ship of the mechanic. Outside the limits of their profession, they may be just as ignorant as the rest of mankind in regard to those things which concerns ALL humanity, and which also affect TRUE individual interest; while a stern necessity seems to have awakened more knowledge among the hand tollers about those influences which bear directly upon the social and economic life, than among the supposed hinkers. How, then, can those of proessional pursuits continue their boast f really superior wisdom?

It is true that, with the better opportunities afforded them, of exercising their thought capacities, they should be more observant of broader affairs than they are, but it seems that such, as a rule, is not the case.

Neither should the plea of prejudice be an acceptable excuse from those, who because of their very advantages of education are in a position to substitute the teachings of science for such an unscientific weapon as prejudice. But is it true that prejudice is reduced to a minimum in the ranks of the intellectuals? Many forms of it have been eliminated through the teachings of science, but the most vital and reaching forms of it, namely: such as effect the cosmic life of society, have yet to be dispelled from the minds of the great majority.'

Contrary to the logic of first thought. therefore, we see that abortive influences are at work among those whom we would least expected to be guided by them. Yet it seems impossible to conceive but that there must be more among the professionals who do see the problem in its true light, than are actually proclaiming it. And this observathought upon the proposition previously advanced, that to ignorance alone, cannot be charged all the evils of a re

light, hold back, (through various motives), from an open exposition of it:

They may think (and rightly too). that such an exposition might inter-fere with their 'standing" in "society," for one thing, or they may fear expil-sion from religious circles, based upon outward charges of immorality, while really the blow is meant to be aimed at the so-called heretic doctrines embodied in the teachings of such a "creed" as socialism; or they may see and fear the danger, often incurred by those who preach reform of any kind of losing whatever bread-winning occupation they may be engaged in. Pres ent bodily necessity is a very strong factor, and one that many times seem excusable, at least much more excusable than the preceding motives. But this latter motive sometimes takes a form that is detestable in the extreme for there are many who, supplied not only with the wants but also the luxuries of human mind and body, deer all efforts made to uplift the race, for tear of having their luxuries interfered with in some way. So they immediate ly squeich any idea of social reform that may persist in forcing its truth upon them, because they are either so indolent or so selfish that they are satsfied with conditions that for them (individually), are, (to their minds),

those who, (although not satisfied with) liberties of humanity. Will the intelpresent sonditions, because they are in- lectuals perform their part in making sufficient for permitting one to obtain the necessities, let alone the luxuries of life), abstain from doing all that cause of their concern for thos depending upon them for support, but the actions of those who remain mute because they believe in "letting well nough (for them) alone," can engender no other feelings than thos loathing and disgust. Others may be held back from an exhibition of class-consciousness by the prids endable), which is also the cause of 'above" them for that. Thus it is, that pride operates, both to keep one from eing the truth, and to restrain on seen. Certain others may be so in private opinions of some of their dear-est friends, as not to exert their selfwill, and so their individuality is en-guifed by those whose powers of intelect are exceeded by their self-assert-veness. SOUTH SIDE NOTES.

Active Comrades Complete Their Plans and Have Already Put Them in Operatio

The last of the Workers' Sunday Af ernoon Conferences of the South Sid-Division was held on Sunday afternoon and a large share of the whole numbe of the South Side workers were in at tendance. They reported the plans well inderstood and that nothing remained for the South Division except to go out and do the things that had been agreed upon. This sentiment was unanimous

The Division had obtained from the Workers' Call as many subscription cards as there were subscribers on the South Side. Of this number less than two hundred of the cards were still on hand.

FIRST AND SECOND WARDS IN LINE.

It was reported that the comrades of he First and Second wards had reorganized combining the two old ward organizations into one new club, Comrade Raab, the new organizer, being present and representing these, wards. This completes the list of South Side wards. all are represented and all at work.

SUNDAY MORNING COMMITTEE MEETINGS

The ward division committee, con isting of all the ward organizers of the South Side will meet regularly every Sunday morning at 9 o'clock at 7153 Emerald avenue. This place can be reached from any place on the South Side for a single fare, and all business relating to the circulation of the Work ers' Call, appointments for meetings settlement of ward subscriptions, any other matters pertaining to the party work must be attended to at this meeting, which will adjourn at ten o'clock each Sunday morning in order to have all the evenings of the week and all Sunday free from committee appointments and so available for the regular party work..

HOW TO PUSH THE WORKERS'

Comrade Arnold Rasmuss discussion on "How to Sell Workers" Call Cards." He said: "It is easy ough to sell them, the only thing to do is to find the man who wants them, give him the card and get his quarter. It is sometimes difficult to find him, but ne said, it is a great deal easter than most of us think."

DON'T GET INTO AN ARGUMENT. In trying to get subscriptions, do not try to make converts. If reading the Workers' Call for six months will not make a Socialist do not get the idea that talking with a man for five minutes or half an hour, and especially it ou get into a quarrel when talking, will make him one. It is better to ge him to be a subscriber first and try to make him a Socialist afterwards than to try to make him a Socialist first and a subscriber afterwards. When you are getting subscribers do not allow courself to argue anything, do not a ack anything, do not defend anything Only find out what your man is inter ested in, which is presented in the Workers' Call, and then urge that point

to believe it because a man comes along and tells you that he has got to take the principal part of the wealth that you are creating, because you did a lot of work last year and that that work is called capital and demands interest? Are you?

Oh, no, my friend, CAPITAL never demanded one cent of profit, interest or rent. It's the CAPITALIST that does that. That is all that he does do.

Now keep that distinction well in nind for therein lies the whole secret of "the labor problem". You have all doubtless heard how very difficult this "labor problem" is and that it cannot be solved in any other way than by letting it remain as it is.

Now if you are going to continue acyou can be very sure that they will never find eny other. They don't want to find any other solution, and they don't want anybody else to find one, "But how about you?" Are you satisfied? Or do you want to try a different way? If you do here it is, and it's just as casy as casbing a pay check:

Destroy the capitalists, that's all. isn't it? And you don't have to bother going out for a gun or an ax to do it either. All you have to do is to just withdraw your support and the capitalist will be as helpleas as a dy in the syrup jar. It is from stealing the product of your labor that he has wn so great. It is your support at the polls that makes his arm so strong. and his boot so hard. It's by the ballot that these things must be altered. That the fountainhead of the capitalistic

Men, do you know that there is a political party in the field today whose campaign never stops whose issuenever changes; a party that will not fuse and compromises; a party of the workers, by the workers and for the workers; a world-wide party that numbers its supporters in every nation of the world; seven million telling voters that know what they want and how to get it? This my friends is the Socialist party, whose camputen was opened about fifty years ago by a little handful of men that worked and didn't know any better than to think, too. And com-rades, that movement has grown in spite of kings, bayonets and prison cells, until the redoubtable Mark Hanna hears and fears the steady trantp of those seven million men who know what they want, and who are going to

And now in conclusion let me emphasize that capital and capitalists are NOT the same. THE WEEK'S MEETINGS.

The meetings for the South Side for the week were well attraded and did excellent work. The meeting at Cottage Grove avenue and 39th street Wed-nesday evening was prevented by the rain. On Saturday evening at 11th and Michigan streets, Comrades Mili-and McDermut addressed about 300. and McDermut addressed about 380. Comrade McDermut dwelt somewhat at length on the number of useless people. He referred to himself as a court reporter and his daily duties being about as necessary in a reasonably organized community as the man who keeps the score in a prize fight.

CAPLAN HITS THE SINGLE TAX. Sunday afternoon Mrs. Forberg and Comrade Zimmerman and Sunday evson and Ballard also displayed what ening Comrades Capian, Zimmerman, the capitalist press would describe as Saunders and Mills were among the speakers. Comrade Caplan made an especially good hit in response to an inquiry regarding the single tax. He explained that under the single tax the tax would have to be paid by the employer, but in order to be paid by him would need to be deducted from the products of the workers, and that means that under the operation of the single tax the schemer would continue to scheme for benefits his own toll did not produce, and the toller would cononly.

"Students of Sociology" were startled over the report of the City Statistician to the effect that the month of April every year, as wealth concentrates in of women arrested, over the preceding allayed their fears by explaining that this result was merely a proof that the police were attending more strictly to business. Women were not getting worse, but the police force were getting better, so everything was for the best in the best of all possible worlds. But of course nobody was rude enough to ask what was the value of the "sociol-ogy" which depended for its knowledge of the conditions under which women of this city live, upon police reports.

Politically, there is just one point of difference between the North and the South today. The democratic party in the South occupies the same social position as the republican party in the North. If you would be low-down, "out of our set," just identify yourself with ocracy in the North, and if you would pass through the world "unhonored and unsung" in the South, just, insist on being a member of the republican party. Why, even one of the Atcursionists to Washington, after shaking hands with McKinley, declared he entirely too nice a man to be a republican, and it was too bad he was not a democrat (and thus belong to really good society). But these differences, after all, were only the result of environment. Fundamentally there are no differences between the two parties, They each serve the one common end, that of legislating in the interest of erce. If the republican party is uch due to innate meanness,or a lower moral tone than the democrats, but the to them, unfortunate fact of having been in power so many years out of the last fifty, they have grown bold and arrogant.

Many articles appearing in the Southern press of late are urging upon northern capital the desirability of invest-ment in the South. The fact is pointed out that the people of the New England states have on deposit in the savings banks an amount \$0 to 1 over the people of the Southland, and the statement made that this is because the New England states have had manufactories tion it is declared that for 'y years ago, when a great Southern man died, the only thing the South furnished for the funeral was the corpse and the grave— that the coffin, chroud, shoes, shirts, nails, lumber, etc., were all manufac-"up north," while, at the same time, the natural resources of the South in timber, 'coal,' iron, cotton, 'and all raw materials, were far better in quality and much greater in quantity than those of the North. This is all very true, but the South has waited too The gelden opportunity of the has come, and is now well-nigh gone.
Just at a time when commerce is almost

Forty years ago there was a great war. On the surface it appeared to be 'for" or "against" human chattles, but ntally it was more-much more ary hattle against evolution, It was not due to the production of "Uncle Tom's Cabin" by Harriet Beecher Stowe, neither was it due to the high morals of the North and the "holier than thou" in the breasts of the so-called patriots from from the North of Mason and Dixon's line. It was simply fate. It was the inevitable passing of one economic condition for another. Not a little of selfishness was in it. The North saw its opportunity. It embraced it. ald and did take what to it was a igh moral stand. It took from the South slavery so-called. 'That extracforty years. While it lay in a stupo over its loss, and its untrained white hands wondered what they would do and the negro, free, a great man, found that his last state was worse than his first. But all this time capital in the North was not idle. It had an eye to chance. It could afford to grow sentimental over the negro. He never would be much of a factor among the northern blizzards. the ages is now on. In 1860-64, in a few southern states, there was fought a bat-tie that decided forever that man could not be bought, sold and owned. If the nillions of wreeked homes had not been, and if the billions of money spent in his senseless battle, had not been, the result would have been just the same. Why have an investment of from \$500 to \$5,000 in a black man, and all the care and anxiety of his keep, when he can be hired for a life time now for a

Populist Journal Makes Significant Ad issions Regarding the Future Struggle.

The following from the Central Fusion Populist paper, which is now talking straight socialism, contains a whole straw-stack to show the direcion of the coming tornado.

tion of the coming tornado.

Fusion in South Dakota seems to be a house divided against itself. There is only one thing on which the democratic and populists agree and that is that in case David B. Hill is the democratic candidate for president, they will all bolt. Further than this they will exclaimed that ex-Chairman W. E. Kidd, Thos. H. Ayers, W. T. Follette and other leading populists are about ready to joint the social democrats, while ex-Senator Pettigrew, M. L. Fox, ex-Governor Lee and B. H. Leis are looking towards the formation of a new party in case Mr. Hill or some man agreeing with him shall be the presidential candidate.

It is also claimed that these last name; gentiemen have the full sympathy of Marion Butier, Charles A. Towne, Henry M. Teiler and perhaps Wm. J. Bryan.

This new party is to be a half way house on the highway to reform—a flag station on the railway of progress—an obstruction to the radical thought of the 20th centity. "It will avoid the extremes of socialism and at the same time attack capital." These moderate reformers favor preventing corporations and individuals from accumulating more than a certain amount of capital. The means to be used to accompish this are income, inheritance and indentification.

The only difference we can see between these two classes of reformers is that one intends to make the whole arity and the other proposes to go only half way. One swallows socialism all at once, and the other proposes to go only half way. One swallows socialism all at once, and the other proposes to go only half way. One swallows socialism all at once, and the other proposes to go only half way. The outcome will be a triumphant plutocracy or universal socialism.

We see great hopes for the future in the political conditions of the present. The people are talking but little else except socialism. They do not care for party democracy, they are no longer interessed in populism. They are becoming more rasileal every day. They are only waiting for the Moses who will see only waiting for the Moses who will see only only these days they will ston.

And one of these days they will stop waiting for any Moses and go right it and take the promised land without any leader to help or hinder.

With the change of the economic basis the whole vast superstructure undergoes sooner or later a revolution.

In considering such revolutions we tween the change in the industrial methods of social production on the onhand; this change takes place unconsciously, strictly according to the laws of natural science, and might properly

And on the other hand the change in the legal, political, religious, artistical, or philosophical, in short ideological, institutions; with reference to these men fight out this conflict as a revolution conscious of their opposing interests.

This conflict takes the form of a class

As little as we judge an individual by what he himself thinks he is, just as little can we judge such a revolutionary

We must rather explain this consciousness out of the antagonisms of men's industrial occupations, out of the conflict existing between the productive capacity of social industry and the legat institutions under which this industry is carried on.

A society, no matter what its form my be, is never broken up until all the productive powers are developed, for

New and higher social institutions are never established until the material onditions of life to support them have been prepared in the lap of the old Therefore, mankind never sets for it-

their own private use. Socialism asks for the collective ownership only of those things which are collectively used. Production is not carried on in-dividually, but socially. Consumption is not carried on socially, but individuany. Capitalism provides for the private control of that which is done socially and makes impossible a sufficient own-ership to provide for the wants of the workers in their individual consump-tion. Socialism will not only give an individual control of the goods he con sumes, but accialism by controling the means of social production will place the possibility of abundant ownership things of private use within the reach of all.

and Sundry Other Matters . Connected Therewith.

Brother Machinist: While you are enjoying your vacation, and wendering perhaps when it will come to an end. let us venture to call your attention to the fact that your dear, good, kindhearted masters have, in consideration no doubt of the oppressive heat of the weather, and for sundry other reasons which will be mentioned hereafter, determined that your leisure shall be extended indefinitely if possible. To this end, they have, at no little expense to themselves, taken measures to pro-vide substitutes who will carry on the work during your absence. And they have tesides paid you a handsome compliment in the selection of those substitutes. They have not gone into the highways and byways endeavoring to pick up a scrub gang to take your places, but on the contrary they have en so keenly alive to the importance of the mysteries of your craft that only those who have been trained in the great seats of learning have been ed worthy to supplant you.

Without any desire to flatter you must nevertheless admit that never before has it come to our notice that any ion save your own has been acrded such recognition, and we sincerely hope that you will at the next election justify the esteem which your former employers have placed upon by demonstrating that you are equal both in brains and skill to those whom your sagacious masters have selected to keep the wheels of industry moving, white you are enjoying a temporary period of rest.

We have often heretofore alluded in rather disrespectful terms to what is known as the "dignity of labor." but the following extract from the daily papers having been brought to our notice, has induced us to reconsider to some extent at least, our previous opin-

Ann Arbor, Mich., June 14.—The various manufacturing companies in Detroit who have suffered from the recent machinists strikes are filling their VACATED POSITIONS with University of Michigan engineering students. Two junior-shave gone hat the employ of the Olds motor works and three more have been signed. The Northern engineering works of Detroit and the Chicago ship building company have sent letters to Professor M. E. Cooley of the engineering department of the university asking for students to FILL POSITIONS in their plants. Full machinists' wages are guaranteed and a largt number of young men are ready to avail themselves of the offer made. The companies from which the offer tomes promise to protect the student workmen from any assault by the union men.

You will no doubt agree, brother ma-chimist, that no higher compliment could possibly he paid to the import-ance of your craft than is set forth in h the press and your employers ognize the fact. You and your fel-workmen didn't "quit your jobs." penters, painters, bricklayers and others might do so, but not you. No at all. You simply "vacated your po-sitions," which is an altogether differen-matter. And the students didn't take your jobs. Not at all. They merely "filled the vacated positions." Therefore you cannot consistently call them "scabe" and still preserve your dignity. In any case, whatever you may

"scabe" and still preserve your dignity. In any case, whatever you may think of the compliment your employers have paid you, you will doubtless appreciate the wisdom, foresight and business ability they have displayed in helping to create and maintain institutions from which they can obtain material for such emergencies as the present. 'And this gives us an opportunity to say a few words regarding education in general. For though it may not be apparent at first glance that you are being even now subjected to that process, it is note the less true. Although the advantages of a university-squeation may have been denied you, still a considerable amount of valuable information may have been denied you, still a considerable amount of valuable information may be acquired in that greater university known as the labor market, in which you now stand idle. In the first place these university students feel so compunction whatever in supplanting you. As a rule they belong to the same class as the masters against whom you have struck, and you therefore cannot judge them exectly as you would a body of non-union workmen. They cannot see with the

long. They did not learn engineering for the express purpose of supplanting you when on strike, in fact it is very doubtful if they ever thought anything whatever of being employed in this Unabated Energy. manner, but nevertheless they have no objection to getting some practic your expense, it being, as was said be-fore their intention to become masters

For most of them believe thoroughly that by hard work they can all attain such positions, as great care has been taken to inculcate this belief in their minds But of course you know that as

the master class who own the tools an machinery with which you work, and the wealth necessary for this purpose was and is extracted from the product of your labor by your masters.

Therefore, before you condemn the action of these young men would it not be better to enquire how far your class is responsible for their existence. You hould make sure that the workingclass, of which you are a part, canno be charged with fashioning a scourge to whip their own backs. Let us see.

Who constructed the universities?/ Architects, masons, bricklayers, car-penters, painters plasterers, machinists

etc. — all workingmen.

Who produced and transported the materials from which they were con-

Miners, iron and steel workers, quarrymen, stone-cutters, railroad operatives, sailors, teamsters etc.—all work-

students, provides their equipment, prints and binds their books etc?

Why a host of farmers, butchers, bakers, cooks, tailors, map makers, en gravers, lithographers, scientific instru-ment makers of all kinds, printers, bookbinders, ets. etc., all as beforeworkingmen?

Are the students the children of thes orkingmen?

No, in the vast majority of cases they are the children of the people who "employ" these workingmen—the parties who own the tools and materials with and upon which the aforesaid workingmen expend their labor, and without which they cannot labor.

Then it is the labor of the working-men of all kinds, that enables the owners of the means of production to have their children educated in the universities and colleges, while the children of the former are debarred?

Exactly so.

Then it is merely because the work-

men consent to the private ownership of the means of production that such a cituation as this is possible?

Then is it not rather silly to deno he action of the children of your mas-ers, brother machinist, when your own cers, prother machinist, were positive class support a system of society which prings these very results? You cannot ieny it. But you may say, how is it to be changed? That is easy enough to be changed? That is easy enough. Cease to support it and it will fall to pieces. It is only because of your acquiescence that it holds together. You have voted for it and your votes have been translated into lew. Say by your votes that it shall be legal no longer; there are far more of your class than of the masters. Vote the system out of the masters. Vote the system out of existence and in place of private ownership of the means of production, establish collective ownership by all the workers. Then everything created by tabor shall belong to those who created it, for their full use and enjoyment. Mines, mills, workshops, the land, the tools, the machinery, the universities, the schools and colleges, everything necessary for the physical and mental development of the human race must be collectively owned by all the people for the benefit of all the people. Then goodbye for ever to rent, interest, profit, rages, strikes, lockouts and scabs, whether from the universities or elsewhere. That would be SOCIALISM.

This is a big program it is, it is the biggest program that was ever mapped out for human schievement; the greatest recial revolution that the world has ever known, but not too great for the

MORE ABOUT THE TRUSTS.
Sunday afternoon at Sixtleth street
and Cottage Grove avenue was the largest meeting yet held at that corner. Comrade Mills discussed the trusts. He explained how they came into existence, not because of the wrong headedness of the men who were in them. but showed how they were the necessary result of the great machinery of modern production and distribution. In minds But of course you know that as the universities are turning them out by thousands every year it is an absolute impossibility that they can all become masters. Furthermore, the point is well take that a public ownership party is more likely to gain the "step" than is the Socialist party. We cannot hope to win

on that platform. How, then, will socialism be brought

about? The position of the ulling class at the present time appears impregnable and it is steadily extending its power. When we consider that capitalism subservient, our venerated constitution that instead of faving a sure thing, they have been really engaged in a lottery where there are a thousand blanks to one prize. The fellow who gets the prize of course believes more firmly than ever in the capitalist gospel that he has inhibted, and constantly insists that had the other nine hundred and ninety-nine worked as hard as he did they would also have drawn ft.

The gehools, colleges and universities in which these youths are trained are endowed, supported and minitarized by the master class who own the tools and form of oppression and tyran; s: that principalities and owers cannot maintain the sway of decadent and effete social systems.

For what do we hope? Surely not for a "reform" of the present system. But in the present darkness comes the of the dawn. The signs are of nation against nation there is growing surely and rapidly a sense of the polidarity of the working class. In the midst of the strife It can come only through the self-con-scious action of the working class. Our work for the future must be largely deepening of the feeling of its splidar-ty. To unite and enroll the working class is the task for Socialists. We have, in the words of the Manifesto, the advantage over the great mass of the working class of clearly under-standing the line of march, the conditions and the ultimate general result of the movement." A distinct policy of no compromise with the present system is the only one that can be adopted by

I notice briefly two minor questions "immediate demands" contained in our last national platform seem to me to be misleading and not in keeping with our Socialist principles. In place of them we should set forth simply what Socialists would expect to do in legislative and administrative offices in which they may gain power, before a complete victory makes possible the inauguration of a co-operative comm wealth. Among the things to be gained, as far as is possible under the present system, would be education for all, without capitalistic bias, protection for the lives and health of workingmen, employment for the unemployed and aid for organized labor in its contest with capitalists.

MARCUS H. TAFT.

The Eight Hour Day.

This is how a capitalist manufacture satisfies himself that the machinist are on strike for something they don't really want. We quote from the "Shoe and Leather Reporter";

"We have made careful computation and have discovered that granting eight hours as a day's work and ten hours wages means \$35,000 less income for our house, and while we are compelled to meet the demands for the present, we, in common with other large concerns, cannot stand such a strain, and it will inevitably react on our workmen. The fallacy of the argument that has attended this general demand for a reduction in the hours of labor lies in the fact that not one man in the whole force would decline to work ten or fifteen hours daily if he could receive double pay, and so I say they are not sincere."

There are two reasons given by this rentieman for opposing the demand for eight hours. First, that it would reduce the annual income of the firm by \$30,000. Second that the men are not sincers. The reader will judge for himself which of these two reasons is fleely to carry most weight with the

It should be shown that SOCIALISM and progressive municipalization are two distinct things; that it is the former and not the latter for which we stand. Our work henceforth must con-sist largely in showing this difference.

Socialism, as we conceive of it, is not the result of successive changes taking place within the present system; it is the new social order which will supercede the old in the necessary course of the evolutionary movement. Social-ism is not a "movement" merely; it is a developing and unfolding. Says Kro-potkin: "Men speak of stages to be traveled through, and they propose to work to reach what they consider the nearest station and only then to take the highway leading to what they recognize to be a still higher ideal." E reasoning like this is to misundersta Humanity is not a rolling ball nor even a marching column. If you wish for a comparison you must rather take it in the laws of organic evolution than in the laws of organic evolution than in these of an inorganic moving body." Some, however, who understand this consider that it would be strategic to outline a "step by step" policy. The proposition of socialism, they regard as "too radical," too great contradiction to the existing order for us to get a hearing. They believe that only as people become familiar with some "progressive measures," will they be able to conceive of socialism as a whole. I doubt the correctness of this. To me it appears easier to win but to our cause by presenting the lofty ideal and the world-significance of a new social order than by advecating some trivial

Less than four weeks intervene be fore the date set for the annual Workers' Call pionic falls due, and under bese circumstances we feel aga' obliged to call the attention of the comrades to the necessity of disposing of the largest possible amount of tickets for the occasion. The financial success of the picnic will be to a very large extent reflected in the vigor with which the summer and fall campaign will be carried on, and the disposal of the tickets is in this sense, as important a method of propaganda as any other.

While money for direct Socialist propaganda must as a rule be supplied by those interested in socialism, the sale of these tickets need not be confined to Socialists alone, and therefore there should be less difficulty in their disposal. A buyer who may be a non-Socialist will receive the full value of his money in the pleasure provided, and will also have an opportunity to observe for himself what manner of people the Socialists really are, and such observation often opens the way to securing new converts by dispelling prejudice, where perhaps direct methods of propaganda might fail.

All that can possibly be done to ma the day as enjoyable as possible is beparty members who have undertaken the sale of tickets to assure the complete success of the event, by sending a browd larger than ever before through the gates of Gardner's Park picnic grounds on the 14th of July next.

It is most important that this proposed plan for unity should be carefully considered, inasmuch as it may prepare the way for real division, instead of "reat unity." However worthy the intentions of the author may have been, I am per-suaded that his "real unity" plan, if adopted, would develop a war between the existing factions that would end only with the death of the organiza ations themselves.

Stripping the plan of all the good wishes, employed both to introduce and to close it, we will not find it difficult to discern why discord would follow its adoption. The plan is as follows:

"I. That the respective Socialist or-ganizations elect a national committee consist of one member from each state and territory, except as hereinaft-

This proposition marges the national committees, but it does not merge the state organizations; nor does the author intend by his "real unity" plan to merge the existing factions into

Not only is nothin said about their ceasing to exist as state organizations, but provision is acquaily made for the continuation of undependent" state organizations.

This fact is brought out in Para-graphs 3 and 4 as follows: "Each state "real unity," but Paragraph 4 dispels than one representative from any given be cast in a fractional part by each of members in the organization repre-sented by him." Thus we have as many representatives from each state as there are Socialist factions in that state, th with a different voting power the intimation, in this "real unity" plan, providing for merging the state organ-Complete stars, autonomy is hereby usfunteed." I have been in an exceptional position to note actions of the various state organizations upon the matter of unity and I have no knowledge of the New Jersey state organization endorsing your plan either in convention or otherwise. The ark to the Chicago convention last March, or as a member of the New Jersey state committee, advocated the lan does not commit the state to the

What is the most glaring and marked feature about your plan is that it does not propose to abolish the several fac-tions in different states, but instead proposes to continue them in existence. This is the plans basis and its own condemnation. We do not want any factions at all, whether lecal, state or national. Neither reason, nor our pol-tical institutions, nor expendiency, nor Socialism can offer cause why people agreeing upon one set of principles, haing one end in view, one mission to perform, should carry on their work in separate organizations, either in the nation or in different states. The plain but thrilling story told in a masterly manner by the great French asther, gets hold of the reader assoon as he starts to read it. Stripped of the Church garb, Jesus appears before us the type of the extrest, honest radical leader of the people, a figure which history has reproduced with slight variations in evary crucial period in the progress of mask ind, when the old order of things had reached its elimax and was about to give way to the new Aside from being a stery of most absorbing interest, with dramatic incidents second to none, the book, gives that noble character to the teachings of the carpenter of Nazarsth which most of our generation—whether Christians, Jews or feesthinkers—have falled to perceive through the mass of Church isgend which attaches to the stury of Jesus.

As a picture of society and the social classes of that epoch with the class struggle raging within it, this story will throw a strong light on our own conditions of to-day.

SOCIALISM AND REFORM.

Well known party members give their views on the Detroit Convention. Impossibility of unity on any other basis than that of Revolutionary Socialism. Lack of a common factor, fatal to "reform" measures. Socialism neither makes nor asks "Concessions". The class struggle must be accepted as the sole foundation of any practical platform for social betterment.

The Detroit Conference is confessedly socialism-socialism at once without a meeting of men with various minds any tentative steps. and with this admission it may seem It is not only the only remedy that to agree with my mind, that of a re- ills but it is at the same time the only volutionary socialist. I place at the bottom the competitive wage system which must keep wages at rate paid to the employed man.

I can see no getting-around this, no matter from what standpoint one looks at the case. That there must always be a certain amount of surplus labor as long us the capitalist finds more goods on his hands than he can dispose of at anism behind him in more senses than a profit, would seem of necessity ad-mitted by every investigator.

The editorial in the Monday evening saue (of June 17th) of the Chicago American involves a misapprehension,

What Bernstein really said was that socialism was not scientific in the sense of his own individual definition of science, i. e., purely empirical recognition without speculation. He was careful to add that socialism was scientific in that respect that it strove to fix the laws of economic evolution, and utoplan only in so far as it referred to the un-

BRYAN FLIES BEFORE-HIM.

Local Comrades Instal the "Challenge" Editor on the Public Rostrum and Keep Him There.

The Chicago comrades know a good thing when they see it, and as this knowledge leads them in every case to put the aforesaid good thing into operation, so when H. Gaylord Wilshire, the notorious editor of the still more notorious "Challenge" of Los, Angeles, Cal., drifted into the city on last Saturday night, the comrades at once determined to place him in circulation forthwith. Comrade Wilshire was by no means disinclined, and promptly cleared his decks for action. Within less than half an hour after he stepped from the train, he was installed on a soap box at the corner of State and Congress Streets and was telling an audience of several hundred people, a

few things that they really ought to have known, but didn't. On the afternoon of the following day he repeated the performance at North and California Avenues, and the same evening addressed another very large audience at the Socialist Temple, as reported in another column of this paper.

As these preliminaries didn't seem to weary the indefatigable Wilshire, and it was evident that he was quite ready to deliver his challenge any old place where a crowd could be collected, the local party members determined to gratify him (and themselves) to the full in this direction, so Monday evening found the Los Angeles man confronting a crowd of between three and four hundred people under the shadow introduced by Comrade Simons who told the crowd something of the personslity of the mas who was about to address them, and the Wilshire batter-

ary. They also displayed a co Bernstein's ideas and ignores the men who by their painstaking and fundaward next morning, no doubt carrying with him the impression that there are at least 5,000 people in Chicago, who, like Mr. Bryan, have developed the faculty of observing a discreet allence when controuted with an unanswerable

As a rule Socialist speakers es courage discussion and invite host criticism from their audience, but Co rade Wilshire is undoubtely the excep-tion to this rule. Not indeed that he did not strongly urge and even dars any of those present to step up and controvert his argument, but it would seem that after he had spoken his plece, there was not sufficient "incen-tive" left to The science of the despised proletarian alone can do and lare. It is rather a compliment anyhow to the intelligence of his Chicago sudiences to be able to state that amongst them not one fool could be found to rush in where Bryan, Tom Johnson, Professor Laughlin and W. tellectual scalp hunting expedition, but the game although numerous is extremely wary, and as a hunter, he has so far not been remarkably successful. Even the stalking of the big game preserve in Lincoln, Neb., produced no results, the principal quarry taking the alarm and departing stasishify from his lair. Comrade Wilshire came here with no trophies dangling from his belt and has departed as he came. But perhaps the City of Detroit, to, which he is bound, may afford better sport, as it is reported that a covey of "reformers" will shortly congregate in

Hence while it was possible for the competitive wage system to endure as long as we were in an undeveloped industrial condition, as soon as the machinery of production is finished its further continuance becomes an absolute economic impossibility owing to the wage system so limiting consumption that it places an irreducible surplion that it places an irreducible surplion that it places an irreducible surplion that it places an irreducible unemployed problem.

If then it is admitted that the competitive wage system must go, I would like to ask what other substitute can be offered for a competitive wage system to be made up of the same old kind. The first to be from the tendence of the capitalist parties now in a necessarily making as a corollary an irreducible unemployed problem.

Again the capitalist press resurrect the old falsehood that the views of Edward Bernstein are about to produce a serious split in the ranks of the Geran Socialist party, from which it may he reasonably inferred that socialism is ucing a few "serious splits" in the ranks of the capitalist parties. These reports, like dreams, generally go by contraries.

The city council of Galesburg, Ill., having repealed the local eight-hours law, Chicago labor men will send several representatives to that city to protest against their action. The mayor and the city attorney it seems have given it as their offinien that the eight. rlaw is "unconstitutional," which is the stereotyped way of describing anything that don't suit the interests of the ruling class. it Columbia, S. C., organized into a uring a gang of forty-two "scabs" who had taken their places and were sleepng in two box cars on the premise of the railroad company. The report of the affair Goesn't say that the strikers got their places back on account of this feat, but it does say that the 'scabs' are at work again, except a few who were badly beaten in the conflict. It further states that the mayor of the city has detailed a strong squad the company and that they are now on duty. Now if the strikers were only eat and fill it with one of their own number, and also capture every political office in the city for their own class, might not better results be reasonably expected from this method of procedure than from the mere capture of fortytwo "scabs," who had to be let go as soon as they were captured? The striking workmen had six of their number shot in the attempt, and then accou plished nothing, while with their votes properly placed they could have attained infinitely better results with no danger whatever to themselves. But while workingmen prefer to be shot, blacklisted and jailed rather than vote their masters out of power the latter will naturally remain perfectly satisfied with the arrangement. They can stand it as long as the strikers, and most probably longer.

THE DETROIT CONVENTION.

As most Socialists will doubtless watch with some curiosity the proceedings of the Detroit convention, the symposium upon that subject which appears on the front page of this issue of the Workers' Call, will perhaps interest our readers to some extent. The writers who are well-known member of the Socialist party will attend this onvention for the purpose of observing its drift, and advancing the Socialis position for the consideration of the beterogenous body of "reformers" of which the convention is composed.

It is perhaps unnecessary to observe that these comrades will be present merely in an individual capacity and with no thought whatever that they represent the organized forces of so ialism as duly accredited spokesmer and a perusal of their respective artiles will at once dissipate any suspicion that they are liable to compromise or limit the full demands of revolutionary

A large number of this issue will be sent to Detroit and every member of the conference supplied with a copy, While this in itself may perhaps not be productive of immediate results it will at any rate destroy the possibility of any "reformer" pleading ignorance of the Socialist position as an excus for requesting fusion on a basis of

A SOCIALIST BAROMETER Perhaps the most reliable method of scertaining the power and importance of the Socialist movement in any forelgn country can be found in plecine together the various opinions of the different capitalist parties, of such country and making a generalization therefrom. It will be found if things pottical in France are judged from this standpoint that a consensus of capitalof city police to reinforce the guards of ist opinions leads unmistakably to the onclusion that of all political factors ocialism is universally conceded to be the most important, in spite of the dissensions within the party, which whenever they occur, are invariably heralded throughout the capitalist press of the world as being certain proof of the decadence of the Socialist movement. And although these opinions are mostly given from the standpoint of one or other capitalist factiins, they neverthe less, without exception, point to the same conclusion, viz: that socialism is certainly the coming power if not already so. Looking over last week's budget of

odifical news from France, as it is shove-mentioned facts may be easily discovered. For instance, on June 22d, the second anniversary of the present Waldeck-Rousseau ministry was cele brated as a "record-breaking" event, having lasted longer than any other, with one exception, since the third republic was established. M. Waddingon, a politician attached to the pres ent office-holding faction, in a conversation with a press correspondent, asserts that the country has never beer quieter and business never better than at present. There is according to M. Waddington, no cloud upon the pelitica horizon save one. The present ministry he says, owes its prolonged existence to the fact that the Socialist party is divided, and that when this division ceases to exist the cabinet is certain to be overthrown, a complete admission that the political destinies of France are in the power of the Socialists when ever the latter may see fit to lay hands upon them.

The governor of the Bank of France then adds his testimeny to the importance of socialism as a factor in French politics, although he contradicts M Waddington's completent assertion that "business was never better," by pointing out that French capital to the mount of \$121,000,000 has within the last five months been invested chiefly in Russia, Germany and Switzerland. re-actionary press to be due solely to expropriation through socialism, and are therefore investing their capital in countries where they consider that less danger is to be apprehended from a revolutionary working class. One of these journals asserts that under the third republic the capitalist is to occuthese articles will meet with the unani- py a similar position to the nobility mous, approval of all class-conscious under the first. The latter lost their heads, the former are in danger of losing their property, through the "financial folly" of the present cabinet, which is declared to be paving the way for an "era of socialism."

Nor does the outlook for the forthcoming general elections, which are scheduled for May of the coming year promise to relieve the situation in the make it, may be seen in the efforts to consolidate the Clerical, Royalist and Imperialistic forces into one homoger ous body for the purpose of coping with the coming revolution; and the at-"Chauvinism" as it is called, a political term which implies in French some thing similar to the "Jingolsm" of England or the aggressive capitalist "patriotism" which has been rampant in this country since just before the late "It will be seen from the above, tha

While all ocialists should recognize that dissensions as to tactics spring from imper in turn reflexes of an imperfect capitalist development, it is nevertheless oblifor party solidarity, which will eventually be accomplished by keeping pace with the economic evolution which tends always to array modern society into two distinct classes with distinct hostile interests. The fact that the propertied classes in spite of their different shades of political beliefs are fast uniting to defend their common interests against socialism will act as a powerful agent in compelling a similar solidarity on the part of the working class. When the advocates of capitalist exploitation in France thus confess may reasonably infer that they have not overstated the case and feel that on the whole the movement is in a satisfactory condition, although complete union has yet to be accomplished.

Mr. Wilever, considers that a man who has given as he says "all that was worth living for-health-for his country,' should be placed beyond the reach of poverty, and in this he is again correct, though he makes the trifling mistake of thinking that he can claim a place in that category. He fought for the country it is true, but not for HIS country—a fact which is attested by his present condition of destitution. The men who really own the country or any share of it, are not and cannot be destitute, but the private soldier and the workingman are neither of them in that class, and Mr. Wilson stands a good chance of discovering the fact, even at the risk of endangering his patriotism.

AT THE TEMPLE.

Challenger of Bryan Lectures on "Trusts Before an Enormous Audience on Sunday.

Although the Socialist Temple at 120 Western avenue has been the scenof very many successful Socialist meetpled by the party, yet it has never scored a more decided success than that of last Saturday, when the building was literally filled to the extreme limit of its capacity by an audience largely non-socialist and mostly attracted by the announcement that H. Gaylord Wilshire, of Los Angeles, was bliled to make the address

It is needless to say that the con adesadvertised the occasion thoroughly, making special use of the fact that the speaker was the man who had vainly attempted to lure the wary W.

J. Bryan into a debate upon the trust question, with an offer of \$10,000 in case the latter was able to induce the addlence to endorse his position, that the trust can be destroyed by legislation. For an hour before the speaker arrived, different comrades at intervals announced the meeting from a stand at the corner of Madison street and Western avenue, and their efforts contributed in no small degree to swell the audience which afterwards listened to Comrade Wilshire's address. The meeting was opened with several

well-executed musical selections by the Schubert String Quartette, which were thoroughly appreciated by those present, after which Comrade John Collins made a short opening address dealing with the present strike in the machine between the employers and the workutterly handicapped in the conflict by the fact that they were still the dupes of capitalist politicians and periodi-cally voted into the hands of their enemies, the power which was necessary to enforce their own demands during a strike. Comrade Collins finished his ddress with a forceful appeal funda to carry on Socialist propaganda, declaring that \$20 at least was expected from that particular meeting. After the collectors had got through it was found that the audience had responded with contributions amounting to 60 or 70 cents more than the above-me tioned sum.

Comrade Collins again came to the centre of the stage and in a few wellosen words introduced the speaker of the evening, who was received with Comrade Wilshire prefaced his re-

been accused of making socialism too it was easy to get-that we cannot help getting it even if we wished to refuse it. He believed that the fact that its realization was an inevitable sequence of our present economic system justified nim in asserting this. He then explained his appearance on the Socialist platform as being in line with the ideas of Marx as given in the Communist Manifesto, where it is stated that from ime to time individual members of the ruling class who had raised themselves so far as to see intelligently the inevitable consequences of economic evolution would cast their lot with the pro-

The speaker then gave in detail the experiences and observations which during his career as a capitalist, had gradually led him to the conclusion hat socialism was unavoidable in the future. He illustrated his speech with many apt and pointed similes, which drew unstinted applause from the audi-ence, who seemed keenly alive to the significance of the allusions made by the speaker. The impossibility of pre-venting over-production under the venting over-production under the present wage system, the absolute certainty of a continual increase in the number of the unemployed, and the complete economic bankruptcy of the entire capitalist system as a finish. was portrayed and demonstrated in a which was in itself a sort of a challenge to any of those present to pick out a flaw in the chain of reasoning presented for their consideration.

After completing the demonstration speaker turned the attention of his au-dience to the challenges with which his name had been so widely associ-ated. He admitted that they were vulgar and not at all "good form." but as-serted that their value in advertising socialism far outweighed such considerations. When it began to be evident to the mass of the people that the "in-centive of gain" even to the amount of centive or gain even to the amount of 10,000 was insufficient to induce promi-nent capitalist politicians to defend their theories in public debate against a Socialist, propaganda work was done to the extent of shaking the faith of their followers in the assumed infallibility of their political idols. He then gave some details of the meeting which he had addressed in Lincoln, Neb., a few days before, and which was respossible for Mr. Bryan discovering that a temporary vacation was indispensa-ble to his health before the meeting in question materialized. The speaker then concluded by advising his audithen concluded by advising his audience to prepare for the coming social revolution which was most probably nearer than was generally supposed, and sat down amidst a tremendous burst of applause which was repeated

"The meeting was then adjourned and the audience dispersed, thus bringing to a successful close one of the most in-structive Socialist gatherings ever held in Chicago.

Injunctions have been granted in Milwaukee against the pickets of the striking machinists in that city. They prohibit the pickets from congregating around the shops or endeavoring to persuade the employes to quit work. Labor leaders profess to see in this fact a symptom of weakening on the part of the bosses. The average labor leader as a rule can see good in everything except a Socialist ballot.

The Cloakmakers union, compos mostly of girls, on Monday night voted a sum of \$25 from the funds of their union to aid the striking machinists. This exhibition of solidarity upon the part of these girls, brings with it a regret that women under capitalism are denied the franchise. GRADUATION DAY.

Education Begins Only After the Young Intellectuals Enter the Labor Market.

Graduation day is coming for the students of the different scho ents, instructors and students will bustle, with excitement in making preparations for celebrating the great day New clothing, receptions, presents as banquets will be planned beforehand in honor of the anticipated event that is in proportion to the means at the disperal of the parents. Students and instructors will prepare musical numbers, essays, recitations and ora tions to celebrate the official recogni tion of the attainment of that much sought for gem-knowledge.

The Telegraph of Dubuque, Iowa (Bryan Democrat) gives the followin city by Comrade George E. Bigelow spreading the knowledge of Socialis throughout the country. It only needs to be stated that the scribe who penned this account fill into the error of supposing that the lecturer advocated what is known as "State So-cialism" as a remedy for the infamous conditions which he depicted so graphically. Comrade Bigelow is too well known to Chicago party members to permit of their accepting the conclu-sion of the "Telegraph" reporter as truth:

Meet for its Discussion at the Socia ist Temple.

Last Sunday afternoon at the Socia ist Temple there was an informal meet-ing of comrades interested in the idea of a Socialist Co-operative, and plans for practical work were thoroughly disssed. Suggestions, were made by mrades Richter, Huggins Stangland, Brennan, Kerr and others, and Com-rade Kerr was requested to put into writing for the Workers Call the plans agreed upon, in order that the social-ists of the city may give them conaideration. A meeting is to be held at the Socialist Temple next Monday evening to consider these plans and form a working organization.

The object is to form a Co-operative Belgian comrades, designed primarily to raise funds for socialist propaganda, and incidentally to enable the con-rades co-operating to obtain the necessities of life at less than competitive reinil prices.

The form of organization proposed is that of a "society not for pecuniary profit" under the laws of Illinois, with life memberships at \$10.00 and annual aberahips at \$1.90. This form of organtiation is much less expensive than a corporation, and is also much more flexible, as there is no limit to the number of members, which can grow in-definitely as the work of the Co-

It is proposed to begin with the sale of staple groceries, not including perishable goods and not including articles like sugar and flour which are unually sold at about cost, but taking such articles as coffee, tea, cereal foods, canned goods, spices, dried fruits, butterine, etc., which are usually retailed at a profit of from 25 to 100 per

Our plan would be to fix our selling prices low enough to give a substantial enefit to the comrades making perchases, but high enough to leave

safe margin over the cost of handling. Goods should be bought and seld for cash only, no exception to this rule being allowed, and reports should -be made of all receipts and expenses at frequent intervals. The profits should divided in such proportions as the Co-operative might decide by vote of the membership, into two parts, one of which should be appropriated to did the propaganda work of the party in such manner as seems best and other used to increase the work of the Co-operative, to which latter purpose all membership fees should also be set

It is suggested that the first sales depot of the Co-operative be located at the Socialist Temple, for the double reason that this would avoid any new outlay for rent and that it would b cany to have some one in charge of the goods before and after every propaganda meeting, so that comrade from all parts of the city could make their purchases at such times without waste of time and car-fare.

It is hoped that as soon as perma nt North and South side headquarters are established, branches of the Coing being done in common in order to get the lowest rates.

We cannot emphasize too strongly

the fact that every one of the commades thus far interested is firmly opposed to the idea of incurring any debt or asking for denations in starting this movement. We believe the experience of our European comrades and a sober view of nic conditions in Chicago make it evident that there are more than enough Socialists in the city to make operation a success if ordinary judg-ent is used in the choice of methods

We have attempted as a start to out-ne the work only so far as the supply of staple groceries is concerned. When and a small surplus is accumulated, it will be easy to add other departments, such as tailoring, shoes, cigars, men's furnishings and other non-perishable tion of the Chicago wage workers be livery routes for bread, milk and other

-by-

.... EUGENE SUE.

The plain but thrilling story told in a masterly manner by the great French surker, gets held of the reader as soon as he starts to read it. Stripped of the Church garb, Jenus appears before us the type of the express, honest radical leader of the people, a figure which although he reproduced with elight variations in every crucial period in the progress of mask hald, when the old order of things had ceached its chinax and was about to give way to the new Asic from being a story of most absorbing interest, with dramatic incidents second to none, the book, gives that mobic character to the teachings of the carpenier of Naureth which most of our generation—whether Christians, Jews of resthinkers—have failed to perceive through the mass of Church legend which staches to the story of Jesus.

As a pitture of society and the social chases of that epoch with the class struggle raging within it, this story will throw a strong light on our own conditions of to-day. lhi pages, cloth, with or without silver cross dec price 50 cents.

This is what a writer signing himself The minutes of this meeting shall be "Old Soldier" says in the New York sublished in The Call, and a meeting Journal of June 22d and this is what

"I believe every word of the above letter. Never was labor so respected as today. Never was it so well paid. Nev-er was it so nearly equal in power with capital."

And this is how the New York Journal itself corroborates the statements of "Old Soldier" and his endorser:

"Mary Ferutzo, who May 22nd last was removed with her two children, Francis, 4 years, and Margaret, 1 year, from 21.7 Bowery, died this morning in, the hospital. The woman, as well as her two children, were suffering from exhaustion caused by starvation. She had been unable to support herself and family. The younger, child died two or three days after their admission to the hospital and the other one a week later."

From all of which it may be inferred that the reputation of a "clever writer" is often conditioned upon the existence of stupid readers.

If the cratory of the pulpit were taken seriously, it would immediately put a quietus on those preachers who have developed the habit of denouncing "materialism" in their sermons. They aimply ran around and pointed their fingers at the reformers to see them for the result of the result of the result of the pregnation of socialism was as impregnable that they dare not discussed.

They replied that we were arrogant.

Dan's Trained Parrots Perform.

Arriving in Detroit I found that Comrades Mills and Wilshirs were having forth, no end of amusement with the politicians and "reformers". A meeting on "Reform or Revolution" had been arranged by the Detroit socialists at which the socialist members of the Conference were invited to speak. A large number of delegates were present as well as many Detroit people and a rousing meeting was held. At its close for a cyclone cellar and remained carefully concealed until these terrible ining meeting was held. At its close is more DeLeonites who were present tried to start up the rickety old "buzz saw" but found as usual that the; possessed nothing more dangerous than a wind-mill. They tried making a disturbance in the hope of breaking up the meeting, but finally succeeded in getting calmed down to the point where, they could appring the regulation set of questions concerning Cary and the Armory, etc. By the way Daniel should take a day off and write out a new set of questions for his followers, as the old ones are getting somewhat trayed around the edges and his men do not seem to

The one impression which dominates heard of and hence could not easily capture. But having been brought up with the idea that the proper way to fight anything was to get close enough to it to hit it, I foolishly arese to reply to Mr. Lentz. "As a man and a social-ist," I said, "I cannot sit still and hear the man who confiscated to the work of capitalism the hard earned pfennigs of the German socialists, who made it a penal offense for two or more men to meet together as socialists, who exiled or imprisoned all those who dared to speak for socialism, who stood in fact as the most complete antithesis of so-cialism that this generation has produced and who was its most skillful Democratic party from the gold Dem-, and unscrupulous enemy, designated as ocratic point of view was shown in a socialist. Bowling Them Over.

Meantime at every session of the Conference the few socialists who were present were doing their best to keep from being absorbed. A.: In order to be identified with a

party that represents my views more completely than any other; for the completely than any other; for the same reason that I have in the past left one party and joined another as my views gradually became more and more radical. If there are any parti-cular points that you want to know, I will tell you as well as I can.

Q. Does your business have anything to do with your attitude toward

A.: Yes. It keeps some people out of Socialism: it drove me into it. As you know, I am a shorthand reporter, and the business requires the hardest kind of work. Most of my time is spent in the courts making a record of people's quarrels.—quarrels as useless and unprofitable, if society was properly organized, as would be disputes over the opinions of the people of Mars. It is almost impossible to realize the encorpous waste involved in litigation and the reported that its secretaries and 580 members composed the federated singing Societies was opened last Saturday at 8 p. m. at 55 N. Clark street, when outside singers began to arrive from St. Louis, Cincinnati. Davenport, Cleveland, Shaboygan and other cities.

At 10 p. m. the delegates met in congenius waste involved in litigation and the executive. The federal secretaries or members composed the federated singing Societies was opened last Saturday at 8 p. m. at 55 N. Clark street, when outside singers began to arrive from St. Louis, Cincinnati. Davenport, Cleveland, Shaboygan and other cities.

At 10 p. m. the delegates met in congenius was a second of the report of opinions of the people of Mars. It is almost impossible to realize the encorporation of the people of Mars. It is almost impossible to realize the encorporation of the people of Mars. It is almost impossible to realize the encorporation of the people of Mars. It is almost impossible to realize the encorporation of the people of Mars. It is almost impossible to realize the encorporation of the people of Mars. It is almost impossible to realize the encorporation of the people of Mars. It is almost impossible to realize the encorporation of the people of Mars. It is almost impossible to realize the encorporation of the people of Mars. It is almost impossible to realize the encorporation of the people of Mars. It is almost impossible to realize the encorporation of the people of Mars. It is almost impossible to realize the encorporation and the people of the people of the people of the people of the p ormous wagte involved in litigation and the various kinds of business on it. Now the support of people engaged in litigation or any other unproductive or destructive work must come from those who do the productive work. It would seem that the greater the number doing unproductive work, the heavier must be the burden on those who are producers, and that if those now doing unders work were engaged in uneful labor the

But I cannot see how this latter condi-tion of things can be brought about except through some change in the or-ganization of society.

Q.; Have you been a republican or

emocrat.

A.: Both. I was a republican until
saw through the fraud and absurdity involved in the idea that employers wanted a tariff for the benefit of labbeliever in free silver. But free silver has disappeared as an issue, and it is a singular circumstance that the very thing (more money) that killed free silver and improved times, also at the same time demonstrated the truth of the free silver position. However, I came to understand that neither free trade nor free silver offered a complete. ly steps in the right direction, and if they merely led people to do a little thinking for themselves, they were worth while.

Q.: How about the single tax? A.: Soon after the publication of "Progress and Poverty" I read it and was a single taxer for many years, be leving that it would destroy monopoly and prevent anybody from acquiring wealth without giving an equivalent But the single tax assumes the contin-

uance of the competitive system.
Q.: What led you to look into So

A.: Henry George, in his book or ers operating under the tariff monopoly and the money monopoly, there was another, land monopoly, who, after all the other robbers had taken their por-tion of the earnings of labor, took "all that was left." The essence and strength of land monopoly consists in land owners being able to take out more than is put in. If there were no profit there would be no object and no injury in owning land. Therefore profit is the cause of land monopoly. But why is profit in land bad? Because men are obliged to give more than they get profit in land can be bad but profit in other good things good, I found that Socialism offered the only satisfactory answer. The inspiring motive of all private profit on the one hand, as the cause of most crime is poverty on the other. Now, why strike through the single tax at one phase of the evil? tax assumes competition as the natural state of society. That men knowing no better should compete and struggle with each other for bread to put in

those who become Socialists?

A.: Yes, but under Socialism there will be "nothing in it" for anybody. Every one will be called upon for his contribution to the total fund of wealth Under such circumstances none, can want and none become dangerously rich. I forgot to say a minute ago that logic by which the single tax would individual but by all the people acting together as organized scolety,—why this product should not be common property, I cannot understand.

hold similar views?

A.: Yes, I know some who do. Not who begin to see that there is some-thing wrong in a system under which nien of brain can only live by permis-sion of another class of men having ploy them. Among many classes of people I hear the opinion expressed that the trusts are growing so big and driving so many people out of business that the government will have to take the business into its own hands. Of course these people do not see that the trusts are simply ridding the counthy of the time expanses.

OHIO STATE COMMITTEE SOCIAL DEMOCRATIC PARTY. Dayton, Ohio, July 6, 1901.

The fall campaign is drawing near and the state committee is arranging for a vigorous campaigs. The number of speakers sent out and the amount of literature that will be distributed will depend upon the available funds for this work.

The dues of our organization being small. makes it impossible for us to accumulate any large amount quiside of current expenses. We have sent to all affiliated locals in the state subscription petitions which the local comrades will circulate for donations to the campaign fund. Fifty per cent of the amount so raised will be used for local work and the balance sent to us for general state work. We ask that all comrades and those in sympathy with our movement respond to this call for help, and no matter how small the amount, it will be thankfully received. Those not in touch with the party organization, or living in places where there is no local, can send their donation direct to the state secretary, who will send receipt for the same. We are very anxious that our party poil emough votes this fall to get official standing, and in order to do so we must all do dur utmost. Remember, "He who would be free must himself strike the blow," Hoping that this appeal will receive a generous response, we are,

Editor Workers' Call :-

Editor Workers' Cali:—

If there is one question more important than others that will come before the unity convention for settlement, then that question will be the choice of a name for the party which will no doubt be formed by unity.

All indications at present point to the probability that the name which the sonvention will adopt will be "Socialist Party." One reason why that name seems to stand so favorably in the estimation of the many of our comrades is because it seems to them to be the only name left for selection, since another party has the name "Socialist Labor Party." and the name "Socialist Labor Party." and the name "Socialist Labor Party," and the name "Socialist Labor Party." and the name "Socialist Party and the plain pame "Social Democratic Party" and the plain pame "Social Democratic Party." Why I oppose the name "Social Democratic Party." Why I oppose the name "Social Democratic Party." I shall pass over, as there is no doubt but what that name is considered impracticable, on good gnounds, by most of the comrades who will attend the convention, that it will not be adopted.

Now the reason I oppose the name "Socialist Party" is because I believe and insist that in our party name there should be at least one word significant of or pertinent to the class of labor, on which this movement rests and depends for its final accomplishment. We should have a name that will distinctly tell who and what we are. If we are a working class party, let us brand our serves as such, so that there may be no mistakes made in the future by any workingman or woman, when no doubt, there will be a public ownership party in the field, breadly hinting and loudly proclaiming itself a Socialist Party, geling by way of a short route to socialism.

"Particularly Mean."

Jacob S. Rogers, recently deceased, tive factory in Paterson, N. J., and who bequeathed his entire fortune of \$8,000,-000 to the New York Metropolitan mu-seum of art, is stated to have been considered a "particularly mean man" by the citizens of the town in which his markable reason is given for the for ulation of this opinion on the part of the inhabitants of Paterson, N. J.:

He had a way of TELLING THE PLAIN TRUTH that was like pulling teeth to most people. He did not gloss with fine words anything he had to say. He SAID IT OUT and as a consequence NOBODY liked him. But he did not seem to care for anybody's good opinion, and he never was mean with any one who did not interfere with him.

A good idea may be gathered from the above as to what constitutes a "particularly mean man" under pres-ent conditions. Socialists who have been energetic in the movement will appreciate this recognition of the un-popularity of truth telling.

The strike of freight handlers in East St. Louis is off, the men receiving an advance of 15 cents per day, brings the wages up to \$1.40. Who said our capitalists were unwilling to allow the workers to share in the general "prosperity"?

Fifteen thousand men and women employed in the tailoring trade-in New York and Brooklyn are contemplating a strike for the abolition of contractors and middlemen. A little further contemplation might perhaps lead them to see that the middleman can only be abolished by a strike at the ballot box.

At about the same time that President McKinley was orating in-Californ'a on how "the humblest citizen can aspire to the highest place within the possession was tried in Justice Chott's gift of the nation," his cousin, aged by welcomed into the home of Comrade Joseph, Mo.-The Advance.

According to a correspondent having investigated the matter, every trade in Sweden is organized. The unions pay a salary to an executive officer, but make no attempt to accumulate treasur ice. . If a strike or lockout comes the definitely and large enough to cover benefits and other necessary expenses.

Another great strike of the garment affected directly and indirectly. 'The workers will move against sweatshops for shorter hours, higher wages, the recognition of the union, the adoption conditions. If the strike comes, it will probably spread westward,

J. P. Morgan is reported to have let plans for the building of two ocean liners that will be floating palaces, to be used solely by the rich. Passage to England will cost \$1,000, but you will live in a luxurious suite of three or four rooms, eat and drink the finest in the narket, visit a theater and other amuse ments, and have waiters, harbers, footmen, manieurists and others dancing attendance on you? Are you going— Cleveland Citizen.

The current number of the 74 merica Federationist," organ of the Federation of Labor, contains a well written essay on the "Industrial Outlook in Great Britain" by Pete Curran, the well-Unionist, who concludes his article as follows: "Capitalism knows neither creed nor nationality. The workers can, with profit, follow their example, and not permit either ocean brifrontier to keep them divided in the cause of social and industrial emancipation."

The prospects of a Domestic Servants union seem fairly well bestred. !'Mothe amongst the coal miners, silkworkers, and other wage slaves in the eastern states, has been giving her assistance towards the proposed organization last week in this city. Although reports of daily press, we failed to notice amongst those present the names of any of the "lady reformers" who have been in-sisting that the "problem" of domestic service would be solved as soon as it was put upon a "business" basis. Now that this event is likely to occur, they "solution" which will serve to keep their lungs in good condition until the organization gets in shape to make the

Asheville, N. C., July 3. Dear Comrades-I am sure you will e as much interested in 'inding ou semething about the spread of social full reports of the addresses which is in this state as I have been; a l Courrade Leon Greenbaum be giving in send you a brief statement of things have visited. In Macon County, where I staved for six weeks with my parent in the "gem of the mountains" chigh-lands-I found one class-conscious unattached socialist who understands our principles very thoroughly, and severs sentimental socialists, and many who were interested but didn't know much about It. A meeting was held there June 26th, and the people of Highlands yer at Paterson, N. J., protested that and vicinity listened to their first public becture on socialism. The little hall was packed and many were turned away unable to find standing room. left a lot of literature tehind me as many had expressed a desire to study further, and I hope that a local will be formed there in the near future. I was sorry that I could not stay longer and organize a club, for I am sure it would grow,
-In Asheville I was much pleased and

surprised to find an organization of about 60 members. They organized as THE SOCIALIST PARTY of North Carolina and are determined to stand for the name. The date of their organization is Dec. 30, 1900, and in the spring they carried on a vigorous eampaign and polled 38 votes. They bought space in The Workman, a trades union paper, for the three months during the campaign and the state executive committee J. W. Summers, edited it in a masterly way When I went to Asheville I was warm Summers and his charming little wife who is also an enthusiastic socialist A meeting was arranged for Tuesday, July 2, and hid in the court house. This was well attended, considering the number of outside, attractions in the a woman on a public platform.

After the address on "Socialism and the Home," Comrade Horton made a workers is brewing in the Rast, About of socialism. After the meeting I had 00,000 men, women and children will be the pleasure of exchanging greetings will many of the Asheville contrades and they wished me to express to the Chicago comrades their delight in having one of them among them, and to carry their sincerest regards to all northern socialists.

The movement here is being organ-

ized by Comrades Summers and Horton two as noble men as I ever met and as clear in their knowledge of socialist principles as any men in the movement There is no danger of any muddledom lina as long as they have breath to speak or strength to write, and I contratulate the socialists not only of North Carolina but of the United States workers in this citadel of conserva tism. . To one unacquainted with the east fron prejudices of this section it is hard to realize the difficulties which eset the workers, and the importance of that which they have already ac complished.

And in this connection let ittention to the fact that in New Decaleast a majority of the board of alder men have been elected-a victory really nore noteworthy, than those in Haverhill and Brockton

It is my aim to truthfully portray the utter indifference, as I have learned by observation (and to tell the whole truth I must add personal experience. that the general working class show towards their wretched manner of se-curing a worthy livelihood. The aver-age wage earner whose physical confrom one end of the year to the other, eldom, if ever, gives a thought to the fact that he is allowed to labor only on the condition that he is able to prothe employer, outside the estimated chare set spart as the wage agreed, the comrades as possible from all the upon. But worse still for the individual
wage carner, when by accident or otherwise he is robbed of his productive
ability, society no longer has any pecuntary interest in his welfare, and he
is, with despitable meanners, shamefully shoved to the rear; some profit monter whose sympathy chanced to outwyigh his mammon seeled propensities,
might give him the address of some

charity association, but the red-tape lings of such an institution generally give more time than the appliant can profitably devote (without ood and shelter) to the study of natural selection and the task of mastering that doctrine known as "survival of the attest." If he should happen to be so infortunate as to have a family who are dependent upon him as sole suport, the case is more acute and will draw all manner of comments (even such as "a fallure in life") from his

But outside of the mental distress which these unthinking and cruel renarks might cause, there comes the cold reality of the physical needs of wife and little opes deprived of that willing provider that ever stood bethem and starvation. If the wife's whole being is filled with despair it finding herself alone under a burden that would require superhuman ndurance to successfully carry, what oust be the feelings of the husband who finds himself only an obstacle intead of an aid to her brave endeavors. If the wealth producers would give

Many Inventions.

Free Society, the anarchist organ in this city is rapidly gaining a reputation as a picturesque liar. Among other notable productions in this line, were the statements that Philadelphia soclaffsts sought to throttle free speech, that the socialist members of the lish parliament voted for the king's budget, when even the Associated Press was decent enough to chronicle the fact that they both spoke and voted against it, and that the Austrian socialists op-posed the efforts of the strikers to gain an eight-hour day. Their last number keeps up their reputation by stating that "the miners of Globe, Arizona, followed the advice of their socialist friends and elected their own man to the legislature to work for the eighthour law," a proceeding which it is unnecessary to say no socialist ever advocated. Then it drops to the verge of imbecility in its lying by stating that an-article in the last number of the International-Socialist Review on Socialism in Denmark, giving news of the elections of a few weeks ago appeared in the Monatschefts three years ago. We happen to know that this article was translated direct from the original manuscript, written less than a month before its publication, If socialists were really as anxious to appeal to capitalist law as Free Society would have us believe, such malicious lying might be made rather expensive.

Don't imagine that you "never will be missed". If you are not present at the Socialist pienic tomorrow in Gardner's Park. Somebody will be sure to ask you how about it.

The effort to organise a new party was represented by Lee Merywether of St. Louis. He and Comrade Müls divided the time on the first evening devoted to the question, "Is Political Un-ion Possible?" Mills contended that only on the program of socialism is there any possibility for such union, and that on this program union could ot long be avoided. When Merywether followed he spoke in a discouraged disappointed way of his hopes for getting tegether on a platform of com-Socialists, but the proposal was not again mentioned from the floor during the conference. Gradualty, the protest died down in the world of letters, as it did in the world of politics and practical life. Capitalism came to be regarded as permanent and beneficial, and the capitalist themselves as able organisers permanent and beneficial, and the capitalists themselves as able organisers of industry, instead of as a hideous, it inevitable, curse to mankind. The most that could be done was to recognise the "economic harmonies" and soften the economic discords. So they said. Statesmen and poets, political as and journalists, preachers and political economists, all became the most obedient humble servants of the plutocrats, and grovelled beforef the vulgar showmen and possessors of the golden showmen and possessors of the golden calf. What little of enthusiasm was left exhausted itself for the most part showmen and possessors of the golden calf. What little of enthusiasm was left exhausted itself for the most part in purely national uprisings and combinations, or sympathy with those in other countries. Not till within the last thirty years of the hundred-year period did the revolt against capitalism again take an organised form. This time, based upon thorough knowledge and scientific analysis, it kept pace on the continent of Europe (which had not undergone the full effects of three generations of merely profit-mongering industrialism) with the gradual breakdown of the individual or competitive form of the capitalist development. Great Britain, which had led the way at the beginning of the century in point-time out the development of the capitalist development. BE IT FURTHER RESOLVED—That on account of the general and indefinitive meaning of the word "Social" and the little understood meaning of the word "Democratic", in this country, on account of the long and well known existence of a political party by the name of "Democratic", which has stood and now does stand for the direct opposite of the ineaning of the name.

RESOLVED—That we, for that reason, do object to the word "Democratic" in connection with our party name, Because we are Socialists we object to giving any excuse or pretext at all, whatsoever, to any one for calling us "Social Democrats". Therefore we most strenuously oppose the name, and furthermore we are opposed to any name that has not the complete word "Socialist" in it, for we love the name "Socialist" and are proud of it, and would be ashamed to hide or skulk behind any other name, even though it be that of "Social Democrat".

WE THEREFORE RECOMMEND to our comrades throughout his country and more especially to our comrades who will soon be assembled in convention, that, they adopt—the name "Socialist Party".

While the illogicality and inexpediy may be admitted, as also the onclevability of labor controlling in

lustry as "organized at present," the latter sentence is worthy of some consideration. "Labor has no stake in the results. This statement may be accepted as on the whole correct, under the present apitalist system. It is an extremely povenient argument to use against the laborers when they show any tend-

so applicable when the capitalist sysem is not threatened. "Labor has so stake in the results. But the employer has, and as a consequence is the only fit person to control and apportion. This is the difference between employer and laborer What then becomes of the doctrine so assiduously preached in the capitalist press, that the interests of employer and employe are identical? The employer is interested in the "results" of labor. The laborer has no interests theirin. Therefore their interests are

dentical. Quod erat demonstrandum!

"Labor has no stake in the results" of industry, as at present organized The present organization of industry is anitalistic that is to say it is based on the private ownership of the mean of production. Now it is a well-known article of capitalistic faith that under socialism the laborer would be deft without "incentive." He would be able ts get the whole product of his labor and would therefore have a "stake is the results." At present he has none The product of labor is no "incentive" centive" to the capitalist. Stelen fruit s sweet, but that which is homestly acquired is tasteless. "If labor (by which expression the working class is esignated) is unfit to control industry and apportion its fruits under the present system, it is evident that never will become "fit" until he system is abolished. If the employer is "fit" at the present time, it sclously assist in the abolition of the system. That task must be accomplished by the working class who ar only "unfit" while they assent to th continued existence of capitalist robbery. When they combine for its over throw, or in other words become socialists, they will, by declaring that "labor shall have a stake in the results," have announced their ."fitness," even according to capitalist standards.

The proceedings of the Convention which will meet at Indianapolis next veek, will be followed with intense inerest not only by thousands of members of organized socialist bodies, but also by thousands of individuals to whom the spectacle of a disunited party yet seems a sufficient excuse for helding aloof from active participation in to the laborer, but it is the sole "in- the movement. The outcome of this convention will form a reliable guage for that numerically large body who are inclined to wards socialism, but who are still out side its organized forces, to judge how far the professions of socialist writers. speakers and agitators coincide with their practice. Over and over again has it been reiterated by public exponents of socialism, that the cause they advocated was infinitely superior to the personalities and prejudices of individuals; that where the philosophy of so cialism based upon the class struggle was accepted, no bar towards union existed except such as could be dis tinctly traced to the personalities and prejudices aforesaid. This has been preached so lone and so persistently that we must naturally expect those who have heard it repeated over and over again to judge by the results of tion of the strike in bis hands still this convention whether our professions in this respect have been justified or

It is by this standard that we, in spite of ourselves, will be judged. Should we fall to pass the test, so much the worse for the cause we are upholding.

No sacrifice of principle is asked to It is agreed upon all hands that there are no theoretical differences between the various bodies of socialists organ ized on the political field. Differences of detail and tactics there may be, but in the face of the imperative necessity for unity now existing, these matters sink into utter significance. To some extent the personal factor may also have entered as a disturbing element. It can be and must be eliminated. Hundreds of active socialist workers demand that the handican of dissentient and warring factions, that have no real title to separate existence, shall be removed from the path, so that they may set about their work unfettered and unimpeded. Thousands of workingmen, now passive, are -waiting the results of the deliberations of this body, that they may in turn take part in ushering in the new era; while millions of workingmen who perhaps do not know of its existence will be at once brought within reach of socialism. if a solid unbroken line of battle is determined upon.

Unity can and must be obtained, and the Convention must see to it.

SILLY SEASON SENSATIONS.

The Chicago Tribune of last Sunday expresses surprise over the fact that while the "silly season" is now due. the lack of a suitable crop of "sensa-tions" is painfully apparent. The "kiss-ing bug" and the "shirtwaist man," relics of the preceding "zilly senson," though again impressed into service, have fallen flat, while the usual crop of "sea serpents," inter-planetary "airships," etc., peculiar to such periods, are remarkable by their absence. Howver, The Tribune does its little best to relieve the scarcity editorially the ancient fable that Marxian socialism is now obsolete in Ger-many. The writer of this production, "Count Andrew Bernstoff," of Perlin, whose name and title alone should be a guarantee of impartial judgment). by sheer force of hard king to show that the German Socialist movement has about reached its senith In order to demonstrate this, he as-serts that while the Socialist vote in 1893 showed an increase of 445,000 over the preceding election, that of 1898

showed an advance of only \$4,000.

Now the statistics of the German elections show that the Socialists in Germany polled 1,786,000 votes in 1893, and 2,125,000 in 1898,a clear gain of almost 240,000 votes. This amount. "Count" Bernstoff divides by four, and crease, and his figures are readily ac-

The growing solidarity of the prole tariat in France is strongly evidenced by the construction by the labor unions of the country of a grand palace of labor. The Associated Pres correspondent also conveniently forgot palace of labor originated with and received its chief support from the socialist organizations of Paris. From the fact that the employers of labor refused o contribute a single centime towards its construction, it is to be inferred that they appreciate the part which the new palace of labor will play in the coming proletarian revolution.

The capitalist press has discovered bugaboo which it is parading before the organized machinists in order to induce them to refrain from striking and remain good wage slaves. This cowardly and ridiculous letter should be repudiated. The workmen should at least have manhood enough to disayow the "leader" who would transform them from combatants to suppliants, after having stated to the world through the same -individual

their unalterable determination to fight the matter to a finish. They knew the weapons which their opponents would use, and knew also their own strength upon the chosen battleground. If this pusillanimous letter is permitted to pass unchallenged, the capitalist class will be justified in regarding their wage slaves not only as fools but as cowards likewise. Bhis latter charge has never before been leveled at the trades union movement, the history of its previous struggles with employers being one long record of heroic, (though too often useless), self sacrifices If Shaffer sees fit to play the baby act in thus beseeching the enemy for "consideration," the strikers can only escape the scorn

The Ladies' Auxiliary is making arrangements for a reception and entertainment to be accorded the delegates to the convention on their return from Indianapolis, on the night of August 10. A fine program will be provided, and probably five or ten minute speeches by each of the delegates. Refreshments will be served. Admission free, As the ladies propose to give a number of entertainments in, the future they are going to install a plano, as many vocallats who otherwise would be glad to appear will not do so without a plane accompaniment. We merely make this intimation so that the comrades may look forward with pleasurable anticipations to the presence of prima donhas and operatic stars of the first magnitude before Socialist audiences at the Temple on future occasions.

The Sunday evening meetings at the Temple will hereafter be advertised in the Daily News.

as for the future, whether we show ourselves as true comrades or whether we regard socialism simply as a means to obtain a gratification of all our ma-terial wants. If we believe in the re-deeming qualities of socialism; if the deeming qualities of socialism; it to co-operative commonwealth is to mean not only the abolition of want, and misery, but also a higher and nobler life, we must show a little more of the brotherly spirit in our daily intercours cate in our own hearts as much as possible the ignoble and mean weeds which the capitalist system has planted therein. And we must begin to practice more anaide day; than her fofore that fraternity, which can and ought to find ome in our ranks.

Let us no longer measure, how much wiser, graser and better we are, than our fellow beings, but let us measure by the standard of the highest manhood womanhood conceivable, how much we shall have to grow yet before we may indeed be satisfied with ourselves.

If we realize how small we are in reality, we shall be more disposed to give others their due. If we wish to become one united army of comrades, we mus hearn to know ourselves as others see us. The reward will be true brother hood and UNITY!

the najority are honorably diposed men. Few, however, are of that scientific pent of mind which leads men to fearessly follow a new line of reasoning and promulgate a conclusion regardless of consequences. For this reason, and others which will become apparent further on, it is rare that an editor omes known for his championship of any new theory in art, science or religion. The majority of newspaper men are the veriest intellectual chame leons who accommodate their mental processes and conclusions to the color of their environment with a facility quite often characterized by a word indicating a greater degree of turpitude than the term "adaptability." As an instance of this chameleon-like quality it may be observed that the newspaper man employed to keep up with the news of "business interests" will-, be found writing from the "business interests" standpoint. To get news he goes to the nkers, to the manufacturers, to the investers and to the other people included in the term "business interests" and by absorption, probably, he become capitalist ideas. To him a day of big bank clearings is the oversion for an editorial pasan, the rate of interest a subject for prayerful consideration, an almost wholly capitalistic, and being extensive order for goods a sign of extensive order for goods a sign of great numan chameleons, their methods of court unprecedented prosperity, and of thought—when they think—are capthe security market the SANCTUM italistic. Just follow a reporter on a strike "assignment" before condem-ning him for his capitalistically colorreport as it appears in the paper, reporter—he will probably be a ng man—is sent out by his city editor to "do" a street railway strike. To get his news "straight" and "official". he goes to the office of the manager and

"Charmed to see you, Mr. Penell-pusher," says the affable manager, "pray come into my private office and have a chair. Do you smoke? Yes? Well, here's one I can recommend. About the strike? Oh, yes. I imagi-ned you would be around and I drew

When the reporter is bowed out smoking his perfects and full of proud gratification at the distinguished consideration and courtcous attention paid him, he heads for strike headquarters "to get both sides of the question." Imagine the contrast! Instead of being obsequiously unhered into a luxurfously appointed office and given a fragrant cigar, he probably is compelled to climb (wo or

Another feature worthy of mentimust of necessity be influenced in tone by the source from which it comes. Of ourse there are some newspaper men who will promulgate, for a material consideration, certain information calulated to advance corrupt interests, but these men have no standing in the news-gathering fraternity-afraternity generally speaking, of happy-go-lucky, generous fellows who sail along writing of current events as gracefully as the swan on the bosom of a lake and as unconscious, as a critic said of Senator Jo Blackburn, of the depthy beneath.

There is nothing admirable in the igsure, but it is natural. According to their lights they are fair in presenting the merits of any particular controversy. It never occurs to them that they have anything in common with the working class. Their environment is enabled to live as the rich live. They are admitted to the rich man's club, inrich man's daughter in marriage, some-times, and are generally made to feel so much at home in plutocratic sur-roundings that it would be a marvel it they failed to invariably speak of esp-italistic interests as "our" interests. The world for them is the little world in which they move and have their being, and the great world outside in which the "great unwashed" live and dielike beasts is to them a world unknown except by report from their wothrough lorgnettes, or from others who "go in" for charity or "sociology."

The ordinary editorial writer for
American newspapers is so grossly ig-

norant of the great international work ing class movement—so entirely oblivious, even, of the struggles and the union movement in this country-that the editorial discussions of the con-ficts between "labor and capital" would be amusing if they were not as per-nicious as the consequences that fol-low when the fool who "didn't know it Their our reporter is handed a nest-typewritten interview beginning: Manager Goodman, on being approch-ers who feel a sympathy for the workshould make the workingman, like th saute politician, pray to be delivered from his fool friends. riot, the matter becomes one of grave significance.

It should be evident to the better class of workingmen, who are capable of thinking consecutively, that the ten dencies of development now at work in the labor movement are full of danger, and that wider leadership is needed to avert disaster to the interests of all classes of society. A little whole-some self-assertion on the part of those who abhor SOCIALISTIC HERESIES and do not feel that the red flag of ansarchy is the only banner they are called upon to respect, would have a marked influence in restraining the excesses of those who are leading the cannot exist. No. They should "deem it a pleasure," which I took. It simply shows as state militiamen, to make themcomplete is the enslavement themselves as possible! They should not be deprived of the "right" to pernot be deprived of the "right" to perform this "duty." This is the sort of logic prepared by knaves for have been punished. If he does the consumption of fools.

The following thoroughly class-con- uniform of a militiaman while the solous editorial is taken from the butchery is in progress. Such a one is badly needed—by the capitalists.

Many a manufacturer in the various industries is repeating the question to thinself over and over again: Will the labor fakir is on the decline. His "wholesome! assertiveness" is belabor troubles affect my business? Will, through sympathetic strikes, the whole of industrial America be drawn in?

The fact of this demonstrates the From the above it may be inferred

Will, through sympathetic strikes, the whole of industrial America be drawn in?

The fear of this demonstrates the close relations which exist between the various industries, and we may view with alsom the dictatorial position assumed by organized labor.

That there is a growing tendency on the part of organized labor.

That there is a growing tendency on the part of organized labor to impose upon members of local unions obligations inconsistent with those of good citizenship is shown by the recent incorporation into the constitution of the "benevolent" branch of, the Amaiga mated Sheet Metal Workers Association of the following amendment:

"Any person a member of the regular army or navy, or of the state militia or naval reserves, shall not be elicible to membership in this association who shall become a member of either one of the above named bodies must tender his resignation of membership to the association at once."

The obvious meaning of this clause is No member of this union is permitted to put himself in a position where where he may be called upon to protect life and property or to restrain the excesses of mobs. The STATE MILITIA have on more than one occasion been called upon to supplement the

marked influence in restraining the excesses of those who are leading the chanic and loyal citizen cannot follow without declaring himself an enemy to social order, and good government. Never was the need of a great, wise far-sighted leader so exigent as it is now in the field of organized labor.

In reading between the lines of the above, several interesting facts leap to light. The first is the admission that the supremacy of the capitalist class is largely dependent upon the stupid physical force of the workers themselves. Unless the trades unionist is willing to stuitify himself by enlisting in the militia, capitalist law and property is at once imperilled, which means in plain English that when the working class come to their senses, the doom of the present economic system is assured.

If any member of a trades union wishes to get an exact estimate of the intelligence with which he is credited by his masters, he may find it in the words which we have capitalized in the above editorial. First, it is admitted that the state militia have "made themselves extremely inconvenient to the selves extremely inconvenient to the

hard to discover even in this country the evidences of a subtle growth of the opinion that democracy is a failure. In pursuance of the "divide and conquer" policy much is being made of the return of Bernstein to Berlin, as this Associated Press dispatch shows:

"Berlin, Nay 20.—Herr Eduard Bernstein, the well-known socialist writer, who-recently returned to Germany after many years of banishment, the greater part of which he passed in London, today addressed the Social Science Society of the University of Berlin, Discussing scientific socialism he said that the principles of Karl Marx were and Capitol Ave., and took possession of the spacious hall which had been provided as the seat of their delibera-tions. The Chairman of the Committee of Afrangements, Comrade Kelly of Marion, Ind., called the meeting to order punctually at 10 a.m. and after welcoming the delegates in a short and well chosen sidiress, read the call for the convention, after which Compade G. The election of the different committees proceeded most harmoniously, and although discussion at times became lively, a spirit of mutual concession based-upon the general desire for unity was observable amongst the delegates, which augurs well for the successful termination of the entire precedings. Committees on pictform, constitution, and resolutions, will report tomorrow morning. Several delegates are yet expected to arrive. It is the general opinion amongst those participating in the events of today that a new era in the socialist movement-inay be dated from this convention, that internal dissensions will disappear and a solid, united, party will assue forth to carry on the struggle against capitalism.

A TALE WITHOUT A MORAL

Le Petit Sou, a French socialist pe per relates the following incident: The hall had devestated the vine-

ards and fields. The grain crop, cut and blown down, was almost destroyed. The tender young vines of the grapes were trailing on the ground and the fruit trees lifted their bare branches imploringly to the sky.

On the door steps, on the stones by the wayside, men and women were sitting in tears. 'They hardly stirred. The udden blow had crushed all their fond ms. The ruined crops meant hunger and privation for them.

A stranger, touched by the grief of the poor people, stopped and expressed compassion to an old whitehaired an who was gloomly sitting on the rsiep of his dingy little house,

"Ah, monsieur," answered the bid fellow, "we poor people don't lose much But think of the rich. How will they pay their taxes?"

To the Editor of the Chicago Chron-

Chicago, July 25.—Simmered down, it Chicago, July 25.—Simmered down, it seems to me that the question involved in the steel strikes is merely as to whether men working in nonunion mills, because they do not want to join the unions, shall be forced to "unionize" as it is called. Many mills are operated by nonunion men who desire to keep out of the unions for various reasons. One reason is the expense of sestaining the unions with their bigh salaried of facers and strike leaders. Another manon is that they want to be irriencedent—at liberty to work sherryer they can and an acceptable job with salisfactory any—and not under the orders of a strike leader who may call them out at any time whether they want to go out or not. Substantially the object of the strike is to bring every steelworker under the orders of the strike can, who out or not. Socialist party was accomplished at Indianapolis. State autonomy is a large measure was provided for by the Constitution adopted. Immediate demands were retained in the platform. Government of the national party was providod for by a committee consisting of one unber from each state with an executive committee of five selected from the city in which headquarters might be established.

As the Call went to press the place of national headquarters had not been selected but the indications were that it be some other city than Chicago or New York. St. Louis and Cleveland seem to be favorites."

When the convention was called to order Monday morning, George D. Herron was selected as chairman. He presided during the day. James & Carey was contrmon Tuesday and Max Hayes handled the gavel on Wednesday. Wm. Malily of New York was secretary and Frederick Strickland assisjant secret-

Committees were appointed representing each faction and when the credentical committee reported it announced about 4,700 members of the Springfield faction, 1,300 of the Chicago faction and 400 delegates representing state organizations

The great fight of the convention was over the question as to whether or not immediate demands should be in the platform. In the report of the platform committee eight immediate de-mands were attached to the platform, It was presented to the convention by Morris Hillquit of New York; representing the majority of the committee. A. M. Simons of Chicago, for the minority, moved that the immediate demands be striken from the platform.

In the debate that followed nearly all of the Chicago comrades took part, all speaking against the immediate demand except Morgan, who favored claiming that leaving them out was drifting towards anarchism. Morgan explained that he was instructed against them by the general committee of Chicago but did not consider the instructions binding. Other Chicago comrades, who voted against the demands. explained that they felt justified in violating instructions for the sake of unity.

Those voting for immediate de were Richter, Simons, Klenke, Morgan,

As they cannot be "seen" in secret conclaves it is not likely that any other induceold and very effective one of "obey of the surplus value created by them for Morgan and the power of honger creat-ed by Morgan for them, they will finally be obliged to take what he offers or get off the earth.

It is one of the strange things which we socialists wonder at, that a body of of co-operation by their wonderful unions, the fruit of capitalist concentration, and disciplined to make the most extreme sacrifices for this union, stand face to face with another product of economic evolution without taking the hint and tracing this evolution backward. It is difflicult to understand how these men can fail to see, that by bestowing on Morgan the enormous values which they create they are depriving themselves and their famillies more difficult to comprehend how this well disciplined army of workers will patiently watch the sufferings of their loved ones and finally crawl back to their dreary and joyless task's for the sake of earning the contents of a full dinner-pall, when they could have the

whole earth for the asking. .
Of course, we understand that men who are worked from dawn till dusk, whos life is wrapped up in the words; toil, swallow your food, and sleep, have neither the strength nor the leisure to study the problems of political econignorance. But the men who are their chosen feaders, whose duty it is to be familiar with all the means that may lead their cause to victory, these men must know that industrial organization alone is not sufficient to vanquish cap-ital. They must know, that Morgan can starve them into submission any time he wants to. They must know that, if he makes any concessions to the unions, he does so not because he fears the unions, but because he is afraid of losing money by the strike. These leaders, unless they are absolutely blind and still living in medieval conceptions of history, must know enough of modern economics to see; that the fight of labor against capital can be fought to a successful finish only on the political tunity for educating the working people politically os the labor leaders have. If the do not do so, they are either political beelers of the old laborskip ning parties or venerable moss In both cases, they are unfit for the positions they are holding.

NATIONAL LETTER WRITING.

A Few Parodies and Some Friendly Ad

"Of \$0 millions of Americans", says the Chicago American of July 28, 'at least 99 per cent believe that Admiral Schley is a brave officer, deserving of the nation's gratitude". And our contemporary suggests that its readers write a letter to the president demanding justice for Schley. We do not know how the Chicago

American obtained his information d of the mer women and children that make up 99 per cent of the population. But we do know that the war which gave rise to Schley-Sampson incident was fought in the interest of one per cent of the population. And we know furthermore that just at present 88 per eent of the population must get along as best they can with about 13 per cent of the national wealth, and have very little time to be conscious of anything else but the ever threatening bread and butter question. This part of the population has no interest in the jealous in-trigues of the class to which Schley and

Sampson belong.
But we like the blex of writing to the president, and we like the style of the letter published in the Chicago Amercan so well, that we adopt it in the following letters, which we recomm to the kind consideration of our read-

LETTER TO THE PRESIDENT. President McKinley, Canton, Ohio. Dear Sir:

I protest as an American against infamous treatment of the working people. I protest against the license that has been granted to industrial magnates through the courts, senates, legislatures and municipal bodies all of them representatives of the ruling class-to exploit, enslave, starve and bully the producing majority of Amer ican citizens. If injunctions are to be issued they should be aimed, not at the people who serve the world by toiling gallantly for starvation wages in the midst of plenty, but at the members of the class who for the sake of private profit tax the overwhelming majority for the use of the collectively manipulated instruments of production and distribution, such as land, mines, machines, railroads, ships, telegraphs etc.

You are unable to understand and cope with the problems of modern economic evolution. Previous to the last national election it was declared that expansion was the supreme issue, and that prosperity, would follow the tension of our foreign markets, to the glory of America. But expansion has tightened the grip of your class on the throats of the working people who in spite of increased productivity live in wretchedness and must STRIKE for higher wages as before. I and my fellow workers will see to it that you and your class are depried of the power you have abused so long. fact that you and your brother exploitere were permitted to carry on your gruesome dealings so long is only ex-plained by the abject misery and exhaustion of the masses.

But the people of the United States at last recognize the true situation. They remember that whenever govern ments become destructive of the ends for which they are designed, it is the right of the people to adopt such measures as to them seem best for the realization of their aims.

The chosen prepresentatives of the people, their teachers and advisers are guilty, not the people. You, Mr. President, are the chief representative of your class. In addressing you, we warn your whole class that your reign is at an end.

If onemillion class conscious workers will in this way honor the President and the members of Congress with their attention and be prepared to back up their letters at the polls, then the heads that now are worn too high to see the sufferings of the tollers will be a trifle lowered.
Such letters, although they are noth-

ing but simple protests, will help their writers as well as the persons addressed to gain a clearer view of the situation. The following letter, e. g., would be a good writing exercice for the striking employees of the Steel Trust:

ANOTHER LETTER. President Shaffer-

Dear Sir: 'I protest as a member o the Amalgamated Association against the infamous treatment to which you submit us by your management of our affairs. I and my fellow workers are tired of being exploited, overworked, insulted and bullied. In the name of our families, we demand the right to dispose of the product of our labor in such a manner as we shall see fit to decide. I wish I could inspire you with som of my own enthusiasm for socialism. 1 would not ask you to sacrifice your life for the cause. That will not be sary if you understand the flexibility who occupies a pulpit enjoys a vantage ground where he may say dangerous things in such an elegant way as to disarm all suspicion. If a whole battalion of Christian Endeavor clergymer were to use their strength to brush the Movement in Favor of Ignorance they would be a great blessing ened to and investigated a great many 'Isms," and I find that socialism beats them all. I may truthfully say it is the paragon of studies and the most onderful legacy that has been handed down from the ages. I am as thoroug ly agnostic or atheistic as any one can be, but sociology has revealed the veiled mystery of "The Great Spirit" to me nore satisfactorily than any other line of study. With our limited range of of study. With our limited range of psychlogical moment ever comes to you vision I do not believe we can sum it by study, inspiration, revelation or up any better than to say that: "The Great Spirit is chiefly constituted of several millions of human beings." 'Tis a good explanation I think Socialist for the old and unexplained hazy doctrine that God is everywhere and sees into everything.

Socialists become pretty near being concentrated deities, for they are witesses and recording angels of the in iquities practised by the rich upon the poorer classes. Kaiser Wilhelm's favorite aphorism is: "Fear Me. God. and (the Socialists). Translated it means State, Church, and The People. There you are, now take your choice. Heaven is paved with the bodies of the Working People. We won't mention what the other place is paved with for we do not wish to re call the abominable idea with which the ministry formerly inspired terror within motherly minds. Spirits are very clusive creatures, although with a little more freedom of speech I think we may finally secure a more graphic and truthful description concerning them. Millions of human beings are suffering today and every day untold agony simply because the right mes sage is withheld from the world. Em ulating the egotistical manner of Doctrinaires, I would like to declare that Socialism is the great and only message that is right and perfectly proper to deliver to the people

What are the points to be achieved A great many, but the principal one is: that the wage earner receive a large share of the profits according from his labor. Unless you are willing to concede that point, (and I think you do in your mind), you must expect nothing but the destruction of every cardinal virtue which you as a clergyman en deavor to preserve. I will cite Carnegie as a notorious example of a wolf in lamb's clothing. He made a clear lamb's clothing. profit, or reaped a harvest from \$10 to \$20 off each laboring man in his employ every day the poor sinner labored. The Great Middle Class at present do not pay much heed to Socialists' contentions. In a few years, however, they will show their agility by scrambling over into the ranks of the Socialists and ask no quesions whether rght or wrong. How about the clerical workmen? They are more or less hampered and confined in their thoughts and utterances by the slow advancement of their audiences. We see a few leading lights break away from the crooked, narrow path of capi-talistic rectitude to join Socialism. Prof.Herron's domestic rupture was but a drop in the bucket compared with his open rupture against capitalism. Now that Glant Labor has begun to burst out of his bondage we expect ruptures will occur and recur with alarming fre quency. The daily press is discussing in an whether golf is or is not injurious to the human race. One journal, the Chicago Tribune, says editorfally, that the game is justly regarded as being among the most healthful of sports for men and women of all ages. It further adds that "it is possible to walk six or seven miles in playing eighteen holes, and when a man of heavy weight and ador three tmes in a day he may get more exercise than is good for his health." Our friend Draggles, who is considered an authority on all such subjects tells us, however, that for genuine strenuousness the same of golf is not ace high to the game he plays every morning which is vulgarly called "chasing a job". However, it is morally certain that no matter how demoralizing golf may be to the physical wellbeing of our masters, there is no immediate danger of its baneful influence being felt on the working class. Thanks to the needs of our masters, we have no time for such nonsense

Poisonous jellyflish are said to be a source of much annoyance to the bathers at the Atlantic summer resorts. The Chicago Tribune used up half of one of its editorial columns Wednesday deprecating in feeling tones the plight of the disappointed pleasure seekers. It says, "In one day at a single beach more than a hundred bathers found themselves poisoned by contact with jellyfish, and their arms and legs frightfully swollen." Surely this is a calamity which will evoke sympathy from every man and woman in the land. How fortunate, indeed are those of the working class whose kind mast-ers have with such generous forethought removed the temptation to spend the summer on the seacoast, where they would be exposed to all the slimy and noxious horrors of the deep.

The Socialist members of the Belgian chamber of deputies indulged in another "riot" Tuesday. The press dispatches state that they shouted "Vive la Republique," Down with the pasteboard king," etc., and sang "The Marseillaise." This conduct is truely deprecable, and as the dispatches continue "is embarrassing to the government." Such occurrences as this, while quite innocent in themselves, are embarrassing in that they remind the Belgian government of the political crater which is slumbering in that country. This conduct on the part of the Socialists in Belgium is excusable on the ground that they are justly confident in their position. If it were not for the armies of her powerful neighbors Belgium would set up the Socialist republic tomorrow. Even the army of Belgium is so impregnated with socialism that the soldiers refuse to fire on strikers when ordered to do so by the manding general.

It is now reported that the Standard Oll company is laying plans to control the cattle trade of the world, and that within ten years this will have been the scheme should not succeed, provided the capitalist politicians can hold the voting cattle in line while John D. secures their four-footed brethren.

It is stated that the striking steel workers have selected Mark Hanna to Pierpont Morgan, Evidently Hearst's pictorial representations of Hanna acting as "Nursie" in the "Trust" house-hold have had some influence in determining this choice on the part of the strikers. If the master cannot be ap-proached it is commonly supposed that the next best step is to enlist the serv-ices of the "domestic."

Socialism and Immediate Demands.

By Henry Slobodiu. From The Workers

(Concluded.)

Public Ownership .- No measure conamends itself more to the good will of the Socialists than the demand of public ownership of public franchises It cannot be expected that all public franchises should be municipalized at e, hence stress is made on the municipulization of some, as railways. Now It is contended by these who desire that the Scelal Democratic Party make a special issue and campaign for inicipalization of the rallways that the realization of this measure would-1. Through the improvement of the condition of the railway workers ameliorate the condition of the working class gen-2. Be a concrete example of public ownership and make Socialism popular. At of which will, no doubt brought about by the municipaliza tion of railways provided the revolutionary attitude of the working class as represented in a revolutionary So cialist party forces into the realization of this measure a truly progressive spirit. We have reason as well as pre-cedent to prove that, otherwise the nunicipalization of railways may constitute a reactionary measure wrought with danger for Socialism.

Should the Socialist party give its unreserved approval to the municipalization of railways, without making distinction or reserve, it will lose the right to protest against the corruption and peculation which must necessarily ensue upon the realization of any So cialistic measure within the present system. For our opponents will con-tend, as they do now, that official cor ruption is the inherent characteristic d unavoidable concomitant of all Socialistic measures, and that Socialism may be judged accordingly. "If you did not know" they will tell us, "that corruption must ensue upon the realiration of your measure, then the events prove that you were ignorant; if you dld not know then they prove that you

are bad public advisers. But a far more formidable danger then official corruption lies in the enstrangement of the rallway workers, ensuing upon the municipalization of railways, from the working class. It is natural that the workers on the rallways are much susceptible to the Socialist arguments and present a prom ising field for Socialist propaganda. Should the chief aim and object of the Socialist party-the overthrow of capttalism, the abolition of wage slavery and the establishing of a Socialist nonwealth-be relegated to the rear, or be used as rhetorical phrases on selemn occasions only; should the of the Socialist party reolve fiself chiefly to dabbling in municipal ownership: should the character of our propaganda become "practical," "evolutionary," "constructive," and a whole lot of other abused words of dly smooth and peaceful import; then the state of mind of those such propaganda will 1501: vert to Socialism will also be of the eminently "practical," "evolutionary," "constructive" and "contended with a speak of the revolutionary character of the party and the militant attitude of the working class, it is the general state of mind of the workingmen that is meant. ist institution has deprived the working class of the intelligent co-operation of the letter carriers, and, has lent them to the support of the exploiters. If the same system of extending Socialist institutions is pursued, private explanation may find itself all more comfortably entrenched behind the bulwark of such institutions, and Socialism will find the most formidable foe in the rank's of these institutions. They will fill the ranks of the ntilitia deserted by the workingmen, and will in other ways lend themselves as instruments of oppression. Hence mere propaganda of "practical" Escialism, a campaign of "immediate de mands" will not only retard the realization of these demands, but upon realization will produce such a specisen of bastard Socialism, which even the putative parent will only be too glad to disown. On the, other hand the propaganda of revolutionary and class-conscious Socialism that lays no stress on ameliorative measures, but demands the unconditional surrender of the capitalist class, will not only hasten the realization of such measures, but will result in a proud spirit of class-consciousness prevalent in the working class, that will preclude the possibility of any of its advanced sections lending itself as an instrument of oppression, and in the belligerent attitude of the Socialist party that will not permit the capitalist class to tamper with the realization of the amelior-Shorter Hours .- As there is no mea-

ure which is of such vital importance to the working class, so is there one which affords so many loop-hole, through which the capitalists can defeat, at least in a large part, the object of shorter hours—the Intended respite for the workingman. The cheif object of the capitalist lies not in long hours for his laborer, but in securing from him the largest amount of labor power. Should it be proven to him that he will be in a position to compensate himself for the shortening of the labor, ne will be willing to join a philantropic shorter hours league, and to vote for platform containing such immediate demand. It may be that the motorman on the Broadway car works fewer hours than the driver of the former Broadway horse line, but if the mount of energy spent by each during a day could be compared, it would be proven that the motorman requires an appallingly greater amount of energy for his day's work than the former driver required for his. It would be instructive to compare the mortality among the mortormen with that of the drivers. It may not be known that the motorman does not enjoy a long life, though it is well known

that he does not enjoy his short one. It just happened that in the course f my perusal of the daily paper, after the above was written, I came across the following striking sub-editorial in

the New York "Times" of July 11, "Attention is called by one of th English trade papers to a new and peculiar trouble among the cetton operatives in Lancashire, a result of the shorter working day which the labor unions of the district have sucreded in establishing. A system of overdriving is said to be growing up, and according to the reports of the laor leaders it is fast becoming intolerable. The foremen, or "overlookers," recive a percentage on the earnings of the weavers under their control, and it is asserted that these overlook-ers go afound the mills with a slate to note what each weaver has earned, and put in a conspicuous place on pay day the amount each operative has closets. I saw these tenements teeming earned on the looms. Opposite the with families of laborers only. A carpenter, for 'instance, sald, the other day, that the supervision of the men in his trade is now those sections of society that have, or think they have, an interest in the con-servation of the standing regime will not only not lend themselves to its overthrow, but will oppose such over-throw. Certainly in this case the overbe, and any relaxation of, activity in working hours is instantly noticed and reprehended by the bosses, who make every effort to prevent the shortening of the day from increasing the ex-penses of production. As a conse-quence the added hours of leisure are gained at the cost of a weariness equal to, if not greater than, that which folthat to understand this plain proposi-tion requires a higher conception of class interests than a propaganda of "practical" Socialism is likely to lend to the workingmen. These same letter carriers tremble in sheer terror at the thought that the powers that be may suspect them of sympathy with the working class. Not only have they de-clined to join it is workingmen of New York in celebrating the May Day, but have even refus if to mend their brass band to the cipht-hour May Day par-sde in New York. It speaks volumes for the progressive spirit of our "practicals" that it devolves on the New York "Times" to point out to them that one of 'their most important measures of emelloration secures no practical relief to the workingmen, except so much of it as they suceed in obtaining through

REAL ADVANTAGE TO THEM:"

But the increased intensity of labo is not the only way in which new burdens are imposed on the working class o as to compensate the capitalist class for the loss which it would have otherwise sustained through the shortening of the labor day, and which nullify the object of the shorter day-the conserv ation of the energy of the workingman. The growth of population and the introduction of newer machinery make the conditions of modern preside tion ever more complex and impose ever new burdens on production. There are more than one way in which the capitalist manage to shift the burden ingman was living near the factory he required only a few minutes for going to and coming from work. But with the congestion of the industrial disricts and proportionate increase in ent, the workingman is forced to the suburbs situated at the great distance from his place of work. The result is vork process consumes nearly all of workingman from his work and sleep. A workingman of any large city will problem of no small moment to him, ist party. Parks, Playgrounds, Etc.-To no of amelieration are the old their support as to the extension of the parks and playgrounds. It tickles the vanity of the reforming fraternity to have their "goodness" perpetuated in such concrete evidence as parks and playgrounds. There is no doubt that it is a blessing, but being a capitalistic blessing it bears on its an evolutionary-fatalistic process as the brow the curse of Cain. The extension of park and playground area, though not the sole cause, nevertheless greatly contributes to testify one of the unmitigated curses that beset the workingman-the overcrowding of the dwellin area. During the last ten years I was a dweller of the tenements of the mos unspeakable tenement district in the world. I saw old, rickety but roomy ramshakles give place to rickety tenements with "modern improve the improvement consisting in that the parks introduced, and I saw the size of the closet rooms palpably dwindling in a ring around the amount carned is area. Capitalist Literature. (Continued from page 1)

The Associated Press does not waste cable toils in telegraphing foreign matter of purely local interest to the United States and it is clear that the Bernstein revival is lutended to sow eds of discord not alone among the scialists of Germany, but of the Un-

ited States as well.

This anti-socialist tone in the foreign dispatches may naturally be expected to characterize more and more the press utterances in the United States as the evidences of the socialist movement's growth become more apparent. Beartween newsgatherer and efficial and the fact that the official is a part of that state, which is the instrument of the capitalist class, it is not difficult to see how the alarm of the capitalists will be communicated to the press. Social-ists cannot too soon realize that they will not receive any aid from the press as it exists at present, and this fact cannot be too trongly emphasized. In ie socialist quarters there has been a disposition to put some store by "so-cialistic" utterances in certain papers, but it is worse than folly to expect any permanent and unequivocal champion-ship of the working class cause from this section of the press which entices the workers puly to betray them. The newspapers are mere parasites of the capitalist order, bifong as the capitalist order is strong and weak as that order is weak, and they may be depended on not to assist in killing the goose hich lays for them the golden egg. While editorial writers are allowed wide discretion in their discussions, the counting room idea of "a free press", is the idea that prevails when there is conflict between counting room and editorial room. Let the counting room see the revenue decreasing as a result of editorial oseaults on "business inter ests" and those assaults will cease in stanter. If the editorial writers cannot harmonize their opinions with counting room opinions other editorial writers not so stiff necked will be found. The only hope of an adequate repre-sentation of the socialist movement in the field of journalism is the establishment of a socialist press, frankly revolationary, giving daily the news of the working-class movement in all its phasof the enemy, exchanging blow for blow and stending ever as the unpurchasable Democracy, the Co-operative Commo

THE SILVER CROSS

The Carpenter of Nazareth

.... EUGENE SUE,

PREFACE.

Eugene Sne wrote in French a monumental work: "The Mysteries of the People," or "History of a Proletarian Family." It is a "work of fiction;" yet it is the best universal history extant: better than any work, avowedly on history, it graphically traces the special features of the several systems of class-rule as they have succeeded each other from epoch to epoch, together with the nature of the struggle between the contending classes. The "Law," "Order," "Patriotism," "Religion," etc., etc., that each processive tyractellast despute its change of form, by tagging laws. that each successive tyrant class, despite its change of form, hysterically sought refuge in to justify its criminal existence whenever threatened; the varying economic causes of the oppression of the toilers; the mistakes incurred by these in their struggles for redress; the varying fortunes of the conflict—; all these social dramas are therein reproduced in a majestic series of "historic novels," covering leading and successive episodes in the historic area. history of the race.

The work here published in English garb is one of these historic novels. It is chosen because of its singular fitness to modern times in novels. It is chosen because of its singular fitness to modern times in one important respect:—the unity of action of the oppressors, despite hostile politico-material interests and clashing religious views; the hypocrisy that typities them all; the oneness of fundemental purpose that animates pulpit, professional chair or public office in possession of a plundering class; and, last not least, the identity of the methods pursued and the pretences seised by the plundering and ruling class, at that long ago critical period in the history of the human race, when the pre-feudal colossus of the Roman Empire was by force of its own power, beginning to strangle itself, and, at the present or third critical period, when the grand-child of that Roman System and child of Feudaltsm. Capitalism. is now in turn, likewise by virtue of its own ripened colossal power, throttling itself to death, and, with its death threes, heralding the advect of a new civilization—the Socialist Social System.

of a new civilization—the Socialist Social System. "The Silver Cross," or "The Carpenter of Nazareth," is a pathetic page from history that holds the mirror up to the Capitalist Class-its orators, pulpiteers, politicans, lawyers, together with all its other menials of high and low degree—, and, by the reflection cast, enlightens and waras.

is their opinion that administrative mensures should be taken only in a special session of the ministry of the interior as provided by sections 32 to 34 of the Rules for providing measures of safety. But the said ministers do not object to the participation of a director of the ministry of war in the proceedings of such processes against Jews, for the purpose of taking better care of the interests of the military, As to the question of fines and executions, the ministers of the interior and of justice hold that these measures are in contradiction with the fundamental provisions of criminal law, according to which every one is responsible for himself alone. In applying such measures innocent people would suffer. In regard to assigning such processes to a court martial the minister of the interior is willing to accept this measure but only for the reasons given in the draft of the commission bill. The minister of justice, however, wholly rejects this measure, because the court martial, in having judgment by genera law, has no privileges over the civil court. Judgement by court martial is admissible only in the cases enumerated by the rules for providing measures of safety. As to the other suggestions of the commission the two ministers agree with the minister of war that the increase of the penalties for insulting military persons must be realized by general measures. But they must not offned to Jews alone. As in the provisions of the criminal code the nalties for insults have been considerably increased and extra penalties for insulting military authorities have been inserted, with a special consider ation of the wishes of the minister of war, the minister of justice does no alties for insulting military persons. Capitalism and Militarism are closely related. One takes the part of the other. In order to protect profit, the soldier must shoot his friends and re-latives. And when the latter defend themselves, even though only in words, then this "insolence" is punished by the lawless laws of war.

The "Insolence of Jews" serves pretext to club down the class conscious labor movement behind it. But this tyrannical and criminal aggression will be wrecked on the herolo bravery of the awakening proletariat.—From "Vor-

A SELF DESTRUCTIVE PLEA.

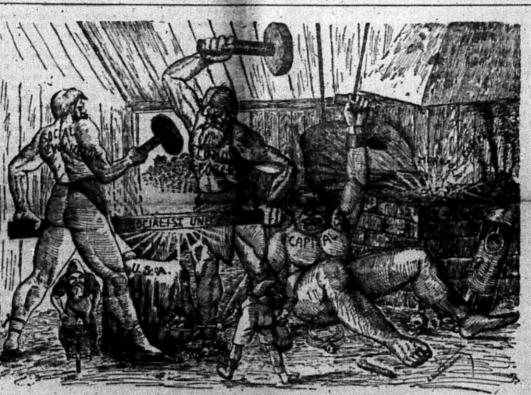

Says (Workingmen Have no Concern with the Employer's Profit, but "the Public" Has.

In commenting upon the strike of the steel-workers, the editor of the New World, the official organ of the Catholic Church in the archdiocese of Chicago, says that in substance the masters claim is, that if a man get such wages as the conditions of the labor market force him to accept, he gets all he is entitled to, and it is none of his busine if his employers are making 200 percent

on their 'investment. He continues,
"if that were indeed the last word to
be said for capitalism, it would be hard to answer the socialists. But this is not the last word that can be said for capitalism. There is such a thing as a just rate of wages, but that rate of wages can not be determined until the men and the public know certain things which, for the present, the employers seem determined they shall not kr Here then is an "answer" to the so cialists, who otherwise would be hard to answer. This champion of capitalism comes forward to say that if cer-tain questions, which can only be answered by the employers, were publicly answered, a "just wage" could be determined, but he says they refuse to answer, saying, "it is none of your business." Notwithstanding this statement he goes on and says that the strongest argument in favor of consolidation of the instruments of duction is that the public have be grounds for insisting on the publicity which he places so much faith in. "This claim will have to be conceded if our his windup. Now, if the steel mas were only as wise as this editor, we not the present "beloved" system smoothly? called to the fact that there are two orts of ability, both of which are ometimes found in the individual "business man," but only one of which is really essential in these latter days; thropist to meddle with the matter in to "business sucess." The knowledge of mechanical processes is indispensa ble to the wage earner, but by no means to the capitalist. The ability which is really indispensable to th capitalist consists mainly in BUYING the raw material and SELLING the finished product, and the distinction between a "set of finishing rolls and a puddler's bosh" does not in the least enter into this sphere of ability. Wage arners who are part of the raw m terial which the capitalist must know how to purchase, supply the necessary mechanical knowledge, which is, under present conditions quite secondary to the art of buying and selling

Frank Collier was wiser than many who are not insune; he knew enough to make a living without work.

It is surprising how good all the women who oppose the servant girl's union are to the girls they employ.

Tax shirkers lie under oath as fluently as they do in making a business deal. Then they talk of the immorality of the lower classes.

The Socialist party has really got to be a movement of some importance when it can regard DeLeon as but a fly on the wheel of progress, Rockefeller is going to build a castle,

but his back will not bend for the lifting of a single stone. Others will build t and he will own it. A Denver preacher got red in the

face declaring the labor trust was as bad as any other trust but it was only the labor trust he wanted to smash. The best part of the joke is that

some people really think the board of review wants to get at the taxable Socialists are not all of one mind in

regard to details, so charity should govern all our actions during these days of the re-forming of the party.

Small business men of Chicago have quit fighting the trust and have decided to form one of their own; the world will also have to learn the same lesson,

The mayor of San Francisco was not able to settle the strike of the dock hands, probably because he was not in a position to promise the men the wages they asked for.

In China the old men fly kites; in America they do chores about the poornouse unless they happen to have an arrangement for exploiting a number of younger men.

There is need for the work of every nan who understands socialism and wants to bring it about. The field in Chicago is not only large but it is ready for the harvest. Corn King Phillips did not do a sin-

gle day's useful work to secure the fortune that other men are trying to get from him without themselves engaging in productive industry.

It transpires that the members of the ity council all hold passes, a fact known to everyone, but it is a good the capitalist idea of morals,

Now that unity is practically acd omplished the circulation of the Work ers' Call should at once be doubled in hicago. The workers are here to do it if they will work,

Chicago has no election this fall but every socialist that it makes and does thorough job of the same, will keep over very nicely without spoiling until

It does not matter so much about the democratic platform as some democrats think. In a year or two-that party will e united with republicans and the platform will be anything to stop so-

It was probably a matter of form that President McKinley cabled Emperor William that his mother had endeared herself to the American people, but even though it was form, there are many who would like to protest.

When the day comes that J. Pierpont the battle for socialism will be w and that day will come as soon as the workingmen understand the philosophy of the class struggle.

How badly the press and the pulpit feel because the steel workers will lo several thousand dollars each week by striking. They have no sympathy at all it would appear for the capitalist who is going to lose his interest in the surplus value of the workingmen's work during that time.

WEST SIDE.

For the past three weeks agitation has been rather slow on the West Side partly owing to the hot weather and partly to the fact that the Division Organizer was absent for two weeks visiting the various locals throughout the state and attending the Indianapolis Convention. But last Saturday Street and Milwaukee Avenue an au-dience completely filling the street listened to an address upon cocialism from Comrade Klenke. An inquiry about the Indianapolls Convention brought out the reply that all Socialist forces had en merged into one under the name Socialist Party and that this in turn would force the expitalists to also unite no party, thus making the issue in 1904, Capitalism versus Socialism., This

On Sunday three meetings' were held: the first at North and California Aves. where 666 people gathered to hear Comrades Goodspeed, Bartels and Klenke, results were as follows: 200 Calls sold, \$3.50 for literature, a collection of \$4.27 and 3 Call Cards sold by Comrade

At the same time Comrade Collins spoke to a large audience at Union Park. Comrades in this locality are requested to be present at these meetings and help out the speakers sent

On Sunday evening a large meeting was held at the corner of Madison and Peoria Streets after a gang of misaries had held the fort until the crowd grew impatient and asked Comrade Klenke to get on a dry goods box and "throw it into them"; which was accordingly done, the missionaries retiring in disorder. Comrades of the 18th Ward are requested to pay more attention to these meetings.

The Organizer's meeting was held at the Temple on Sunday, the 11th, 12th, 16th, 17th, 18th, 28th, 34th and 35th Wards being represented. 9th, 10th and 19th were absent. It was decided to hold a picnic for the benefit of the West Side division at Bergman's Grove, Riverside, on Sun-day, Sept. 8th.' Tickets will be 10 cents each and can be procured from Ward organizers. On next Monday a meeting will be held at the Temple for the purse of reorganizing the 20th Ward

One might suppose in view of the rumpus raised over the "history" written by Maciay in the Sumpson-Schley affair, that it was the first and only faisincation that capitalist political expediency had ever been guilty of.

To a spinional terminal of the purpose of breaking that a bonus of \$2 per day offered for "scabs" by the National Pounders Association, for the purpose of breaking the Molder's strike, has failed to bring the expected results.

It is stated that the 9,000 members of the Bookbinders' union will "go into politics" in order to secure the passage of an eight-hour law for all occupa-tions. They wil discover in time that they cannot use capitalist politics against the interests of capitalism. also that a law and its enforcement are two very different things.

On last Wednesday the Billion dollar Steel Trust distributed \$9,000,000 as dividends amongst its estockholders. This sum represented the "earnings" of three months, and will probably en able the recipients to get along with out "relief" until such time as the strikers are willing to come back to work and present them with a similar

THE SILVER CROSS

The Carpenter of Nazareth

.... EUGENE SUE.

PREFACE.

Eugene Sae wrote in French a monumental work; "The Mysteries of the People," or "History of a Proletarian Family." It is a "work of fiction;" yet it is the best universal history extant: better than any work, avowedly on history, it graphically traces the special features of the several systems of class-rule as they have succeeded each other from epoch to epoch, together with the nature of the struggle between the contending classes. The "Law," "Order," "Patriotism," "Religion," etc., etc., that each successive tyrant class, despite its change of form, hysterically sought refuge in to justify its criminal existence whenever threatened; the yarving economic causes of the concression of the tollers: the mistakes in varying economic causes of the oppression of the toilers; the mistakes incurred by these in their struggles for redress; the varying fortunes of the conflict-; all these social dramas are there in reproduced in a majestic series of "historic novels," covering leading and successive episodes in the history of the race.

The work here published in English garb is one of these historic novels. It is chosen because of its singular fitness to modern times in one important respect:—the unity of action of the oppressors, despite hostile politico-material interests and clashing religious views; the hypohostile politico-material interests and clashing religious views; the hypo-erisy that typifies them all; the oneness of fundemental purpose that ani-mates pulpit, professional chair or public office in possession of a plund-ering class; and, last not least, the identity of the methods pursued and the pretences seised by the plundering and ruling class, at that iong ago critical period in the history of the human race, when the pre-feudal col-ossus of the Roman Empire was by force of its own power, beginning to strangle itself; and, at the present or third critical period, when the grand-child of that Roman System and child of Feudalism.—Capitalism., is now in turn, likewise by virtue of its own ripened colossal power, throttling itself to death, and, with its death throes, heralding the advent of a new civilization—the Socialist Social System.

of a new civilization—the Socialist Social System.

"The Silver Cross," or "The Carpenter of Nazareth," is a pathetic page from history that holds the mirror up to the Capitalist Classits orators, pulpiteers, politicans, lawyers, together with all its other menials of high and low degree—, and, by the reflection cast, enlightens and warns.

151 pages, cloth. with or without silver cross decoration, price 60 cents.

PRELIMINARY ANNOUNCEMENT

Unique Attractions in Athletic Events.

The West Side comrades will give picnic to celebrate the unification of the socialist forces of Chicago, at Bergman's Grove in Riverside, on Sunday, Sept. 8, 1901.

No effort or expense will be spared by the committee in charge to make this picnic a worthy successor to the one given for the benefit of the Work-Call. The grounds are located on the beautiful Desplaines river, which will afferd those attending an opportunity for boating and fishing. Comrade Collins who will have charge of the fishing requests us to announce that he has made arrangements for large schools of enormous fish to plow the limpid waters of the beautiful Des-plaines from 10 A. M. until 11 P. M. and also that a large force of pho graphers will be on hand to take pictures of the fish caught and enlarge them to any desired extent.

The grove also boasts of an excellent base-ball diamond upon which a game will be played between the "West Side Socialist B. B. Club" who are the ama teur champions of the city, navent ready won 3,456 per cent of the games they have played, and any club or clubs that can be induced to risk their clubs that can be induced to risk their teur champions of the city, having aleputation by playing against th Comrade Beselack who is captain of the club has had his men out for pract tice every night for the past three weeks so that they may be in the be possible condition for the event, and reports that they expect to have a they may be. Speaking of the promise of "m ald" given by the Federation of Labor to the striking steel employes, The Triung ironically asks, "what is the moral sid to be?" and concludes correctly enough that it is an unsubstantial, shadowy thing that cannot be estimated, although Mr. Shaffer bolds the opposite opinion that "Morally" means a great deal." This is a rather dangerous subject for a capitalist journal to handle. Once let the working class get the idea that "moral aid" is composed of the same stuff as "public opinion" and "" public sympathy" and other phontages of conttalist idurnalism, and they will turn their attention to material things in a manner that the ruling classes won't like. many thousands of workmen in the western plants of the Steel Trust, to obey the strike order of President that has yet occurred in the progress of the struggle. That it will have an imcome is certain, and that this effect will be all in favor of the employers is equally obvious. So far, President Shaffer has not expressed any opinion on those who disregarded his order, although the causes which induced them to take this course must command the attention and investigation of all who would undertake the struggle against capitalism on purely economic lines. Here we have perhaps, the most numerically powerful and certainly the wealthiest labors organization in the country, displaying a lack of cohesion in the face of the enemy which imperils if it does not destroy the small chance of ultimate success yet remaingiven. The eapitalist press sees in it a tendency to recognize the binding force of contrasts an indication that the men who refused to obey the order know their own interests better than Shaffer does, and that their action-will save the Amalgamated Association from total extinction. SOCIALISM AND THE HOME, by May Walden Kerr. Pocket Library of So-cialism. Price 5 cents. Chas. H. Kerr & Co., 56-5th Ave., Chfcago, Ill.

The latest number of the well known Pocket Library, which bears the above title, comes at an opportune momen when a considerable number of women are becoming interested in the Socialis movement and joining the branches and local Socialist organizations. Until now there has been very little socialist liter: ature written for women by women, and this pamphlet will go far to reineds this serious deficiency. Most of the literature which has already appeared upon this subject has been of a char-acter more fitted for the student of broad economic problems, than the or dinary wage working or home keeping women whose environment has been in no sense favorable towards acquiring a knowledge of socialism in this manner. But the writer of this pamphlet has taken a very different and we think more effective method of introducing ing and things pertaining thereto, such as food, clothing, wages, etc., which come under the personal supervision of women, and in which at least the wives great philanthropic motive and not of the working class are perforce inwherewith to attract the attention of the woman reader. The deductions from the observations thereon, inevitably lead up to socialism, and in such an easy simple manner as to be readily followed by the reader. The concluding sections of the pamphlet deal with such subjects as marriage, child labor the economic dependence of women and conomic emancipation or in othe comrades in the branches of the party and affiliated socialist clubs should be able to do good propaganda work with

.... EUGENE SUE.

PREFACE.

Engene Sue wrote in French a monumental work: "The Mysterles of the People," or "History of a Proletarian Family." It is a "work of fiction;" yet it is the best universal history extant: better than any work, avowedly on history, it graphically traces the special features of the several systems of class-rule as they have succeeded each other from epoch to epoch, together with the nature of the struggle between the contending classes. The "Law," "Order," "Patriotism," "Religion" etc., etc., that each successive tyrant class, despite its change of form, hysterically sought refuge in to justify its criminal existence whenever threatened; the varying economic causes of the oppression of the toilers; the mistakes incurred by these in their struggles for redress; the varying fortunes of the conflict-; all these social dramas are there in reproduced in a majestic series of "historic novels," covering leading and successive episodes in the history of the race. Eugene Sue wrote in French a monumental work: "The Mysteries history of the race.

The work here published in English garb is one of these historic novels. It is chosen because of its singular fitness to modern times in one important respect:—the unity of action of the oppressors, despite hostile politico-material interests and clashing religious views; the hypocrisy that typifies them all; the oneness of fundemental purpose that a mates pulpit, professional chair or public office in possession of a plund-ering class; and, last not least, the identity of the methods pursued and the pretences seised by the plundering and ruling class, at that long ago oritical period in the history of the human race, when the pre-feudal colossus of the Roman Empire was by force of its own power, beginning to strangle itself, and, at the present or third critical period, when the grand-child of that Roman System and child of Feudalism., Capitalism., is now in turn, likewise by virtue of its own ripened colossal power, throttling itself to death, and, with its death throes, heralding the advent

of a new civilization—the Socialist Social System.

"The Silver Cross," or "The Carpenter of Nazareth," is a pathetic page from history that holds the mirror up to the Capitalist Class-its orators, pulpiteers, politicans, lawyers, together with all its other menials of high and low degree—, and, by the reflection cast, enlightens and warns.

He thought better his condition." Mr. Davitt and that through Parliamentary tactics something might be done towards the ultimate national independence of Ireland, but he saw a danger in the steady decrease of the population. The immigration of Irishmen, mainly to the United States, MR. DAVITT thought, if not stopped, would eventually leave none to carry on the struggle.

So he appealed to his audience, and through the press to that indefinite something, commonly known as the "American people," to do all in their power to discourage Irishmen from and vegetable matter-from kitchen lish speaking people scattered over the leaving their native land. This is not socialist logic. It is only necessary to look over the capitalist press editorials on Mr. Davitt's speech to see that they also recognize this materialistic view of the matter. Of course they do so because they voice the material interests of the class who extract profit from wage labor, Irish or therwise, and naturally do to have the supply limited. Here is an extract from one of these editorfals which will illustrate this point.

"People come here not in answer to special appeals only, but because they clieve, from the general report that they can better their condition. Having. that belief they are not likely to be dissuaded by a PURELY POLIFICAL OR PARTISAN APPEAL such as that they must stay in Ireland to keep the cause going. The CAUSE in such case ecomes a MERE ABSTRACTION set AGAINST THE BREAD AND BUT-TER AND FLESH AND BLOOD. In the entire absence of people it would be reduced, of course, to a manifest absurdity.

If Mr. Davitt and other leaders of the Irish cause had a modicum of the horse-sense of this press writer, and teemen, residing at St. Louis, to were able to make logical deductions therefrom, they would wield a power in the British parliament which would speedily transform the contempt of the stolid British capitalists into alarm and terror.

Mr. Bryan "smashing the trusts." Mrs. Partington sweeping the tide back with her broom, and Mr. Davitt attempting to check Irish emigration by appeals to patriotic sentiment, are about on a level, so far as attempting the impossible is concerned.

It is not easy to believe that Mr. Davitt is wilfully doing this, knowing its futility. It is far more reasonable to impute this ridiculous exhibition to nic ignorance on the part of Mr. Davitt, than a deliberate attempt to And yet he is said to be one of the best informed men amongst Irish national leaders upon economic subjects. If this is so, it is almost impossible to imagine what the others

Mr. Davitt gives no sign that he understands the basic causes of emigration. The general depopulation of the rural districts in all highly developed capitalist countries has no meaning has under consider to him. The fact that even in Ireland charters, suitable to the few localities where capitalist in-dustry is developing (notably Belfast), have increased in population, suggests nothing to his mind. That the British manufacturing centers already possess a large and increasing quota of Irish Territorial organizations do not proletariat, is equally meaningless to him. That the Irish people in the Unbroletariat, is equally meaningless to him. That the Irish people in the United States have in the main deserted agricultural to take up industrial pursuits he does not consider in any way significant. Being himself an individual who through temperament, environment and opportunity, can make of nationality - a "paramount issue," he conveniently supposes that all his countrymen should be and can be influenced in a similar manner. The economies of the case are not worth considering. Here are a large number of Irishmen leaving their native land every year and the "gause" is being imperilled thereby. In the name of the cause says Mr. Davit, let the Irish people stay where they are. If you in America entice them away, why we'll blame you if the "cause" falls.

Nothing unusual has taken pla tince last week that would change th relative positions of the combatants in Here and there the strikers have beuccessful in inducing the union to quit, noticeably so in Joliet and Mi vaukee while many of them confident ly predict that the South Chicago em ployes of the Trust will reseind thei lectsion and join the ranks of their brethren. From time to time Presiden Shaffer makes statements purporting to show his confidence in ultimate vic tory for his side in the conflict.

On the other hand the Trust officials though not so liberal in making statements for publication, are bending all their energies towards showing the skilled workers that they are not altogether indispensable in the steel in dustry and that their places can be readily filled. The capitalist press, ever ready to do the bidding of the ruling class, from day to day publishes a series of reports showing that an increasing number of plants are being successfully operated by non union labor, and attached to these items may be generally found a denial from some lo cal representative of the strikers, that any such gains have been made.

Here and there the militia are being held in readiness to preserve capitalist "law and order" should that institution be endangered by the anticipated action of the strikers. "Law and order never suffered at the hands of the capitalist class and probably for this reason a letter from the Secretary of State for Ohio to the United States Steel Co., requesting compliance with the laws governing foreign corporations in Ohio, has been properly ignored by the officials of the latter combina-

"that they recom mend that all governments should sub mit pending and future difficulties to the Hague Tribunal, as the eminent event of the century" they might properly be reminded that a joke carried too far is decidedly in bad taste.

All that can be definitely said h ever as to the developments of the week in regard to the steel strike is that all. the players are not yet upon the stage." Organized labor and organized capital are preparing their forces for the decisive struggle and the end is not yet distinctly in sight.

How solicitous the capitalist press appears that the workers should always be guided by "reason" may be seen the following editorial extract is the Tribune on the coming out of the

There is an old and well known saying that "second thoughts are best" but it evidently doesn't hold good when onclusions inimical to the interests of he ruling class are reached through reconsideration. The Tribune farther on in the same editorial admits that the employes feared to be "disloyal" to the mion and that this fear induced them to go on strike. The fellow who is "diloyal" to his own class is the to his own class is therewho sticks by them is moved by 'emo wish to be guided by reason, don't workmen de so, just get inte a militia an's uniform, take your musket an shoot holes through the emotional fel-lows. E. C. of Socialist Party Urges Members to Assist Striking Employes asist Striking Employes of Steel Trust.

National Headquarters of THE SOCIALIST PARTY, St. Louis. Mo., Aug. 15, 1901. To the State, Territorial and local organzatons, composing the SOCIAL

Comrades-Your attention is hereby directed to a call for financial aid, issued on Monday, Aug. 9th, 1901, by the Amalgamated Association of Iron, Steel and Tin Workers of the United States. The language of this call is of special interest to Socialists, inasmuch as the very opening sentence states that "the United States Steel Corporation is now WAGING WAR against organized lab-

In this words the Amalgamated Association unconsciously recognizes and indirectly indorses the political position of the Socialist Party on the "class struggle." This appeal also states that the Steel Trust is "fighting against the right of workingmen to combine," a "blow not alone directed at the Amaigamated, but at organized labor in general, the accomplishment of which would affect every organized body in the United States," The herein confessed weakness of the trade unions in the class-battle consist in the fact that while holding the forces of capitalism in check on the industrial field, they (the unions)), are at a vital disadvantage, owing to the complete mastery and oppressive use of the political powers by the capitalist class. In vain have these facts been heretofore urged upor our brethren in the trade unions. Notvithstanding our supplications for a hearing, we have received a deaf ear and by none more so than by our unfortunate brethren in the Amalgamated Association.

APPEAL TO SOCIALISTS Comrades, in this, the hour of ou irethren's extremity, when thousands of these brave sons of the working class are fighting the most heroic battle be our hearts were we to ignore the manly and dignified appeal of their great labor organization. Inasmuch as most of the grounds of their published ppeal accord in spirit,if not altogether in letter, with some of the very facts which Socialists have repeatedly urged as indicating the political isolation and onsequent weakness of the trade unns; and in view of the further facts that the Socialist arty is an organized olitical body of the working class whose existence is threatened and may e involved; inasmuch as our party is a that the Socialist Party is an organized capital than any body of workingmen ganized on the Industrial field; there ore, we, your National Committee, fee Letter of Appea! and Advice." com

3. We recommend that popular subscriptions be opened by the Socialist National Secretary for transmission to the Amalgamated Association.

4. We call upon all comrades, esp cially those residing in localities affected, to form Socialist strike com mittees, composed of both men and women, whose duty it shall be to aid the strikers by collecting donations of money, food and clothing or giving social entertainments.

ADVICE TO SOCIALISTS AND TRADE UNIONISTS.

In those localities affected by the strike where Socialists are, in political power, it would be in accordance with and demanded by the principles of the Socialist party, that all the POWER Sept. OF GOVERNMENT be used to PROTECT THE WORKING CLASS against that for the oppression of the capitalist class. If needs be and in accordance with existing legal requirements, contingent funds of public officers could be used for the purchase of the necessaries of life, and the POLICE (where same exist) be used to DISTRIBUTE AID to the NEEDY FAMILIES of the strikers. White advising these and additional methods of relief, in accordance with the above, that may be cur to the wisdom of our comrades, we must needs regard the same as merely temporary pallistives, and this

view counct be too afrengly incide the minds of our striking be We must also admonish them that the ONLY HOPE for the emancipation of he WORKING CLASS is by the work ing class itself, through class con-scious political action, in the folds of nent. It is eminently proper in this onnection to call the attention of the strikers to the fact that ELECTIONS ARE IMMINENT in localities affected by the strike; that the etruggle may be a prolonged one, and that the only way to prevent the use of the power of government against the working class is for the working class to ORand through class conscious voting at the ballot box, SEIZE the governing POWER, and use it in the interest of the working class and against the in terest of the apitalist class. the TRADE UNION as such CANNOT ACT as a political party, it is the trade unionist's duty to join and aid the political organization of the working class, in order that the trade union and Socialist movements may act in conjunction, as far as possible, in emkancipating the workers from wageslavery and installing the co-operative

commonwealth. the Socialist Party in their respective localities may obtain instructions or the services of an organizer by applying to the undersigned or the secretary of the state committee of the Socialist party in whichever state the applicant may be located:

The line of demarcation between the capitalist class and the working class is becoming more sharply defined with each succeeding strike. The duty of every Socialist is to be in the forefront of the class conflict.

Comrades, let us contribute of such resources as we may be able to command in aid of the Amalgamated As ciation of Iron, Steel and Tin Workers G. A. HOEHN,

"RED RICE AND HOMINY."

Capitalist Journal, Suggests Dietary Scale for the "Poor", under Present "Prosperity".

With potatoes at \$1.60 a bushel and everything else in proportion, and not of the first class at that, what are we to do? Will the Tribune please publish suggestions on the subject and oblige its many readers?

The above question has been put by a local capitalist newspaper, and was duly answered, perhaps to the satis faction of the aforesald wage slave, in the columns of that journal last Tuesday morning. A part of this reply is as follows: "If the poor man would ald. only put aside his false ideas of the necessity of potatoes and vegetables they could have variety and all the good effects of the same with rice, corn and hominy. These, it is asserted, are under socialism there will be no need cheaper and more nutritious than potation of soldiers and guns and the privates principles the paper teaches send in It is as nutritious as the ordinary rice, but is barred from fancy sale because of the streak of red through it. THE SILVER CROSS

The Carpenter of Nazareth

PREFACE.

Eugene Sue wrote in French a monumental work: "The Mysteries of the People," or "History of a Proletarian Family." It is a "work of fection;" yet it is the best universal history extant: better than any work, avowedly on history, it graphically traces the special features of the several systems of class-rule as they have succeeded each other from epoch several systems of class-rule as they have succeeded each other from epoch to epoch, together with the nature of the struggle between the contending classes. The "Law," "Order," "Patriotism," "Religion" etc., etc., that each successive tyrant class, despite its change of form, hysterically sought refuge in to justify its criminal existence whenever threatened; the varying economic causes of the oppression of the toilers; the mistakes incurred by these in their struggles for redress; the varying fortunes of the conflict-; all these social dramas are there in reproduced in a majestic series of "historic novels," covering leading and successive episodes in the history of the race.

of "historic novels," covering leading and successive episodes in the history of the race.

The work here published in English garb is one of these historic novels. It is chosen because of its singular fitness to modern times in one important respect:—the unity of action of the oppressors, despite hostile politico-material interests and clashing religious views; the hypocrisy that typines them all; the oneness of fundemental purpose that animal content is the content of the content mates pulpit, professional chair or public office in possession of a plundering class; and, last not least, the identity of the methods pursued and the pretences seised by the plundering and ruling class, at that long ago critical period in the history of the human race, when the pre-feudal colcritical period in the history of the human race, when the pre-feudal colossus of the Roman Empire was by force of its own power, beginning to strangle itself, and, at the present or third critical period, when the grand-child of that Romau System and child of Feudalism. Capitalism; is now in turn, likewise by virtue of its own ripened colossal power, throttling itself to death, and, with its death throes, heralding the advent of a new civilization—the Socialist Social System.

"The Silver Cross," or "The Carpenter of Nazareth," is a pathetic page from history that holds the mirror up to the Capitalist Classits orators, pulpiteers, politicans, lawyers, together with all its other menials of high and low degree—, and, by the reflection cast, enlightens and warns.

News of the Week

Injunctions have been coming pretfy thick this week and while strikers, after the experiences of recent years could expect nothing else, they were somewhat surprised at the sweeping nature of the two that were issued by United States judges. The socialists see in the injunction one phase of the as struggle. The capitalist class has found a new weapon in the injunction and one that partially nullifles the once powerful weapons of the working class, the strike and the boy-A strike is a war in miniature and all things are fair in war. . The capitalist uses the injunction; the workers use the boycott though both in-junction and boycott may be contrary to the ideas on which the American. government was founded. Neither side cares as to that. Each wants to gain Material interests are stake and might rules. In this contest the capitalists have the advantage in that they look farther ahead than the workingmen and secure the machinery of government. The workingmen thus surrendered their most powerful weapon, which force of numbers will allow them at any time to take when they did not elect men from their own class to offices. If all is fair in war then it is fair for the workingmen to take the offices. They can do it, the only question would be, is it wise for them

Capitalists papers counseling moderation tell the workingmen to remember Debs. If the workingmen had remembered Debs at the last election they might not now be striking for their rights with adverse governing bodies to contend with. It is the short memory of the workingman that the capitalists depend on to control govern-

Of course Debs never marched up San Juan hill in a blaze of red light, neither He only went to jail for his class. They could not think of making him president. Only a man who dis pised them and had no use for them except during a campaign, would do as a president for the workingmen. Talk of Mark Hanna for president is again being freely indulged in. Possibly this is a scheme to make the workers so mad that they will vote for Mr. Bryan or some stalking horse rather than one of their own number. It may be too that the capitalists expect to ot Mark. They have not the votes to do it, but workingmen are very ac-comodating about election time.

Surprise over the rottenness in the hall that is partly being brought out by the present investigation is all put on. No one is surprised. Everyone knows what a gang of politicians get themselves in office for. It is for their mutual interests. The bluff about doing things for the dear people is so thoroughly exploded that nobody tries to work it any more.

The report that-Mr. Bryan's Comwas to be moved to Chicago has enled. We do not need the Comer here as long as we have the

Retail clerks are beginning to learn that Retail clerks are beginning to learn that they are not "business men" but are as other members of the working class. Their unions now being established may get them shorter hours and a few cents more pay, but they will never get full value in return for the work they do for society until they march to the ballot bus and vote with other laborers to own the factories and the distributing depots themselves.

Several miles of tramping must be done to cover the line of march ou Labor Day; a walk of much less dis-tance on election day will accomplish far greater results.

Workers have been called for by the executive committee to help extend the irculation of the Workers' Call. Fifty are been asked for, but 160 should repord. The man who reads can't get way from the argument. If he is a worker he will become a socialist. Now the time when sacrifices made to course subscribers will count. They are the feet that which would result in desclimb the state. It will be observed here that the clerks who had to walk up were not included in "everybody." If the task was too much for them they lost their job. After calling up the clerks and issuing orders, then "everybody" went out to the golf links leaving "nobody" at home to execute the orders.

Conkey sues a former employe for \$25,000 damages for causing the strike tmong his employes. Conkey will probably not collect the full amount or any part of it, but he will cause the workingman or his union to spend money for lawyers for a defense. He may discourage other agitators from talking atrike. It will take the courts look ing through capitalist spectacles to determine whether any damages can be assessed for this alleged offense, bu neanwhile no court can enjoin a man for voting for his own interests no collect damages from him if he votes against the interests of the boss.

> That material interests are stronger than sentimental reasons, is shown by the action of the steel workers in South Chicago refusing to strike. Every tinpulse of sentiment would be for the men to strike, but they are evidently convinced that the strike will be a lea-ing one and that they will be out of jobs. When men can be convinced that it is to their material interests to vote or socialism then socialism will come It is the line of argument which will

Probable Reward of Merit

"The men at South Chicago are stick ng to the position they took at the out set. By doing so they are asserting their manhood and retaining their selfespect" says the Chicago Tribune edi-

torially.

Time will bring about the complete vindication of these men who have dared to defy the ignorant censure of the labor woird. When this strike has been fought out and lost, and when "revident Shaffer has become like William J. Bryan a forsaken and discredited leader, remembered only because of the injury he has done the cause of labor, the bravery, devotion to duty, and true leyalty to labor of these South Chicago men will be recognized, though refuctantly, by those who are now assailing them in resolutions and speeches.

The Tribune is altogether correct except in one small particular. In no country of the world is the trade union movement so old and so strong as in England. But the presistent ignoring of the fact, that the machinery of the state is simply the tool of the capitalist class, has again and again led the British workingmen to vote those into political power who already held the scourge of economic exploitation over them. Last year the rear of the Labor Day procession was brought up by several squads of police officers ransformed into artillerymen and ac-ompanied by a battery of machine guns. This military feature will be missing in the coming display. There is little loubt but that the capitalist class have observed the tendency to dispense with their spell binders, and having caught on to its meaning now deem it prudent to create as little irritation as possible. The unions displayed considerable reentment over this part of the show last year, and have since acquired a ers of them unneces more distinct conception of its real of production, to fight among the meaning, which would rather increase than allay their previous opposition.

There are quite enough "gatling guns on paper" in the form of injunctions, fight side by side against the class already flying around, and as the or-ganized laborers are beginning to see the connection between them, there is a well defined suspicion that the ap-pearance of the literal weapons of murder, might be too strongly suggestive. to become a part of this mighty a It is fairly safe to predict that the ac- arrayed in this bitter, never encounts of the Labor Day procession in the capitalist press, will this year surpass all previous reports for smooth and unmeaning compliment. PRESS CONTEMPT FOR STRIKERS

Were it not for the knowledge that experience is a schoolmaster that never lets up upon the dullest pupil until the lesson has been learned, one would be tempted to assert that the labor organizations of this country have been smitten with a sort of mental paralysis At the time when the air is filled with showers of injunctions against unions; when the capitalist class are successfully using every device known to law. for the purpose of neutralizing every effort of the unions to fulfil the purno reply is heard beyond a few feeble and impotent resolutions of denunciations and censure, which are properly passed over in the capitalist press without a word of comment.

"Contempt will pierce even the shell of a tortoise" mays the old Hindu proverb, but it would seem that the modern labor organization is even more impenctrable than that conservative an imak judging by the tone of the capitalist press in matters concerning the efforts of organized labor, and the effect that it has produced upon the

It can hardly be maintained that the labor organizations are not in some sense fair came for the taunts and neers levelled at them in the capitalist press. The appolling density they exhibit towards the significance of things ac tualy occurring is to some extent a justification for the supercilious contempt with which they are regarded by the exploiting classes. The law is being used upon all sides to render every effort upon their part futile. While the organizations remain passive their legality is unquestioned-when they at tempts to become effectively active, their activity is at once paralysed by the law in the hands of their opponents. And yet with few exceptions, the idea class to which they belong, has not yet dawned upon them, though every action of their enemies points that lesser so plainly, that it might be said nothing short of wilful blindness could a void recognizing it.

from the present outlook, organized labor is to acquire a knowledge of its class interests only through such demonetrations of capitalist nower as are now being given, the time is not far distant when the ballot will perforce be recognized as the only defence against absolute industrial slavery; and its adoption as the weapon of organized labor, may reseonably be expected to modify the contemptuous attitude which the capitalist class now feel safe in assuming towards their wage slaves.

has long since passed the 'point' where poverty is excusable except on the theory that it is a divine-institution. But when you get at the bottom of this divine secret, it is the control of political power which makes and manded and received from the hands another. It must be taken, not desanded. Nothing which a superior and down to an inferior will ever be it. Therefore the first thing to do is pet control of the power to decide that is fair. When this has been sectived the case can come on for hearing and be duly argued and decided.

FRAGRANT BLOSSOMS.

The "American Journal of Sociology for July, contains an article on "Lilture Agencies of South Chicago". The appended extracts describes some of these "agencies":

"In the eastern part of the region north of the river, near the Strand, and Green Bay and Mackinaw avenues, the recent importation of Slavic people have settled chiefly. They are principally men. They gang tegether in groups of thirty or forty and occupy some old building that no one else will use. But Blefeld as a fleecer of labor and Biefeld as a fax dodger, are two different propositions. In the former rols he posed as prosperity personified-in the latter as a horrible example of poverty. This is how the daily press reports his latest representation.

"Both reviewers and assessors laughed today over an interview with S. J. Klein, representing Joseph Beifield & Co., who tried to get a reduction of the firm's assessments on the ground that it was losing money every day. The two beards sat in joint session. When Mr. Klein sat in the witness chair to plead the cause of hard times for the mahufacturing firm he represents, a smile spread over the face of Assessor Gray, who innocently asked:

"How about those prosperity speeches made by Mr. Biefeld in Central Music Hall last fall during the campaign, in which he asserted that last year was the greatest year of prosperity he ever had in his business?"

Mr. Klein was taken off his grard, YEAR and that it was losing more this year. The reference to his part-ner's public statements to the contrary staggered him.

"Weil," he stammered. "YOU MUST-N'T TAKE A MAN'S POLITICAL AR-GUMENTS TOO SERIOUSLY."

The reviewers reduced the firm's as-

knavery in the public utterances of exploiters of the Biefeld type. When the
capitalist is asked to disgorge, he will
never shrink from exposing himself, as
in the above case. Neither is he
ashamed of the performance and he has

int is at last recognizing the advantage of having mayors, city councils, and legislatures that represent his own class. Therefore we see the trade un-tons one by one indorsing the platform of the one and only political party which is composed entirely of working-men—the Socialist Party. This party offers another advantage, which is not possessed by any economic organiza-tion. It combines the forces of the workingmen into an INTERNATION-AL army of voters and meets international capital by international conso dation of the workers. All so-called international trade unions comprise only a few countries, and only a small percentage of the working class. Innational Socialism comprises the workingmen of all countries and all trades. It is the grandest trades union in the world, and it is better than any trade union, because it is the political expression of the revelation that the workers of all countries will gain their emancipation only through a combination of all the trades unions into onclass conscious body that will take the powers of government out of the hands of the exploiters and place them into the hands that feed, clothe and shelter humanity.

Roosevelt went all of the way to Minneapolis to tell the workingmen that the interests of capital and labor are the same. He said many other things, but so far as his address touched on labor topics that was the only specific statement. Labor's interests he said should be guarded by legislation; details could be safely left to the cap-italist governments. As long as the wage workers think that way, Roosevelt and his friends can hold the offices and enjoy the good things which others have produced.

The ban against politics may be re-moved at the next meeting of the Chicago Federation, as a vote on the sub-ject has been submitted. That will be all the opening the sociaists will want. The small but determined band of sociglists in the federation will make short work of such democrats and re-publicans who remain, except those for such jobs and want the labor vote as trading stock. the important question is; In the hands of the Socialist Party, is co-operation suited to hasten the disappearance of capitalist society and the in-coming of the socialist system?

Among the various forms of co-operation, the greater part can not assist the work of revolution, they would at best result in allowing the little bourgeoisie, (retail merchants, small manufacturers, etc.,) to struggle against the competition of large capital and the great combines. Of course the Socialist Party pays no attention to any of these co-operative affairs, with which it has nothing to do, since they do not tend in any way to the radical tranformation

of gociety demanded by the socialists, So it is best to suspend judgment and observe the greatest reserve regarding the co-operatives of production, which has given birth to more than one generous illusion. On the morrow of the great democratic revolution of 1848, there was a very decided impulse in this direction: in France there were established more than 200 workingmen's societies for production, of which only one-has survived; later, in 1866-1867, the movement took a new start; in 1897 there existed in all 164 associations of this kind. At present, these associations are almost wholly bourgeois in spirit: they are too often composed of a certain number of laboring employers, who employ a far larger number of wage laborers; thus that of the spectacle makers numbers 151 co-operators and 1,480 wage-workers. The co-operatives or production are likely to trareform a part of the workmen into little bourgeois who easily become enemies of the social revolution, which would change their individual property represented by their stock certificates, into the col-lective property of society, Socialism then can not place its hope in societies for production left to themselves.

There is today but one form of co-

operation which may become a power-ful arm in the hands of the Socialist Party, namely the co-operative of con-

How "Thrift" is Discouraged in South Chicago.

"Reward of Abstinence" is a Capitalist Prerogative.

Last week an episode occurred in a South Chicago police court which is full of significance to those of the working class who take seriously the advice of the "reformers" who inc santly preach the virtue of thrift to the wage earners as an indispensable requisite towards the accumulation of "property," and the acquisition of respectability."

One Andrew Geneczenis was called upon to abswer a charge of failing to provide sufficient food for his wife and three children. The evidence showed that Andrew for many years was accustomed to hand over to his wife every day the sum of six cents with which the daily allowance of meat for the family was procured, Andrew him-self bringing to the home each evening a loaf of bread and four potatoes

Becoming tired of this luxurious fare. Mrs Geneczeniz had her husband arested upon the above mentioned charge and the following facts were brought out in the investigation that resulted.

The defendant earned a daily wage of \$1.50, but nevertheless was ambitious to become an extensive landholder. He had so far succeeded, that the food which his wife and children didn't get, appeared in the substantial form neat cottage and large barn. The thrifty laborer kept his wife in ignorance of the fact that the last is ment on the "property" had been ago paid, and had begun negotia for the adjoining lot, when she discohow matters stood and caused his

Andrew has evidently a lot to learn yes
about the meaning of "thrift" as it is recommended by capitalist reformers. He commended by capitalist reformers. He does not know for instance that it is really not intended for the purpose of making the laborer a property owner, but rather to cheapen him for the use of the possessing class. ONE YEAR AGO AND TODAY.

Speaking of a small strike which was on last year by the Amalgamated Association, President Shaffer is quoted as stating at the annual meeting held last year in Milwaukee, that the victory was due not to the strength of the Association but the weakeness of their opponents. He described the United States Steel Co., as "a collection of bodies without organic form, without rules of government, without systematic plans of operation".

While this description might apply one year ago, it does not fit today The Trust has taken on organic form and has evolved systematic plans of peration since then. J. The struggle must be carried into the political field where the yotes of the working class'will turn th bajance of power in their favor. The hopelessness of any other method is being illustrated every day, in the means by which the exploiters of labo maintain their supremacy. From thes disputes Socialism will gather the additional strength necessary to put an end to classes and class struggles once

It is this attitude of the press which, far more than the arguments offered, tends to breed distrust in the mind of the reader. The weaknes that makes "leadership" indispensable, the well known aversion to independent thought on the part of the working class, and the weight they attach to anything labeling itself "public opinion." are all duly calculated upon by those who circulate this stuff amongst the strikers

There is but one method by which his process of mental stagnation can se counteracted. The capitalist class fully appreciate the power and effect of their instrument the press, in paralyzing the minds of the workers at critical periods like the present. The dreulation of Socialist diseasure and party papers is the only antidote possible to destroy the effects of this polsonous narcotte and awaken the sleepers to a realization of things as they are.

A LABOR DAY RETROSPECT.

And so the great Labor Day parade is over. The flags are furled, the bands are silent, and the marchers having "shown their strength"/to the capitalists in the orthodox fashion, have again entered the factories, mills, and workhops, to pile up wealth for their masters in return for a pittance sufficient to eproduce their labor power and raise a new generation of wage slaves to take their places in the labor market in dutime. The politicians have bottled up their oratory for future occasions, and the courts are again open for the bustness of issuing injunctions against the paraders when the latter attempt to how their strength" in any other nanner then marching through the streets with bands and banners on the cay which their masters have designated for that purpose.

And now let "business" proc ore. Let the robbery of the worlds toliers continue as usual. Let the wo men be taken from the "home," the children from the school and playground and crammed into the factories and department stores to be used as cheap raw material for the production of profit. And they filled his ears with flattering tales of what a fine fellow he was; they told him that organized labor was the greatest thing that ever occured in the world's history, that it wielded an irresistible power, that in organization alone lay safety, that the worker was fighting a battle for his "just rights," that the was the duty of every man, women and child that works to join a labor union. that nothing could be accomplished through strikes, that the enemy of isbor was not the capitalist but the saloon, that the interests of capitalist and cal, that the laborer

Out of this medley of "advice" noth ing could come but confusion and be wilderment and the continued helpless ess and dependence of the tollers And it was for this deliberate purp it was given.

But here and there men from ranks of the workers were given a bearing. They pointed out how organizaion could be made effective to accom plish tangible results-how it could be that the strike is practically lost, at used for the complete emancipation of the workers from Industrial slavery, the capitalist press to see to it that so They used the actions of the court far as possible the losers shall learn no in issuing injunctions, to demonstesson from its fallure. And so Labor Day passed into history. How far the workers have shown their strength will be accurately deter mined, by the size of the Socialist vot at the next election. How far they have nerely demonstrated their weakness the division of their votes between the capitalist political parties will also tell.

Is is any wonder that the masses of the people in the United States are so slow to become interested in really vital novements? Most of them read nothing but daily newspapers. The daily newspapers are interested in giving as little information as possible about some subjects—especially socialism. In torial on "The Fate of Shaffer," the vriter viciously states that E. V. Lieutenant Governor Northcott in his Labor Day speech, Bishop Potter in the which we admire and enjoy so much. an ideal state of coming society in which Capital and Labor will peacefully co-operate. And so they will, Lieutenant Governor, only the CAPITALIST will be missing then. The Bishop has a similar pipe dream of BROTHERLY co-operation-for the benefit of the capitalists in general and luxury loving clergymen in particular-and besides he jumps with both feet on Fmy patent argument, the cheerful readiness ready made republic in which almost vernaciller means LIBERTY TO SKIN , workingmen. And still you will THE PEOPLE-"is taken away from us at our class hatred? and society reduced to the dead level alike, in paper costumes," etc. Not only the same hour, comb their hair in your lies-at the same time. The Lieutenant Governor, while pro-

tending to stroke the fur of Labor the right way, has "nothing but contempt for that demagogue who breaches a doctrine of hate between one class of people and another." Of course, the Lieutenant Governor knows very well that the class struggle is a fact. We have never maintained that it is a The "courage and character which the Lieutenant Governor praises so much, simply compel us to point out the existence of the class struggle to our fellow workers. The capitalist class are doing their level best to destrate the fact of its existence. The bull pen in Idaho, the riot guns and police clubs in Homestead, Chicago, etc. are teaching that "doctrine" more forcibly than our words could do. The Lieutenant Governor had better reserve his contempt for the class who slaughter their follow beings for profit, who coin the "brotherly" words MOB, VOT-ING CATTLE, RIFF-RAFF, COMMON HERD, etc., who vulgarly display their wealth in face of the suffering Wages are now double what they

For, Lieutenant Governor, "when the boys in blue marched with Grant to Apromatox." they little recked that they were laying the foundations for the slavery of their own children. GETS AFTER CREELMAN.

Indiana Comrade Calls Attention Capitalist Hack Writer to Some Significant Facts.

> NOTE-The following reply to Jame Créelman's recent article in the Chicago American on the "Fallacies of Social ism" having been refused publica in that fournal is hereby published request of the author, Ed.) 316 Washington St.

Alexandria, Ind. To Jas. Creelman Esq.

From the tone of your article "The Fallacies of Socialism", published in the Sunday Chicago American of May 12th, I judge you to be a paid tool of th Capitalist class or a paid tool of the Demotratic, political corruptionists which is one and the same thing.

You commence your harangue by sta ing there is not an observant political leader in the country, who does not see the socialistic idea spreading amon persons, who five years ago were staunch advocates of the competitive system, under which you claim the American people bave grewn and prospered.

I will tell you why'll is; because the and the natural born child is the Trust. Close competition aided by the pro-Balance on hand 249 tective tariff was merciless in produc tion, regardless of demand and has had its cvil effects upon the American people, the keenness with which manufac-turing was carried on, the reduction of wages in consequence, more work done in the same number of hours wages in a great number of trades.

I will, cite one illustration in th plate glass trade in one department which is a fair and plain illustration of "Eighteen years ago, there were but

two plate glass factories in the Unitof time up to that time-one at Crystal City, Mo, and one at New Albany, Ind.; a third had run only 8 months up | tickn going to do about it? to that time, located at Creighton, Pa In the Polishing Department, nine men laid nine tables a turn, at most, from 6 A. M. to 6 P. M. For said the Latin word 'socius' meaning brother amount of work the fayers received or companion. The first incentive of eighty to eight-five dollars per monthpiece work. Just before the plate glass | companionship. Do not others as you trust was formed, seven men laid nineteen tables per turn, and received sixwhich was equivalent to 130 per cent additional work, and 18 per cent reduc tion in wages, besides plate glass was retailing at 12 per cent more than it was eighteen years ago. Now who got the difference? This is a fair illustration of the majority of trades and manufactories.

Now I ask 'where was the prosperity of the American People?" Had ther been free trade, the trust would only be in the embryo yet, but then unde free trade wages would have gone down much lower in order to compete with cheap foreign products.
You state in the next paragraph you

do not oppose municipal ownership but, in substance, without stating any reaon, you claim nationalization of dustries is impracticable.

The Post Office department is a nationalized institution and would be a paying one, but for the enormous profits paid Chauncey Depew in his mail-car service, and others of his lik. Under Socialism, the carrying of mail

would only be one-half what it is now, besides, the peoples' mail would not be re-shipped before being delivered in order that the mail-car owners can reap a bigger revenue, since they are paid so much per mile on the bulk

I have had the opportunity of living in a large number of small towns, as well as several large cities, and numbers of Post-masters, first, second, third and fourth class never devote more than one-half to one hour per day, in their respective post offices, and el of them receive from three to ten times the salary of the cierks: these are only a few reasons why the Post Office institution is not a paying one.

American people should not be scared even by the billion dollar steel trust m continuing the struggle in defense of the competitive system, under which, you say individual liberty and progress

settle for those sold with M. H. You state also, that socialism is as unsound as the trust system, and yet in almost the same breath, you make the assertion that if it were possible for the monopolies to be transferred to public ownership you would be a so-cialist, but you say it is not true, wir'iout giving any reason why.

When a man gives vent to his spleet

by calling socialist theories damnable heresies, and everything pertaining thereto damnable, I am satisfied he sees the doom of the cause he advocates. Your vain vituperations remind one of the last wail of the drowning man. The inconsistency of your piea is shown in your denunciations of the trust by stating that the genius of Messrs. Carnegie. Rockefeller and Morgan was awakened by the competitive system. awakened by the competitive system, which has given to them the opportunity they now deny to others, it naturally follows, such being true, that the comthe trust system, then to continue progressive, the next and only inevitable result will be public or collective owner. ship of the trusts.

lectively are superfor to men individu-ally. I am not surprised at a statement like this after reading your so-called fallacy article; it is only the expression A "Bible Conference" recently is falliery article. It is only the expression of a mind pregnant with avarice, anxious for a slice at the Government spoils through the instrumentality of the so-called Democratic Party. If individual knewledge is superior to collective knewledge, why don't the people of the United States about the Senate and Congress, and allow the president and his cabinat to run the country; the people Don't forget the date of the Uni ty Picnic Sept. 8th and den't neg-

ple in each state sweep out their reresentatives and leave the govern run their affairs for them, and all the way down the line to the town cou eaving the Mayor only in office to run

the towns. The old saying is true "Two heads are, better than one, even if they are only heep heads."

Supposing a man with \$500,000 wishes o go into some manufacturing business, e builds his factory, but who is he deperident upon for his success? It is his mployees or wage slaves in the various departments working co-operatively and harmoniously until the article ecomes a finished product; were it not for the brain and brawn of the workers ollectively, the article could not be manufactured.

Your profane harangue about national monopolies being a curse in Germany, and other countries is as false and eroneous as the rest of your statements. Ratiroads that are owned by the state n Germany pay their employees about 50 per cent higher wages than the private Companies pay, and employ 12 n on to the mile, where in this country, private companies employ but four. The New Zealand Government competitive system has outlived itself their Railroad Engineers and firemen 30 per cent more wages than the private companies pay in the United States, and employ thirteen men to the

Your hypocrisy would not appear so plainly if you did not throw so many bouquets at "The American Citizen" trying to elicit their sympathies and

prejudices as suits your purpose,
While the frust is the inevitable result of close competition and is getthey must face the greater problem of distribution. Greasing the Ways. ..

Greasing the Ways.

The man who wishes to retain his anti-capitalistic principles intact must keep himself unspotted from oit. He was touches it hads himself before long almost inevitably in the camp of the plutocratis. Oil wells are traps set to catch the sturdy champions of the rights of the "plain people". Not long ago Mr. Charles A. Towne of Minnesona, the control of the rights of the "plain people". Not long ago Mr. Charles A. Towne of Minnesona, the control of the rights of the "plain people". Not long ago Mr. Charles A. Towne of Minnesona, the control of the rights of the "plain people". Not long ago Mr. Charles A. Towne of Minnesona, and anti-imperialism, became the owner of a Texas oil well. His clarion voice is no longer heard deploring the mevitable downfall of free institutions under the Mrkinley administration. Oil has taken away his parts of speech. Ex-Governor Hogg of Texas is out of politics, for he is in oil. He has ceased apouting and lets his oil well attend to that. Now there comes a Wyoming dispatch to the effect that William J. Bryan, who is spending his vacation in the southern part of that state, has taken a deep interest in recent oil discoveries there, and has bought some oil lands, with the intention of developing them. Every Populist who hears of this should send an impassioned telegraph C. O. D. appealing to Mr. Bryan to fly the greasy fields and the seductive oil or he will be idea to the first payant to fly the statement that if Mr. Bryan strikes oil he will make war on the Standard oil company and crush it. They know better. HE WILL SELL OUT TO IT. They know that if Mr. Bryan strikes oil he will make war on the Standard oil company and crush it. They know better. HE WILL SELL OUT TO IT. They know that if Mr. Bryan strikes oil he will make war on the Standard oil company and crush it. They know better. HE WILL SELL OUT TO IT. They know that if Mr. Bryan strikes oil he will make of the standard is but a step. Mr. Bryan's friends should bid him beware of the insections of the insect

above. Every word of it is absolutely true. It merely reference the fact that material interests dominate political thought. But the Populist may console humant. "If" Mr. Bryan succeeds he

me a "bloated capitalist" all right, but "if" is à very doubtfui qua: tity. The Standard Oll Co., may be de-pended upon to do all in their power

They will limit the output of bloated capital'sis" in the oil industry as much as possible, and permit Mr. Eryan to hold his present political opu-ions pure and undefiled. The "peerless leader" is not in such imminent peril

Reform as a Business.

Verily the ways of the evil doer are bard—sametimes. The president of the New York State LAW AND ORDER society has been arrested on the charge of blackmalling a saloon keeper. Another "reformer" whom he had employed as a collector of tribute from di ordery houses, has filed an affidavit to Tuesday, 8 p. m.-N. Cark St. and the effect that Russell, the "President North Aves. Speakers. Zimmermann in question had suggested the murder of the aforesaid saloon keeper. following extract from this affidavit an-

Pears in the daily press;

Russelt, in a tow tone, said:

"I can get this man Nadler killed:
Do you think I had better do it." The man's audaetty dazed me I had known him as a blackmailer and Nemesis of unfortunate women, but it had never occured to me that he would use his influence with the oriminal class of the city to encompass the death of a fellow citizen.

"My God!" I exclaimed. What kind of a man are you? Would you add murder to your other rins?" He merely smiled and turned away:

"Whather the witnesses.

Whether the charges against this

champlon of "law and order" be proved not, the incident is strongly suggestive of the possibilities which the career "professioned reform" opens up to the young man starting out in business

An "Imposing" Spectacle.

This is how the meeting between two great men on Labor Day is described "Hello, Judge!" said the Mayor.

'How do you do?" said Judge Hane-

God bless you both," echoes Senator Mason, as he raised his hand and assurned a plous air.
This is very different from the situ-

ation last April when both these men then were seeking the votes of the workers in order to reach the Mayoral chair. Then the city was covered with peaters depicting them as wrestlers. Harrison having a "strangle hold" Hancey and trying to push his head through the mat. Labor day proves that it was only a sham fight after all although the workers took it seriously. Whatever other differences there may be between them, they are of one mind son proved it by terrifying organized abor with gatling guns, and ordering the magistrates to give the striking pickets "the limit of the law," while Hancoy did his part by issuing injure tions against union men on strike. The little grand stand play of "reconcilation" that took place between them on the balcony of the Auditorium as the 'imposing spectacles" of the day's pro edings. The hypocritical benediction of Senator Mason adding a trifle to the imposition.

Like Ghost of Murdered Banquo, It Will Not Down.

IS INHERENT IN CAPITALISM

lern Society Stands in Helpless Terror Before Monster of its Own Creation.

Beyond all question the event of the which has attracted more than any other the attention of the so-called civilized world, was that which occurred at the Pan American Exposition in Buffalo on Friday, September 6th, when the chief magistrate of the nation fell before the pistol of a murderous lunatic, in whose feeble brains the idea of assassinating Pres-ident McKinley took theformof duty". It would be perhaps unfair to tom-ment seriously upon the first hysterical

outboost of the capitalist press when outburst of the capitalist press when disappearance of anarchy is condi-tive tracedy was first announced. It thened upon the disappearance of the been merely the usual mixed chorus of sorrow, wonder, alarm, and denunciation with which such events are siways hailed, but which have never had the slightest effect in deter-ring the "propagandist of the deed" when the insane spirit of murder urges him to the treacherous assassination of some prominent individual whom he sected as a victim.

Again and again these tragedies have occurred and have been followed by the enactment of repressive measures against the perpetrators, declarations of intentions to stamp out anarchy by exterminating the individuals who avow it as a creed, until the murder of ne ruler or high state official again natrates the futility of such

It is almost unnecessary to say that every human being worthy of the name regards these tragedies with regret and sorrow. The wanton des-truction of human life can be viewed with equanimity only by those who are either dead to all human feeling or who possess the characteristics popu-larly attributed to flends.

But even less than repressive measires can these expressions of sorrow and grief, these countless telegrams of condolence and sympathy, do aught to minimise or check the recurrence of these ghastly episodes. Those who would really understand the nature of this murder craze must apply them-selves to its study in the same manner hy which other problems are solved. In this inquiry sentiment is valueless, and the so-called repressive measures themselves prove that they do not repress. It will be apparent to all who have read the comments of the daily papers upon the attempted assussina-ion of McKinley, that the dominant tone is one of despair. It is asked again and again has society no means protecting its representatives nst the murder madness of these answer except the advocacy of still ore repressive measures which have signally falled in the past. Might it not also be asked whether Czolgosz, Bresci, Lucaheni and Caserio are not likewise products of present conditions? And if this is admitted, is it not reasonable to infer that their production will not cease until the conditions are changed?

Will the explinitst press ever deal with the problem in this manner. So far they never have. And the reason is obvious. It would infallibly lead to the conclusion that anarchy cannot disappear until the present structure and basis of society is transformed.

Czolgosz is no chance product. is merely an exaggerated individualist, a product of conditions which are themselves anarchistic. Even the utterances of the press and pulpit upon this event are essentially anarchistic in tone, though the speakers may be unconscious of the fact. Unable and also unwilling. For the system which gives it birth, the system of capitalist production and distribution. And this task is the peculiar mission of the socialist movement alone.

The Unity Pienic.

Considering the rather bleak weather last Sunday, the Unity picnic held at Bergman's Grove, Riverside by the West Division organization of the Socialist Party, was on the whole very successful though there is little doubt but that a raise of ten degrees in the temperature and a few hours of sun-shine in the forencon would have considerably more than doubled the atsand persons were present and enjoyed themselves greatly, as the aftern brought much more pleasant weather than the morning.

The games were participated in by umerous contestants and were well arranged and managed by the commit-tee. Short speeches from various con-rades were well received though a re-solution dealing with the attempt upon the life of President McKinley was not

acted upon.

Dancing was kent up until about in P. M., after which the audience dispersed. The accounts have not yet persed. The accounts have not yet persed. The accounts have not yet been made up but it is likely that the financial outcome will be very satisfactory.

TO WHOM IT MAY CONCERN.

If this should meet the eye of any ader outside the socialist movement, he may have regaled himself upon the accounts given in the capitalist press regarding the action taken by the Socialists of Chicago last Sunday upon the resolutions offered dealing with the attempted assassination of President McKinley, the following comm-

tendered in case such reader may think an explanation necessary.

But first let us say that for the capitalist press and the "public opinion" which is its special product, we care littic. Those who have slandered cialism in the past will doubtless continue to do so while sufficient fools can be found to swallow such misrepresentations. When men deliberately confound socialism and sparchism for the purpose of continuing the present system of production and distribution, by working upon the prejudices : the igporant and unthinking, we feel that explanations proffered for the purpose of setting us right" in their eyes, are both useless and unnecessary.

When the ruler of any country is stricken down by the hand of an assar sin, we do not feel called upon to specially disavow the act, in order that no odium may attach to the Socialist party for such action. We refuse to rush into print to exculpate ourselves of compil. Rion of material that might be utilized city in the attempted assassination of President McKinley or King Humbert or Carnot, any more than we feel called upon to deny guilty participation in the burning of Boer farms, the looting of the Chinese Emperor's palace in Pekin, the killing of Gov. Goebel the blowing up of the Maine, or the poison ing of seldiers with embaimed beef."

We do not have to do these things. The time is even now here when any reasonable human being can easily familiarize himself with the object and method of the Socialist movement. Only those who love to be deceived and who swallow without question the delusions specially prepared for them in the capitalist press, yet think otherwise. We leave them to time and the logic of events.

As Socialists we hold all human ble sacred; that of President McKinley no less than that of the poorest working man in this land. Anarchism is a disease produced and fostered by a capitalist environment. Socialism is the only antidote which will destroy the effect by removng the cause.

The Socialist party can and does per form its work without violating the laws of present society. 'It is recognized by the capitalist class themselves as a legally constituted political party working for its object solely through the recognized means provided for that purpose, viz., the ballot , and it is under far less obligation to constantly repudiate murder as a factor in its propaganda, than those who attempt to fasten such a charge upon it.

- SPEAKERS WANTED

Those who are interested in the local Socialist agitation cannot have falled to observe that although the field of operations is constantly widening, although the number of weekly meetings held continually increases. the list of Socialist public speakers by no means keeps race with the demands of the propaganda. While here and there new speakers have made then appearance and are doing good service for the cause, still it is undeniable that many more could be effectively used were they forthcoming. .

This condition of affairs is perhaps more easily remedied than most of the problems connected with local agitation. While mancial assistance is often difficult to precure, and must in the nature of things slways remain as a constant drain upon the resources of the comrades, this question of procuring speakers can always be more readlly solved. We are already in possesin that direction to good advantage were the branches but to encourage their members to make the attempt. And as such attemps cost nothing financially, there is no reason why they should not be persistently made.

At no time has the membership the branches included so many young men as at present, and while here and there it may be true that certain individuals might imperil their positions by making public Socialist propaganda, yet by far the greater number in the branches are true proletariat-they have nothing to lose-but Socialism has everything to gain by their public activity.

An idea that it requires "courage to face an audience is no doubt to a large extent responsible for the deficiency of public speakers. BÉGINNING OF THE END

Slowly but surely the strike of the steel workers against the trust is disintergating in spite of the efforts of the leaders. The capitalists understanding thoroughly that the fight has passed the critical period for them, are directing their energy toward the opening of the mills now closed and with no small success. In many of the Eastern plants hundreds of men are returning o work while in the West the great Bay View mills have resumed with full forces.

The result of the strike can now be hardly said to be in doubt and the disorganization amonest the ranks of the strikers is being taken every advantage of by the capitalists to bring the strug-

As was predicted in these columns the finish will to all bresent appearances leave the Amalgamated Association apparently intact but in reality seriously weakened and incapacitated from entering upon a conflict of similar dimensions with any hope of success.

There has been nothing in the strike of a pronounced dramatic or spectacufar nature. The capitalists merely sat tight and won out in consequence.

So certain are they that a few days vill put'a formal end to hostilities, that the press is even now selecting scape goats and framing reasons as to why the strike failed-of course for the particular use of the beaten strikers.

President Shaffer has already filoried as a solemn warning to the workingman of the disastrous results of "unwise" leadership, while the latter are also informed that another reason for their failure is to be found in the fact that "public sympathy" was never on their side-it was with the trusts

As the strike drew near its end the attempted murder of the president attracted the attention of the public away from it to a large extent. But all is grist that comes to the capitalist mill. Even this event was utilized as a warning to organized labor. Several unions having passed resolutions repudiating mation that such procedure is inspired by the fact that the abuse of "free speech may work indirect injury to the cause of labor. Clinton Simonton, Dear Comrade:
The National Committe is pleased to hear that you are about to undertake an agitation trip through the middle Eastern and New England states and feel assured that your work will result in building up the Socialist party.
We also appreciate the fact that you are undertaking the work independently, which is all the more reason why you are entitled to the co-operation of the comrades.

the comrades.
With best wishes for your success, I remain Yours Fraternally, Leon Greenbaum, National Secretary

National Secretary.
Comrade Simonton expects to start from Chicago east via Detroit and Cleveland, thence through 'he strike region of Pensylvania, on to New Jersey where he expects to assist Comrade Vall in his campaign as socialist candidate for governor of that state.
Comrades on the route here mentioned should write Simonton at Berwick, Ilis, if they desire to arrange meetings.

BOOK REVIEW.

The latest edition of the "Pocket Library of Socialism" published by C. H. Kerr and Co., 56 5th Ave., has just been issued, "Trusts and Imperialism" by H. Gaylord Wilshire, being the subject. Many of our readers are already familiar with the literary work of Com-"Challenge" which has been recently published by him in Los Angeles Cal., but which has now been transerred to New York. Comrade Wilshire handles the question in his usual inimitable style and shows in a striking manner the distinct connection between trusts and imperialism as part of the development of the capitalist system, and the inevitable trend towards sociali which they imply.

LABOR DAY ADDRESS.

Translated for the Workers' Call from Extracts from Comrade John Collins "Manual Du Co-operateur Speech on September 2nd at Des Moines, Ia.

Probably many of the Comrades will be interested in the following extracts from the speech of Comrade John Colling on Labor Day at Des Moines, They are taken from the Des Moines Leader report which states that A housekeeper buys two litres, of the audience of 5,000 applauded the wine a day from the grocer or the wine speaker again and again during his address.

spends 1.49 francs to procure for her table a wine which is always poor, often watered, rometimes even dectered. She knows that one of her neighbors, a bourgeois, who has money and credit, buys from the direct agent of the vinegrower a cask of 220 litres which, put down in his cellar, costs 130 francs. The bourgeois pays at wholesale 59 centimes a litre of pure wine, while the housekeeper of pure wine, while the housekeeper of the world workers united and not have a paper of pure wine, while the housekeeper of pure wine, while the housekeeper of pure wine, while the housekeeper of the world workers united and nothing else. We know, trade unions to the world workers united and nothing else. We know, trade unions to clear cut organ of Socialist have suffered and are suffering to day. They have gene hungering and

been extested from its exhibitors by the pays at wholesale side of calculations are not of the workers united, and nothing else. We knew trade union-ties of adulterated wire. If she could obtain the same kind of wine as the bourgeois and on the same conditions, in the workers easily and the same kind of wine as the bourgeois and on the same conditions, in the workers were considered to save these 80 francs 30 centimes a year. In order to save these 80 francs 30 centimes a year it would be necessary to have 130 francs and the bourgeois who have 130 francs and the bourgeois and on the workers were not organized. Suppose I were to go to the first and the bourgeois who have the cask of wine. But she is as the idea of applying to nine other housekeepers who are no richef than herself, and all ten of them agree to save up 12 francs each. They must fogether their ten times 13, or 130 francs, and order the cask of wine. Each one receives in the division one-keepen have in a trapsient which is good wine and costs 55 centimes a little.

Just bourgeois who housekeepers have in a trapsient with the many to 220 litters, or 22 litters, which is good wine and costs 55 centimes a little.

Just bourgeois who way to 12 days. Or shout thirty in a year. The group of consumption.

Let us make some cheervat ons.

I. Each household consuming the 22 litters in 11 days it will be necessary to refer a cask every eleven days, or shout thirty in a year. The group of the working-class households accordate the working-class household accordate the working-

agent. It will then be able to buy the same quality of wine a little cheaper than the bourgeois who buys only three or four casks a year. The wine, for example, will come to 57 centimes a little instead of to 59.

2. What the housekeepers do for wine they will do also for other products, as potatoes or coal. Whoever buys 1,600 kilos of coal pays for ft in Paris in an ordinary year 51 francs, that is to say, 2,55 francs per sack of fifty kilos, while at the same time a sack of coal is sold at 2,70 francs or against the working men, from whence ingments.

speakers have been added to our speakers' list and judging by the way the audiences have received them they are awakening the workers to a recognition of the great world struggle-the struggle between the class that OWN the means of production and distribution— "The means of life"—"the employing class" and that class that OWN NOTH-ING except their labor power and who are consequently DEPENDENT on the class that own this "means" by wwhich this workingclass must live. The new speakers are Comrades; Edward Dierke, Chas. L. Brecken, Robt. T. Sims, Mrs. Gertrude B: Hunt, and W. E. McDermutt. The work of these workers is of the right sort. This is the best contribution the socialist party can receive—more speakers and good speakers—who'll be the next.

The work on the fitting up of the new "Headquarters" has been pushed and by the time this week's issue of the "Workers' Calt" has been printed everything will have been arranged and in readiness for the great crowd that will be at the opening, Sunday, Sept.

The man-ner in which labor's demands were answered by socialists when in power, and by capitalists politicians when in power, presented such a striking contrast that the lesson taught by rade Klenkle will never be forgotten. The necessity of the abolition of Capi-talism and the case with which it could be accomplished by the toilers, voting in the same manner they strike and parade; -in a body-for socialism, was made very plain. A story illustrated his point. "Many years ago a man was cast into a Spanish dungeon. he lay there suffering untold agonies for 17 long weary years. One day a happy thought struck the poor wrete prisoner-he opened the window and got out." When the Giant or Labor developes the same degree of intelligence as the Spanish prisoner, he'll open the window and get out of the h

The Chicago American in one of its gins a paragraph in this manner, "The thoughtful socialist of the time of Solomon and the Queen of Shebs would nave, etc.," etc.," This is just about the calibre of the Chicago American and is the very stuff one would expect from such a source. It goes one bet ter that the well meaning but minus-en individuals who persist in speaking of the socialism of Jesus Christ. To persons with such a conception of so-cialism society can only be regarded as mething similar to a chees board the figures on which can be shifted about at will. There who hold that estimism was possible in the time of Jesus Christ, or even a century ago, and who believe that in those days any one could have had a conception of the socialist philo-sophy, cannot understand the Marxian nterpretation of history. Society is

mes Cause, - Denies Effect.

abor Day marchers at Springfie relates that there was 'no room for lass hatred' in this country. He may be right, but it is just as well to call his attention to the fact that there is o much room for the class struggle in this country, that little is left for anything else. Truly Northcott must be an optimistic individual regarding omic antagonism between insses if he thinks there is no room for its expression. Here is what he says regarding labor:

In all these hoary ages labor has been commodity to be bought in the maret the same he horses, coal, fron and other commodities. Governed, by the law of supply and demand, labor has rested under the yoke of the Ricardian law that the wages of toll would always be brought to the level of the cost of the bare living of the toiler.

According to Northcott, the labore should manifest no resentment at being treated as a commodity. He has een robbed in past ages therefore the robbery should continue. A hare living is all that the "civilizatios" of the 20th century can allot to him. Those who produce the wealth of the world are to get just sufficient to enable them to go on producing, and exhibit no dissatisfaction. And yet it is extremely pro on Street. Speakers: W. Huggins, bable that Northcott would call the Socialist a visionary and dreamer, after making such an exhibition as the

Of course no with the attack on President McKinley. It has not been necessary in this case for the capitalists to pay for this work. The anarchists have done it for them

Anarchy a Bourgeois Fad.

Throughout Europe, as Lafargue and other socialist writers have often pointed out, anarchy has long been s fad of the radical bourgeoiste. In Paris university it is notorious that the anarchist groups are mainly made up of the sons of the small capitalists. These groups are never interfered with in any attempt to "stamp out anar-chy," as the police are well aware of value in maintaining the established order by throwing discredit on en one of their dupes commits a I of violence he is punished feroclously, but the leading spirits are left to breed more trouble.

That the capitalists of America are earning the leason of their European fellow exploiters, has been evident for some time. Already it has become quite a fashionable thing to startle your and acquaintances with statement that you are an anarchist. It means nothing and serves to make drawing room sensation. SOCIALISM VS ANABORISM.

ecture delivered by Comrade 'A. M. Simons at the Socialist Temple last third pages of this issue. Regarding the lecture itself we need say no n-dre than that it represents substantially the known as "anarchy," though this by no means implies that all phases of the subjected are exhaustively treated, or that upon certain points no further question is possible. This of course the readers will judge for themselves, though even if they differ to some exent with some of the speakers conclusions, it will hardly be denied, we think, that it represents in the main the neral attitude of our movement to ards anarchy.

This lecture was delivered to an audince which literally packed the building far beyond its seating capacity, and which conservatively estimated, could hardly have been less than a thousand, The lecture was heard in the deepest silence and attention, which was only interrupted occasionally by bursts of applause.

It is significant of the dread of capitalism towards a real exposure of anar chy, that alchough copies of the text of this lecture were sent to every daily paper in this city, not one of them dar ed to publish even a synopsis of it. One 'paper has two paragraphs as weapon against the opposition political word, but on the contrary gave a grossly ridioulous report of the meeting, as having ended in a "riot" which might saved the situation by striking up a "fag-time" melody. The same paper, by an inge vious manipulation of headlines, made it appears that the audience de-

But through good and evil reports. through misconstruction and calumny, the voices of our speakers, and the columns of our press, have both before consistently repudiated assassination as a factor in our propagands. The literature which we have distributed is in simost every paragraph an additional testimony to the statements of our speakers and press.

None have fought the so-called "philsophy" of anarchy so constantly, bitterly, and effectively as the Socialists. None have exposed the shallowness of its pretensions, the diseased reasoning of its dupes, and the fact that its premises once accepted, would if translat ed into action, inevitably and logically lead to murder and assassination, as have the speakers and writers of the Socialist party.

But we have as unflinchingly expose the basis upon which this alleged philsophy rests and from which it springs We have uncovered its roots in the son omic structure of society and demonstrated beyond doubt that the so-called "individualism" necessary to the capitalist system of production and distribution, is its progenitor. That both the "philosophical" and murderous aparchists have accepted this bastard "individualism" as basic premises, and carried it to its logical conclusionself renunciation-where the pressure of physical necessity is least-murder, where it is greatest.

And the capitalist press which has never dared to print the full utterances of our speakers and writters in its only umns, but has invariably garbled, mutilated, and distorted them, or torn certain passages from their contexts in such manner as to render them meaningless, or by clever manipulation incendiary and criminal-this press yet seeks to create the impression that Socialism and Anarchism are closely related, and that the murderous results of the latter philosophy, are secretly, if not openly satisfactory to Socialists.

And it is more because of the position we have taken as regards Amarchisa (and which is well known to those who own the capitalist pressy that we are dangerous-to capitalism. Anarchism is not. On the contrary it is a bulwark of defense. Capitalism fears not the dagger or bullet of the assassin-an individual can always be replacedbut the prospect of an intelligent ballot in the hands of an intelligent, working class fills its supporters with terror and

We have been taunted with ignorance True it is, that many of our most earnest workers have been denied the advantages of a liberal education. But what class is responsible for such denial? What system is it that tears the child from school to join the ranks of the wage slaves in the mill and factorles? To merely ask this question is to

silence the taunt forever. But our speakers and writers have done their utmost to repair the deficiency in the small leisure that a prohave been earnest and diligent students, and whatever yet they may

We might perhaps appeal to posterity for the justification which we can viduals, may be powerless to arrest or not now secure. But for posreverse the economic evolution, yet terity capitalism cares nothing. with the classes through which this Nevertheless in the not distant future, men who are not dependent upon an conomic class for permission to write have no fear that their judgment will be inimical to the stand we have taken. This is the spectacle which will be presented to them for investigation.

Upon the one hand the so-called intially investigate. Some who had been in the their connection by posing as students panie and confusion which always fills tions. Others who had constantly vill-

tions, hastening after his death, to make amends by publishing fulsome sulogies and hypocritical lame upon his taking off. And all of them without exception, in spite of the seeming chaotic state of their ideas, careful to say nothing that might offend or alarm the class who have hired them as defenders of the existing economic conditions

On the other a comparatively small group of obscure individuals, mostly workingmen, stedfastly, pointing out midst : buse and misrepresentation, the and after the tragedy, continually and fact that the anarchism of which soclety appeared to stand so much in dread, was in reality a result of the philosophy which society itself has accepted and clung to with the obstinacy which the preservation of class interests alone could call forth-the philosophy which makes the individual responsible for conditions which are the creation of society as a whole.

The ruling classes have declared that ditional confidence of knowing that we are advocating a cause which holds the will be maintained and strengthened until Anarchy and the capitalism which gives it birth have disappeared for ever

SNAP SHOTS BY THE WAYSIDE

An "Anti Vellow Journal Least has been formed in Newark, N. J. It has already proceeded so far that a button for the league has been planned It will be of turquoise blue with the legend "Anti Yellow" upon it. This is about as practical a method of "stamping out" anarchy as we have yet noticed in the press.

English tradés unions seem to be up against it hard. The House of Lords has decided that trades unions are re-sponsible bodies and may therefore be sued for damage to business. There doesn't seem to be any way out of the muddle unless the trades union members in turn decide that the House Lords shall go out of the business of "deciding", and ratify such decision with socialist votes.

"Anarchy is merely a comple ocialism. In striking socialism we thus misrepresented: Our movement is strike anarchy." This is what is cabled from Rome as the opinion of the Pope. Knowing something of the resources of capitalist journalism, we are loat a accept this idiotic statement as the expression of the Pontiff. We believe that he is old enough to know better, or if not, we stand ready to enlighten him upon the matter, and herewith in vite him to become a subscriber to the Workers' Call. (One is never too old to earn, and it is our special mission to to dispel ignorance of this sort wherever found

Those who fill the columns of the public press with such expressions as that the "nation is bowed with grief" over the tragedy in Buffalo would find It a difficult task to justify such expres sions from the attitude of the public be interrupted by the death of any in- lectual champions of capitalism can on last Friday evening when the builetins foreboding the approaching dis-solution of the President were pouring thick and fast through the streets in the shape of "extras." course false to assert that evidences of grief were entirely absent. Again, the statement of the "city bowed in grief" could hardly be borne out by a glance at the theatres on that fateful Friday evening. "Standing room only" was the sign prominent at many of the entrances of these institutions. Even the capitalist press admitted that the theatres were crowded", but tried to explain this seeming incongruity by asserting that the tickets had been bought beforehand. Grief was evidently unable to overcome the possibilities and anticipa tion of enjoyment for which money had been already paid.
